## MELODY LOGAN

---

*Africa Is Not a Country* Bloomsbury Publishing USA

Imagined or actual returns to a "homeland" in African literature are examined in relation to changing concepts of identity, belonging, migration and space.

**A Novel** UNC Press Books

In November 1963, the president of South Vietnam and his brother were brutally executed in a coup that was sanctioned and supported by the American government. President Kennedy later explained to his close friend Paul "Red" Fay that the reason the United States made the fateful decision to get rid of the Ngos was in no small part because of South Vietnam's first lady, Madame Nhu. "That goddamn bitch," Fay remembers President Kennedy saying, "She's responsible ... that bitch stuck her nose in and boiled up the whole situation down there." The coup marked the collapse of the Diem government and became the US entry point for a decade-long conflict in Vietnam. Kennedy's death and the atrocities of the ensuing war eclipsed the memory of Madame Nhu—with her daunting mixture of fierceness and beauty. But at the time, to David Halberstam, she was "the beautiful but diabolic sex dictatress," and Malcolm Browne called her "the most dangerous enemy a man can have." By 1987, the once-glamorous celebrity had retreated into exile and seclusion, and remained there until young American Monique Demery tracked her down in Paris thirty years later. Finding the Dragon Lady is Demery's story of her improbable relationship with Madame Nhu, and—having ultimately been entrusted with Madame Nhu's unpublished memoirs and her diary from the years leading up to the coup—the first full history of the Dragon Lady herself, a woman who was feared and fantasized over in her time, and who singlehandedly frustrated the government of one of the world's superpowers.

**The Sack of Rome** Harvill Secker

The classic work of political, economic, and historical analysis, powerfully introduced by Angela Davis In his short life, the Guyanese intellectual Walter Rodney emerged as one of the leading thinkers and activists of the anticolonial revolution, leading movements in North America, South America, the African continent, and the Caribbean. In each locale, Rodney found himself a lightning rod for working class Black Power. His deportation catalyzed 20th century Jamaica's most significant rebellion, the 1968 Rodney riots, and his scholarship trained a generation how to think politics at an international scale. In 1980, shortly after founding of the Working People's Alliance in Guyana, the 38-year-old Rodney would be assassinated. In his magnum opus, *How Europe Underdeveloped Africa*, Rodney incisively argues that grasping "the great divergence" between the west and the rest can only be explained as the exploitation of the latter by the former. This meticulously researched analysis of the abiding repercussions of European colonialism on the continent of Africa has not only informed decades of scholarship and activism, it remains an indispensable study for grasping global inequality today.

*FDR, Detroit, and an Epic Quest to Arm an America at War* Houghton Mifflin Harcourt

Covers the period from 2003-2006.

*Farm-fresh African, Caribbean & Southern Flavors Remixed* Cambridge University Press

A bracing re-examination of the myths and realities of European integration which challenges conventional wisdoms of Europhiles and Eurosceptics alike. Kiran Klaus Patel explores the EU's contribution to peace, prosperity, and democracy, its impact on peoples' lives and the lessons of the past for its contemporary crisis.

**One Hundred Years of Solitude** Simon and Schuster

In 2009 Uganda's Anti-Homosexuality Bill became a top global news story. Two years later Hillary Clinton declared "Gay rights are human rights and human rights are gay rights," but still today there is little consensus on how to advance those rights beyond the U.S. and Europe. The fact is that international LGBT activism and allies have created winners and losers. In Africa those who easily identify with the identities of the global movement find support, funding and care. Those whose sexualities don't align so neatly don't. In this faithful and moving investigation, award winning journalist Robbie Corey-Boulet shows that LGBT liberation does not look the same in Africa as it does in the United States or Europe. At a time when there is a groundswell of interest in LGBT life in Africa and attempts at reversing LGBT rights across much of the 'developed' world Corey-Boulet lays bare past failures. To the extent that there exists a right way to engage on LGBT issues in Africa—and, indeed, worldwide—*Love Falls on Us* is for those looking to learn what it is.

**The Next Africa** Simon and Schuster

In 1880 the continent of Africa was largely unexplored by Europeans. Less than thirty years later, only Liberia and Ethiopia remained unconquered by them. The rest - 10 million square miles with 110 million bewildered new subjects - had been carved up by five European powers (and one extraordinary individual) in the name of Commerce, Christianity, 'Civilization' and Conquest. *The Scramble for Africa* is the first full-scale study of that extraordinary episode in history.

