Want to deliver a pitch or presentation that grabs your audience's ever-shrinking attention span? Ditch the colorful slides and catchy language. And follow one simple rule: Convey only what needs to be said, clearly and concisely, in three minutes or less. That's the 3-Minute Rule. Hollywood producer and pitch master Brant Pinvidic has sold more than three hundred TV shows and movies, run a TV network, and helmed one of the largest production companies in the world with smash hits like *The Biggest Loser* and *Bar Rescue*. In his nearly twenty years of experience, he's developed a simple, straightforward system that's helped hundreds—from Fortune 100 CEOs to PTA presidents—use top-level Hollywood storytelling techniques to simplify their messages and say less to get more. Pinvidic proves that anyone can deliver a great pitch, for any idea, in any situation, so your audience not only remembers your message but can pass it on to their friends and colleagues.

You'll see how his methods work in a wide range of situations—from presenting investment opportunities in a biotech startup to pitching sponsorship deals for major sports stadiums, and more. Now it's your turn. The 3-Minute Rule will equip you with an easy, foolproof method to boil down any idea to its essential elements and structure it for maximum impact. Simplify. Say less. Get More.

A Special Way of Caring for the Terminally Ill National Academies Press

Increasingly over the past five years, uncertainty about reimbursement for routine patient care has been suspected as contributing to problems enrolling people in clinical trials. Clinical trial investigators cannot guarantee that Medicare will pay for the care required, and they must disclose this uncertainty to potential participants during the informed consent process. Since Medicare does not routinely "preauthorize" care (as do many commercial insurers) the uncertainty cannot be dispelled in advance. Thus, patients considering whether to enter trials must assume that they may have to pay bills that Medicare rejects simply because they have enrolled in the trial. This report recommends an explicit policy for reimbursement of routine patient care costs in clinical trials. It further recommends that HCFA provide additional support for selected clinical trials, and that the government support the establishment of a national clinical trials registry. These policies (1) should assure that beneficiaries would not be denied coverage merely because they have volunteered to participate in a clinical trial; and (2) would not impose excessive administrative burdens on HCFA, its fiscal intermediaries and carriers, or investigators, providers, or

participants in clinical trials. Explicit rules would have the added benefit of increasing the uniformity of reimbursement decisions made by Medicare fiscal intermediaries and carriers in different parts of the country. Greater uniformity would, in turn, decrease the uncertainty about reimbursement when providers and patients embark on a clinical trial.

Documentation for Physical Therapist Practice: A Clinical Decision Making Approach provides the framework for successful documentation. It is synchronous with Medicare standards as well as the American Physical Therapy Association's recommendations for defensible documentation. It identifies documentation basics which can be readily applied to a broad spectrum of documentation formats including paper-based and electronic systems. This key resource skillfully explains how to document the interpretation of examination findings so that the medical record accurately reflects the evidence. In addition, the results of consultation with legal experts who specialize in physical therapy claims denials will be shared to provide current, meaningful documentation instruction.

Federal Register F.A. Davis
During the past several decades, the field of mental health care has expanded greatly. This expansion has been based on greater recognition of the prevalence and treatability of mental disorders, as well as the availability of a variety of forms of effective treatment. Indeed, throughout this period, our field has witnessed the introduction and the wide spread application of specific pharmacological treatments, as well as the development, refinement, and more

broadly based availability of behavioral, psychodynamic, and marital and family interventions. The community mental health center system has come into being, and increasing numbers of mental health practitioners from the fields of psychiatry, psychology, social work, nursing, and related professional disciplines have entered clinical practice. In concert with these developments, powerful sociopolitical and socioeconomic forces-including the deinstitutionalization movement of the late 1960s and early 1970s and the cost-containment responses of the 1980s, necessitated by the spiraling cost of health care-have shaped the greatest area of growth in the direction of outpatient services. This is particularly true of the initial assessment and treatment of nonpsychotic mental disorders, which now can often be managed in ambulatory-care settings. Thus, we decided that a handbook focusing on the outpatient treatment of mental disorders would be both timely and useful. When we first began outlining the contents of this book, the third edition of the American Psychiatric Association's Diagnostic and Statistical Manual of Mental Disorders (DSM-III) was in its fourth year of use.

To find the most current and correct codes, dentists and their dental teams can trust CDT 2021: Current Dental Terminology, developed by the ADA, the official source for CDT codes. 2021 code changes include 28 new codes, 7 revised codes, and 4 deleted codes. CDT 2021 contains new codes for counseling for the control and prevention of adverse oral, behavioral, and systemic health effects associated with high-risk substance use, including vaping; medicament application for the prevention of caries; image captures done through teledentistry by a licensed practitioner to forward to another dentist for interpretation; testing to identify patients who may be infected with SARS-CoV-2 (aka COVID-19). CDT codes are developed by the ADA and are the only

HIPAA-recognized code set for dentistry. CDT 2021 codes go into effect on January 1, 2021. -- American Dental Association

