Theory and Practice of Counseling and Psychotherapy

Bloomsbury Publishing
Contemporary Theories in Counseling and Psychotherapy provides readers with a comprehensive introduction to cutting-edge therapeutic approaches that are widely revered and used, but generally not included within traditional

counseling theories textbooks. Readers learn theories that will not only keep their knowledge current in an evolving field, but also will help to improve and support the ongoing development of their personal practice. The text features contributed chapters written by scholars in the discipline that cover the following contemporary theories: contemporary psychodynamic therapy (CPT); contemporary person-centered counseling (CPCC); cognitive behavioral

therapy (CBT); integrative post-modern therapy (IPMT: narrative, solution-focused, relational-cultural); dialectical behavior therapy (DBT); acceptance and commitment therapy (ACT); motivational interviewing (MI); positive counseling; neurocounseling (including EMDR); and complementary, alternative, and integrative modalities (CAM). Each chapter presents the history of the theory, critical views of human nature, key

concepts, techniques, and an overview of the counseling process. Social and cultural issues and the efficacy of each theory are discussed. Each chapter concludes with a vignette that demonstrates a client experiencing the counseling approach, followed by questions to pique students' interest. Video demonstrations of select theories are included. A thoroughly modern and critical resource, *Contemporary Theories in Counseling and Psychotherapy* is

ideal for courses focusing on current theories of counseling and psychotherapy. It's also an excellent supplementary resource for courses on classical theory.

Incorporating the thinking, feeling, and behaving dimensions of human experience, the tenth edition of Corey's

best-selling book helps students compare and contrast the therapeutic models expressed in counseling theories. Corey introduces students to the major theories (psychoanalytic, Adlerian, existential, person-centered, Gestalt, reality, behavior, cognitive-behavior, family systems, feminist, postmodern, and integrative approaches) and demonstrates how each theory can be applied to two cases (Stan and Gwen). With his trademark style, he shows students how to apply

those theories in practice, and helps them learn to integrate the theories into an individualized counseling style.

This unique review of therapeutic theories gives students knowledge and skills for clinical practice while presenting key concepts that are

immediately and directly applicable to their lives. Thus, Theories of Counseling and Therapy: An Experiential Approach bridges the gap between complex models of counseling and psychotherapy and students' own personal experiences. Readers are introduced to key ideas and concepts in the discipline and encouraged to apply them in meaningful ways as they learn. The text introduces students to theoretical "families," since many strict boundaries between

approaches have softened in recent years. This approach helps students learn the material strategically, as it facilitates the linking of related concepts from different approaches. In addition to studying "classic" theories of counseling and therapy, students are introduced to more contemporary and cutting-edge approaches that take into account a greater diversity of needs among client populations. Additionally, students are provided with illustrative cases, stories, and

narratives from beginning practitioners, seasoned experts, and the personalities behind the theories. They will also learn about integrative and pragmatic models that take into account the importance of cultural, worldview, spirituality, and gender sensitivity within the helping professions. This thoroughly revised and updated third edition features new applications of theories to populations with particular needs, expanded information on the translation of

theoretical knowledge into practice plans and treatment goals, critical thinking exercises, and more. Both practical and personal in nature, *Theories of Counseling and Therapy* is well-suited to courses in counseling and psychotherapy theory. Jeffrey A. Kottler is one of the most prominent authors in the fields of counseling, psychotherapy, health, and education, having written over 100 books across a broad range of topics. He is a clinical professor in the

Menninger Department of Psychiatry and Behavioral Science at the Baylor College of Medicine in Houston and professor emeritus of counseling at California State University, Fullerton. He has served as a counselor, therapist, supervisor, educator, and social justice advocate in a variety of professional settings throughout his career. Marilyn J. Montgomery is a core faculty member at Capella University, where she designs and teaches counselor education

courses and provides clinical supervision to masters and doctoral-level students. She has authored and coauthored numerous books, chapters, and professional journal articles on topics related to counseling and human development. She previously served as a principle investigator on a NIAAA-funded grant assessing a theory-based counseling intervention in urban schools. Throughout her career, she has refined her theoretical perspectives by engaging in clinical

practice with children, teens, and adults. Prentice Hall This is the ideal book for readers who are just beginning their study of counseling and psychotherapy. From it they will secure a solid foundation in the major theories of counseling and psychotherapy from twenty-three authors who are experienced in the theory they discuss. Because each theory is presented using a standard format and bolstered by a running case study, readers will

also come away from this text with the cross-theory comparisons they need to decide on their own course of specialized study, and determine a personal perspective on counseling. Coverage includes Eastern theories, feminist theories, body-centered, and Rational Emotive Behavioral Theory. For anyone interested in pursuing a career in counseling and psychotherapy.