**The Bright Continent** Farrar, Straus and Giroux

Africa is the only continent to have grown poorer over the past three decades. Why? Robert Guest's fascinating book seeks to diagnose the sickness that continues to hobble Africa's development. Using reportage, first-hand experience and economic insight, Robert Guest takes us to the roots of the problems. Two fifths of African nations are at war, AIDS has lowered life expectancy to as young as forty and investment is almost impossible as houses that could be used as collateral do not formally belong to their owners. Most shocking of all is the evidence that the billions of dollars of aid, given to Africa has had little perceptible effect on the poor. *The Shackled Continent* offers insightful, and occasionally controversial, explanations for this state of affairs. In this magnificent and engaging book, Robert Guest provides an invigorating history and an inspired commentary on the enigma of modern Africa and this paperback edition includes a new chapter. 'I doubt whether there is a better brief introduction to the travails of modern Africa and their causes' Anthony Daniels, *Sunday Telegraph* 'He is a lively and observant reporter who can describe, in a breezy no-nonsense style, the horrors and miseries of Africans in the interior. . .The reader can learn much from this

lively and outspoken book' Anthony Sampson, Guardian

**The Audacity of Hope** Bloomsbury Publishing

Beyond simplistic binaries of "the dark continent" or "Africa Rising," Africans at home and abroad articulate their identities through their quotidian practices and cultural politics. Amongst the privileged classes, these articulations can be characterized as Afropolitan projects--cultural, political, and aesthetic expressions of global belonging rooted in African ideals. This ethnographic study examines the Afropolitan projects of Ghanaians living in two cosmopolitan cities: Houston, Texas, and Accra, Ghana. Anima Adjepong's focus shifts between the cities, exploring contests around national and pan-African cultural politics, race, class, sexuality, and religion. Focusing particularly on queer sexuality, Adjepong offers unique insight into the contemporary sexual politics of the Afropolitan class. The book expands and complicates existing research by providing an in-depth transnational case study that not only addresses questions of cosmopolitanism, class, and racial identity but also considers how gender and sexuality inform the racialized identities of Africans in the United States and in Ghana. Bringing an understudied cohort of class-privileged Africans to the forefront, Adjepong offers a more fully realized understanding of the diversity of African lives.

PublicAffairs

. *Renewal of Life by Transmission*. The most notable distinction between living and inanimate things is that the former maintain themselves by renewal. A stone when struck resists. If its resistance is greater than the force of the blow struck, it remains outwardly unchanged. Otherwise, it is shattered into smaller bits. Never does the stone attempt to react in such a way that it may maintain itself against the blow, much less so as to render the blow a contributing factor to its own continued action. While the living thing may easily be crushed by superior force, it none the less tries to turn the energies which act upon it into means of its own further existence. If it cannot do so, it does not just split into smaller pieces (at least in the higher forms of life), but loses its identity as a living thing. As long as it endures, it struggles to use surrounding energies in its own behalf. It uses light, air, moisture, and the material of soil. To say that it uses them is to say that it turns them into means of its own conservation. As long as it is growing, the energy it expends in thus turning the environment to account is more than compensated for by the return it gets: it grows. Understanding the word "control" in this sense, it may be said that a living being is one that subjugates and controls for its own continued activity the energies that would otherwise use it up. Life is a self-renewing process through action upon the environment.

*A History* Penguin

In *Integrity Counts*, lifelong Republican and Georgia Secretary of State Brad Raffensperger speaks out against the former president's false claims of voter fraud in the 2020 election and hopes to restore confidence and trust in our country's elections. "Brad Raffensperger put public service above party service, and for that he is a true democracy action hero, and he is also my hero. His book serves as a reminder that American democracy is bigger than any individual candidate or election." —THE HON. ARNOLD SCHWARZENEGGER, former governor of California Integrity stands as the cornerstone of American democracy. Brad Raffensperger, Georgia Secretary of State, defended American democracy by refusing to bend to demands that he change the legitimate results of the 2020 presidential election in his state. Raffensperger's defense of democracy made him a target of

