HARRISON RONNIE

The SAGE Handbook of Social Work Prentice Hall
 Supervision is currently a "hot topic" in social work. The editors of this volume, both social work educators and researchers, believe that good supervision is fundamental to the development and maintenance of effective practice in social work. Supervision is seen as a key vehicle for continuing development of professional skills, the safeguarding of competent and ethical practice and oversight of the wellbeing of the practitioner. As a consequence the demand for trained and competent supervisors has increased and a perceived gap in availability can create a call for innovation and development in supervision. This book offers a collection of chapters which contribute new insights to the field. Authors from Australia and New Zealand, where supervision inquiry is strong, offer research-informed ideas and critical commentary with a dual focus on supervision of practitioners and students. Topics include external and interprofessional supervision, retention of practitioners, practitioner resilience and innovation in student supervision. This book will be of interest to supervisors of both

practitioners and students and highly relevant to social work academics. This book was originally published as a special issue of *Australian Social Work*.

Using their proven question and answer format, the latest edition of Field Instruction retains the authors' established approach and paves the way for students to move out of the classroom and into their internships. Pragmatic suggestions and ways to troubleshoot potential problems in their practicum guide students to the successful completion of their field experience. New or expanded topics include CSWE's 2015 Competencies and Associated Behaviors, social media, electronic medical records, cultural competence, suicide, domestic violence, child and elder abuse, and professional behavior. Many new, topically relevant, suggested readings have been added throughout the text. This accessible guide begins by addressing questions about partnering with local service agencies and preparing for the first interview before it delves into juggling responsibilities and practical

problems such as assessing the needs of diverse clients. The authors integrate classroom knowledge and real-world settings by providing case examples, critical thinking questions, and exercises throughout the text. Each chapter's coverage is linked to CSWE's 2015 Competencies and Behaviors. End-of chapter practice tests gauge mastery of chapter content. These outstanding features augment students' understanding of different aspects of social work and challenge them to think about how they would react to real-life experiences in the field.

Field education is examined bearing in mind the multiple and rapidly changing contexts of social work and social welfare policies and practices, university and service organizations, and professional and legal requirements. *The Practice of Field Instruction in Social Work: Theory and Process* is an invaluable text for anyone preparing to become a field instructor, for current field instructors, and for faculty members responsible for field coordination.
