**Decolonizing mathematics | Decolonial International Network** Calculus C K Raju C. K. Raju It is by now well known that the calculus and its infinite series originated in India across a thousand year period, starting from the 5 th c. Aryabhata. It was needed for agriculture and overseas trade, the two key sources of Indian wealth. 1 Indian monsoon-driven agriculture requires a good calendar, which requires good astronomy (hence precise trigonometric values) needed also for navigation.