President Donald Trump for months following the election, culminating in an hour-long phone call in which the president told him, "I just want to find 11,780 votes," the exact number he needed to win Georgia's sixteen Electoral College votes. Once again, Raffensperger refused. Georgia voters had spoken. A lifelong conservative Republican who had financially supported President Trump's reelection campaign and voted for Trump, Raffensperger called for a hand recount of every vote to confirm the results and affirm the integrity of Georgia's election. Still President Trump persisted in his personal attacks. One of the most troubling questions in the wake of the 2020 election, Raffensperger says, is whether America will see every candidate who loses a major election refuse to accept the results and, instead, set out to raise money and build support on unfounded claims of fraud and corruption. To avoid that prospect, Americans must come to terms with the scope of the problem, but doing so won't be comfortable for either party. Either party because the 2020 crisis was not unprecedented in Georgia. By November 2020, Raffensperger had been challenging the claims of a "stolen election" for nearly two years. In the fall of 2018, after Democrat Stacey Abrams lost the race for governor of Georgia, she told a crowd of supporters, "So, to be clear, this is not a speech of concession. Concession means to acknowledge an action is right, true, or proper. As a woman of conscience and faith, I cannot concede." The similarities don't end there, and when considered with some care, they paint a troubling picture of an all-too-bipartisan willingness to undermine the integrity of our democracy, and the public's confidence in it, for the sake of personal and partisan gain. Integrity Counts tells Raffensperger's inspiring story of commitment to the integrity of American democracy.

*Breaking Rules & Making Change in Modern Africa* The Bright Continent Breaking Rules and Making Change in Modern Africa

Big men. Big money. Big games. Big libidos. Big trouble. A decade ago, *The Bonfire of the Vanities* defined an era--and established Tom Wolfe as our prime fictional chronicler of America at its most outrageous and alive. This time the setting is Atlanta, Georgia--a racially mixed late-century boomtown full of fresh wealth, avid speculators, and worldly-wise politicians. The protagonist is Charles Croker, once a college football star, now a late-middle-aged Atlanta real-estate entrepreneur turned conglomerate king, whose expansionist ambitions and outsize ego have at last hit up against reality. Charlie has a 28,000-acre quail-shooting plantation, a young and demanding second wife--and a half-empty office tower with a staggering load of debt. When star running back Fareek Fanon--the pride of one of Atlanta's grimmest slums--is accused of raping an Atlanta blueblood's daughter, the city's delicate racial balance is shattered overnight. Networks of illegal Asian immigrants crisscrossing the continent, daily life behind bars, shady real-estate syndicates, cast-off first wives of the corporate elite, the racially charged politics of college sports--Wolfe shows us the disparate worlds of contemporary America with all the verve, wit, and insight that have made him our most phenomenal, most admired contemporary novelist. *A Man in Full* is a 1998 National Book Award Finalist for Fiction.

**A Man in Full** Penguin

Definitive proof that Africa is \*not\* a country. A lively, entertaining and informative portrait of modern Africa that pushes back against harmful stereotypes. Over a billion people have been reduced to one simple story. *Africa Is Not a Country* fills in the gaps. So often Africa is depicted

simplistically as a red landscape of safaris and famines. In this funny, insightful book Dipo Faloyin corrects this view to create a fresh and positive view of the continent. By turns intimate and political, he looks at buzzy urban life in Lagos and the lively West African rivalry over who makes the best jollof rice, before giving us the story of democracy in ten dictatorships, an insight into different regional accents and the colonial foundation of many countries which are still younger than your grandparents. We learn about the dangers of white saviours and the cultural significance of Aunties, and he provides us with a tour guide of where citizens of several African countries need to travel to visit their own cultural artefacts - 90% of which are in museums outside the continent. We immerse ourselves in the energy and fabric of many different cultures and communities as Dipo shows his deep love of the region - as a concept, as a promise and as a reality.

