ERISA and Health Insurance Subrogation In

All 50 States is the most complete and thorough treatise covering the complex subject of ERISA and health insurance subrogation ever published. NEW TO THE FIFTH EDITION! • Updated To Include All The Newest Case Law! • Updated To Include Medicaid Subrogation and Preemption of FEHBA ! • New Plan Language Recommendations! • Complete

Health Insurance Subrogation Laws In All 50 States • Covers The Application of ERISA In Every Federal Circuit The Fifth Edition of ERISA and Health Insurance Subrogation In All 50 States has been completely revised, edited, and reorganized. This was partly to reflect the new direction recent case decisions have taken regarding health insurance

subrogation as well as the crystallization of formerly uncertain and nebulous areas of the law which have now received some clarity. An entirely new chapter entitled, "What Constitutes Other Appropriate Equitable Relief?" has been added and replaces the old Chapter 9, which merely dealt with Knudson and Sereboff. The new edition introduces new state court decisions addressing the issue of causation and whether and when a subrogated Plan seeking reimbursement must prove that the medical benefits it seeks to recover were causally related to the original negligence of the tortfeasor. An entirely new section was added concerning the subrogation and reimbursement rights of Medicare Advantage Plans, a statutorily-authorized Plan which provides the same benefits an individual is entitled to recover under Medicare. This includes recent case law which detrimentally affects the rights of such Plans to subrogate. Also added to the new edition is additional law and explanation regarding Medicaid subrogation, including the differentiation between "cost avoidance" and "pay and chase" when it comes to procedures for

paying Medicaid claims. Significant improvements have been made to suggested Plan language which maximizes a Plan's subrogation and reimbursement rights. The suggested language stems from recent decisions and developments in ERISA and health insurance subrogation from around the country since the last edition. The new edition has been completely reworked both in substance and organization. Recent case law has necessitated consolidation of several portions of the book and elimination or editing of others. A new section entitled "Liability of Plaintiff's Counsel" has been added, which provides a clearer exposition on the laws applicable and remedies available when plaintiff's attorneys and Plan beneficiaries settle their third-party cases and fail to reimburse the Plan. Also new to the book are recently-passed anti-subrogation measures such as Louisiana's Senate Bill 169, § 1881, which states that no health insurer shall seek reimbursement from automobile Med Pay coverage without first obtaining the written consent of the insured. The new edition also goes into much greater detail on the procedures for and law underlying

the practice of removal of cases from state court to federal court, and the possibility of remand back to state court. This includes the Federal Courts Jurisdiction and Venue Clarification Act of 2011, effective Jan. 6, 2012, which amended federal removal, venue, and citizenship determination statutes in very significant ways. The new edition also delves into, for the first time, the role which the federal Anti-Injunction Act plays when beneficiaries sue in state court to enforce the terms of an ERISA Plan, while the Plan files suit in federal court seeking an injunction against the state court action. New case law and discussion on preemption of FEHBA subrogation and reimbursement claims have been added to Chapter 10 in the wake of new decisions regarding same.

The Financial Crisis Inquiry Report, published by the U.S. Government and the Financial Crisis Inquiry Commission in early 2011, is the official government report on the United States financial collapse and the review of major financial institutions that bankrupted and failed, or

would have without help from the government. The commission and the report were implemented after Congress passed an act in 2009 to review and prevent fraudulent activity. The report details, among other things, the periods before, during, and after the crisis, what led up to it, and analyses of subprime mortgage lending, credit expansion and banking policies, the collapse of companies like Fannie Mae and Freddie Mac, and the federal bailouts of Lehman and AIG. It also discusses the aftermath of the fallout and our current state. This report should be of interest to anyone concerned about the financial situation in the U.S. and around the world. THE FINANCIAL CRISIS INQUIRY COMMISSION is an independent, bi-partisan, government-appointed panel of 10 people that was created to "examine the causes, domestic and global, of the current financial and economic crisis in the United States." It was established as part of the Fraud Enforcement and Recovery Act of 2009. The commission consisted of private citizens with expertise in economics and finance, banking, housing, market regulation, and consumer protection. They

examined and reported on "the collapse of major financial institutions that failed or would have failed if not for exceptional assistance from the government." News Dissector DANNY SCHECHTER is a journalist, blogger and filmmaker. He has been reporting on economic crises since the 1980's when he was with ABC News. West's Federal Practice Digest 4th FEMA Housing finance markets have been changing dramatically in both emerging and developed economies. On the one hand, housing finance markets are expanding and represent a powerful engine for economic growth in many emerging economies. However, the unfolding sub-prime mortgage crisis highlights the risks and potential

turbulence that this sector can introduce into the financial system when expanding without proper infrastructure and regulation. As housing finance keeps growing in emerging economies to match a rising demand for housing, new risk management approaches, business models, funding tools, and policy instruments can help. Yet many questions remain about the right balance between innovation and regulation, the extent of risks to the financial system, the appropriate role of the state to promote affordable housing, and the effects of the sub-prime crisis. This book provides a guide for policymakers dealing with housing finance in emerging markets. It highlights the prerequisites for an effective housing finance system; it lays out several policy alternatives and models of housing finance; and it explores the role of governments in expanding access to housing finance for lower-income households. There is no "best" model set out in this book. The aim is to provide a developmental roadmap that can be tailored and sequenced to each country's situation and timing.

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures,

policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

An expose of insurance injustice and a plan for consumers and lawmakers to fight it Over the last two decades, insurance has become less of a safety net and more of a spider's web: sticky and complicated, designed to ensnare as much as to aid. Insurance companies now often try to delay payment of justified claims, deny payment altogether, and defend these actions by forcing claimants to enter litigation. Jay M. Feinman, a legal scholar and insurance expert, explains how these trends developed, how the government ought to fix the system, and what the rest of us can do to protect ourselves. He shows that the denial of valid claims is not occasional or accidental or the fault of a few bad employees. It's the result of an increasing and systematic focus on maximizing profits by major companies

such as Allstate and State Farm. Citing dozens of stories of victims who were unfairly denied payment, Feinman explains how people can be more cautious when shopping for policies and what to do when pursuing a disputed claim. He also lays out a plan for the legal reforms needed to prevent future abuses. This exposé will help drive the discussion of this increasingly hot- button issue.
