### **Early Childhood Education Today**

Muhammadiyah University Press  
 Contextual Teaching and Learning is an examination of a holistic approach to education. The book provides its readers with a comprehensive

definition of Contextual Teaching and Learning (CTL), discussing its origins and philosophy, its basis in psychology, neuroscience, modern physics and biology. While attitudes toward education are often shaped by popular views in science, author Elaine B Johnson outlines the importance of integrating modern scientific discoveries into current education practices. Contextual Teaching and Learning: What It Is and Why It's Here to Stay stresses interdependence, differentiation, and self-organization as the principals that form CTL, as opposed to the dualism between thought and action that plagues traditional views on education. Elaine B Johnson illustrates the

relationship between brain functions, memory retention, and teaching methods, and the significance of incorporating real life examples in lesson plans.

*Handbook in Research and Evaluation*

The third, concluding volume of "Literature of Java" contains Addenda and a General Index, preceded by Illustrations, Facsimiles of Manuscripts, Maps and some Minor Notes,

additions which may be of use to students of Javanese literature. The older catalogues of collections of Indonesian manuscripts (Javanese, Malay, Sundanese, Madurese, Balinese), which were written in Dutch, did not offer such additional aids to interested readers. One of the reasons was, that the authors (Vreede, Brandes, van Ronkel, Juynboll, Berg) presupposed a certain knowledge of the Indonesian peoples, their countries and their culture with Dutch students. As often as not the latter, or their families, had lived for many years in Java, and they were destined, when they had completed their studies in The Netherlands, to pass one or more decades

of 'their active life in the tropics in the service of Government, the Christian Missions or the Bible Society. The Archipelago was their second home country. Some familiarity with things Indonesian was found in several circles of society in The Netherlands before the second world war, and information (though not always scholarly and exact) was supplied by quite a number of books and periodicals. For this reason it was thought superfluous to encumber specialistic books like catalogues of manuscripts with maps and general information which could be found easily elsewhere, for instance in the Dutch "Encyclopaedie van Nederlandsch-Indie".

As circumstances have changed it is.