#### Comparative Lessons in Authority and Control Orbit

A man with no memory of his past and a struggling, blind street artist will face off against the will of the gods as the secrets of this stranger's past are revealed in the sequel to *The Hundred Thousand Kingdoms*, the debut novel of NYT bestselling author N. K. Jemisin. In the city of Shadow, beneath the World Tree, alleyways shimmer with magic and godlings live hidden among mortalkind. Oree Shoth, a blind artist, takes in a strange homeless man on an impulse. This act of kindness engulfs Oree in a nightmarish conspiracy. Someone, somehow, is murdering godlings, leaving their desecrated bodies all over the city. And Oree's guest is at the heart of it. . . . *The Inheritance Trilogy* *The Hundred Thousand Kingdoms* *The Broken Kingdoms* *The Kingdom of Gods* *The Inheritance Trilogy* (omnibus edition) *Shades in Shadow: An Inheritance Triptych* (e-only short fiction) *The Awakened Kingdom* (e-only novella) For more from N. A New York Times Book Review Editors' Choice What Saladino finds in his adventures are people with soul-deep relationships to their food. This is not the decadence or the preciousness we might associate with a word like "foodie," but a form of reverence . . . Enchanting." —Molly Young, *The New York Times* Dan Saladino's *Eating to Extinction* is the prominent broadcaster's pathbreaking tour of the world's vanishing foods and his argument for why they matter now more than ever Over the past several decades, globalization has homogenized what we eat, and done so ruthlessly. The numbers are stark: Of the roughly six thousand different plants once consumed by human beings, only nine remain major staples today. Just three of these—rice, wheat, and corn—now provide fifty percent of all our calories. Dig deeper and the trends are more worrisome still: The source of much of the world's food—seeds—is mostly in the control of just four corporations. Ninety-five percent of milk consumed in the United States comes from a single breed of cow. Half of all the world's cheese is made with bacteria or enzymes made by one company. And one in four beers drunk around the world is the product of one brewer. If it strikes you that everything is starting to taste the same wherever you are in the world, you're by no means alone. This matters: when we lose diversity and foods become endangered, we not only risk the loss of traditional foodways, but also of flavors, smells, and textures that may never be experienced again. And the consolidation of our food has other steep costs, including a lack of resilience in the face of climate change, pests, and parasites. Our food monoculture is a threat to our health—and to the planet. In *Eating to Extinction*, the

distinguished BBC food journalist Dan Saladino travels the world to experience and document our most at-risk foods before it's too late. He tells the fascinating stories of the people who continue to cultivate, forage, hunt, cook, and consume what the rest of us have forgotten or didn't even know existed. Take honey—not the familiar product sold in plastic bottles, but the wild honey gathered by the Hadza people of East Africa, whose diet consists of eight hundred different plants and animals and who communicate with birds in order to locate bees' nests. Or consider murnong—once the staple food of Aboriginal Australians, this small root vegetable with the sweet taste of coconut is undergoing a revival after nearly being driven to extinction. And in Sierra Leone, there are just a few surviving stenophylla trees, a plant species now considered crucial to the future of coffee. From an Indigenous American chef refining precolonial recipes to farmers tending Geechee red peas on the Sea Islands of Georgia, the individuals profiled in *Eating to Extinction* are essential guides to treasured foods that have endured in the face of rampant sameness and standardization. They also provide a roadmap to a food system that is healthier, more robust, and, above all, richer in flavor and meaning.

#### *The World's Rarest Foods and Why We Need to Save Them* Harvard Business Press

In this lyrical, exuberant tale, acclaimed Turkish author Elif Shafak, author of *The Island of Missing Trees* (a Reese's Book Club Pick), incarnates Rumi's timeless message of love *The Forty Rules of Love* unfolds two tantalizing parallel narratives—one contemporary and the other set in the thirteenth century, when Rumi encountered his spiritual mentor, the whirling dervish known as Shams of Tabriz—that together explore the enduring power of Rumi's work. Ella Rubenstein is forty years old and unhappily married when she takes a job as a reader for a literary agent. Her first assignment is to read and report on *Sweet Blasphemy*, a novel written by a man named Aziz Zahara. Ella is mesmerized by his tale of Shams's search for Rumi and the dervish's role in transforming the successful but unhappy cleric into a committed mystic, passionate poet, and advocate of love. She is also taken with Shams's lessons, or rules, that offer insight into an ancient philosophy based on the unity of all people and religions, and the presence of love in each and every one of us. As she reads on, she realizes that Rumi's story mirrors her own and that Zahara—like Shams—has come to set her free.

#### Love Falls On Us Abacus

From Egypt to South Africa, Nigeria to Ethiopia, a new force for political change is emerging across Africa: popular protest. Widespread urban uprisings by youth, the unemployed, trade unions, activists, writers, artists, and religious groups are challenging injustice and inequality. What is driving this new wave of protest? Is it the key to substantive political change? Drawing on interviews and in-depth analysis, Adam Branch and Zachariah Mampilly offer a penetrating assessment of contemporary African protests, situating the current popular activism within its historical and regional contexts.