Impairment-Based Conditions Jones & Bartlett Learning

The Social Determinants of Mental Health aims to fill the gap that exists in the psychiatric, scholarly, and policy-related literature on the social determinants of mental health: those factors stemming from where we learn, play, live, work, and age that impact our overall mental health and well-being. The editors and an impressive roster of chapter authors from diverse scholarly backgrounds provide detailed information on topics such as discrimination and social exclusion; adverse early life experiences; poor education; unemployment, underemployment, and job insecurity; income inequality, poverty, and neighborhood deprivation; food insecurity; poor housing quality and housing instability; adverse features of the built environment; and poor access to mental health care. This thought-provoking book offers many beneficial features for clinicians and public health professionals: Clinical vignettes are included, designed to make the content accessible to readers who are primarily clinicians and also to demonstrate the practical, individual-level applicability of the subject matter for those who typically work at the public health, population, and/or policy level. Policy implications are discussed throughout, designed to make the content accessible to readers who work primarily at the public health or population level and also to demonstrate the policy relevance of the subject matter for those who typically work at the clinical level. All chapters include five to six key points

that focus on the most important content, helping to both prepare the reader with a brief overview of the chapter's main points and reinforce the "take-away" messages afterward. In addition to the main body of the book, which focuses on selected individual social determinants of mental health, the volume includes an in-depth overview that summarizes the editors' and their colleagues' conceptualization, as well as a final chapter coauthored by Dr. David Satcher, 16th Surgeon General of the United States, that serves as a "Call to Action," offering specific actions that can be taken by both clinicians and policymakers to address the social determinants of mental health. The editors have succeeded in the difficult task of balancing the individual/clinical/patient perspective and the population/public health/community point of view, while underscoring the need for both groups to work in a unified way to address the inequities in twenty-first century America. The *Social Determinants of Mental Health* gives readers the tools to understand and act to improve mental health and reduce risk for mental illnesses for individuals and communities. Students preparing for the Medical College Admission Test (MCAT) will also benefit from this book, as the MCAT in 2015 will test applicants' knowledge of social determinants of health. The social determinants of mental health are not distinct from the social determinants of physical health, although they deserve special emphasis given the prevalence and burden of poor mental health.

On October 1, 2014 the ICD-9 code sets

used to report medical diagnoses and inpatient procedures will be replaced by ICD-10 code sets. The transition to ICD-10 is required for everyone covered by the Health Insurance Portability and Accountability Act (HIPAA). Also, the Middle Class Tax Relief and Jobs Creation Act of 2012 (MCTRJCA; Section 3005(g)) published at

<http://www.gpo.gov/fdsys/pkg/CRPT-112/hrpt399/pdf/CRPT-112hrpt399.pdf> states that "The Secretary of Health and Human Services shall implement, beginning on January 1, 2013, a claims-based data collection strategy that is designed to assist in reforming the Medicare payment system for outpatient therapy services subject to the limitations of section 1833(g) of the Social Security Act (42 U.S.C. 1395l(g)). Such strategy shall be designed to provide for the collection of data on resident function during the course of therapy services in order to better understand resident condition and outcomes." This reporting and collection system requires claims for therapy services to include non-payable G-codes and related modifiers. These non-payable G-codes and severity/complexity modifiers provide information about the beneficiary's functional status at the outset of the therapy episode of care, at specified points during treatment, and at the time of discharge. These G-codes and related modifiers are required on specified claims for outpatient therapy services—not just those over the therapy caps. This book can help occupational therapists, physical therapists, and speech therapists understand Medicare standards for subacute care programs that aim to be compliant with Medicare MDS 3.0 standards and state regulations. Documenting and billing strategies are also discussed in this

book. This book has been updated to discuss the new MDS assessment schedule, distinct days of therapy, co-treatment, the allocation of group therapy minutes, the revised student supervision provisions, the EOT (End of Therapy) OMRA (Other Medicare Required Assessment) and new resumption items, and the new PPS assessment-COT (Change of Therapy) OMRA. Appropriate billing and documentation should be present in the medical record. Medicare is increasingly reviewing therapy claims to ensure that the therapy provided did require the skills of a therapist. This book discusses establishing medical necessity, refusing to care for a resident, restraints, safety, creating incident reports, supervising assistive personnel, and resident privacy. Coding and billing for subacute and long-term care settings are also covered in this book, along with denial and appeal management, regulatory guidelines for insurers, and improving cash flow with denial management strategies. Proper coding and documentation ensures that facilities will keep their money upon a post-payment medical record audit. The information provided here in no way represents a guarantee of payment. Benefits for all claims will be based on the resident's eligibility, provisions of the law, and regulations and instructions from the Centers for Medicare & Medicaid Services (CMS). It is the responsibility of each provider or practitioner submitting claims to become familiar with Medicare coverage and its requirements.

The Framework, an official AOTA

document, presents a summary of interrelated constructs that define and guide occupational therapy practice. The Framework was developed to articulate occupational therapy's contribution to promoting the health and participation of people, organizations, and populations through engagement in occupation. The revisions included in this second edition are intended to refine the document and include language and concepts relevant to current and emerging occupational therapy practice. Implicit within this summary are the profession's core beliefs in the positive relationship between occupation and health and its view of people as occupational beings. Numerous resource materials include a glossary, references and a bibliography, as well as a table of changes between the editions.