#### **Merchants And Faith** Farrar, Straus and Giroux

'This book with its felicitous title brings together with great skill and sensitivity a large amount of current historical scholarship on the trade and civilization of the Indian Ocean during the Islamic centuries. It will be welcomed by both students and teachers as a fine introduction to a complex subject.'

The Passenger Pigeon's Flight to Extinction James Currey is

A Best Business Book of 2017 -- The Financial Times China is now the biggest foreign player in Africa. It's Africa's largest trade partner, the largest infrastructure financier, and the fastest-growing source of foreign direct investment. Chinese entrepreneurs are flooding into the continent, investing in long-term assets such as factories and heavy equipment. Considering Africa's difficult history of colonialism, one might suspect that China's activity there is another instance of a foreign power exploiting resources. But as author Irene Yuan Sun vividly shows in this remarkable book, it is really a story about resilient Chinese entrepreneurs building in Africa what they so recently learned to build in China--a global manufacturing powerhouse. The fact that China sees Africa not for its poverty but for its potential wealth is a striking departure from the attitude of the West, particularly that of the United States. Despite fifty years of Western aid programs, Africa still has more people living in extreme poverty than any other region in the world. Those who are serious about raising living standards across the continent know that another strategy is needed. Chinese investment gives rise to a tantalizing possibility: that Africa can industrialize in the coming generation. With a manufacturing-led transformation, Africa would be following in the footsteps of the United States in the nineteenth century, Japan in the early twentieth, and the Asian Tigers in the late twentieth. Many may consider this an old-fashioned way to develop, but as Sun argues, it's the only one that's proven to raise living standards across entire societies in a lasting way. And with every new Chinese factory boss setting up machinery and hiring African workers--and managers--that possibility becomes more real for Africa. With fascinating and moving human stories along with incisive business and economic analysis, *The Next Factory of the World* will make you rethink both China's role in the world and Africa's future in the globalized economy.

**Afro-vegan** Cengage Learning

*The Next Africa*, an Axiom Best Business Book Award winner, will change the way people think about the continent. The old narrative of an Africa disconnected from the global economy, depicted by

conflict or corruption, and heavily dependent on outside donors is fading. A wave of transformation driven by business, modernization, and a new cadre of remarkably talented Africans is thrusting the continent from the world's margins to the global mainstream. In the coming decades the magnitude of Africa's markets and rising influence of its people will intersect with other key trends to shape a new era, one in which Africa's progress finally overshadows its challenges, transforming an emerging continent into a global powerhouse. *The Next Africa* captures this story. Authors Jake Bright and Aubrey Hruby pair their collective decades of Africa experience with several years of direct research and interviews. Packed with profiles; personal stories, research and analysis, *The Next Africa* is a paradigm-shifting guide to the events, trends, and people reshaping Africa's relationship to the world. Bright and Hruby detail the cross-cutting trends prompting Silicon Valley venture capital funds and firms like GE, IBM, and Proctor & Gamble to make major investments in African economies, while describing how Africans are stimulating Milan runways, Hollywood studios, and London pop charts. *The Next Africa* introduces readers to the continent's burgeoning technology movement, rising entrepreneurs, groundbreaking philanthropists, and cultural innovators making an impact in music, fashion, and film. Bright and Hruby also connect Africa's transformation to its contemporary immigrant diaspora, illustrating how this increasingly affluent group will serve as the thread that pulls the continent's success together. Finally, *The Next Africa* suggests a fresh framework for global citizens, public policy-makers, and CEOs to approach Africa. It will no longer be "The Hopeless Continent", nor will it become an overnight utopia. Bright and Hruby offer a more nuanced, net-sum, and data-rich approach to analyzing an increasingly complex continent, reconciling its continued challenges with rapid progress. *The Next Africa* describes a future of a more globally-connected Africa where its leaders and citizens wield significant economic, cultural, and political power--a future in which Americans will be more likely to own African stocks, work for companies doing business in Africa, buy African hits from iTunes, see Nigerian actors win Oscars, and learn new African names connected to tech moguls and billionaires.
