 From New York's Empire State Building to the Eiffel Tower, Dubai's iconic Burj Al Arab hotel to London's St Pancras station, this is a glorious, full colour celebration of the world's most distinctive buildings and urban icons, recreated in LEGO bricks. Brick City is a celebration of the world's favourite buildings and urban icons, recreated solely using LEGO bricks. While to many, LEGO bricks are 'just a toy,' to an ever-growing army of fans they provide a challenging and enjoyable modelling medium. These fans, calling themselves 'AFOLs' or Adult Fans of LEGO have taken it upon themselves to recreate local landmarks using just the bricks that you find at a local store. LEGO models created by adult fans though, don't resemble those that many people created as a child. Created by masters of their medium, these fabulously detailed models may contain thousands of pieces - or perhaps just a handful. Either way, the talented artists have an intimate knowledge of every piece and colour available; skilfully choosing the ideal piece to recreate a well-known landmark. Sometimes creating a model indistinguishable from the real thing, or evoking the spirit of a building in just a few small pieces. In fact, landmarks and cityscapes - from the New York skyline to the Sagrada Familia, London's St. Pancras, and the amazing towers of Beijing and Hong Kong - have long been a source of inspiration for LEGO builders. In this book, Warren Elsmore takes us on a world tour and explores more than 12 global cities and their iconic structures. Each city is examined and recreated in LEGO form. Comprising amazing artwork, exploratory photographs, and detailed breakdowns, Brick City looks at the essence of what makes an urban landscape recognisable.

This richly illustrated book celebrates the art of the miniature, but also looks beyond it at the many aspects of "small worlds"--in particular, their capacity to evoke responses that far exceed their physical dimensions. Mack explores the talismanic, religious, or magical properties with which miniatures are often imbued. Considering a wide range of objects, he examines the use of the miniature form in various cultural contexts.

In 2009, Wabaunsee County will celebrate its 150th anniversary. Although Wabaunsee County was first created in 1855 by the Kansas territorial legislature as Richardson County, it had no county government and was attached to neighboring Shawnee County in legal jurisdiction. In 1859, the legislature renamed the county Wabaunsee, after the Potawatomi Indian chief, and in March of that year, the first election for county officers was held. The county lies in the heart of the Kansas Flint Hills, and it boasts some of the most beautiful landscapes in the state. While located only 30 miles from the state capital in Topeka, it retains its rural atmosphere, even today. The largest of its seven incorporated towns has less than 1,000 residents. The earliest settlers lived among large populations of Native Americans. During the Civil War, the Underground Railroad operated actively in the county. In 1880, the first railroad was built in the county, and the towns along its line boomed. When a second line was introduced in 1887, the county saw its greatest growth. Today residents enjoy the breathtaking beauty of the rugged Flint Hills, lush pastures, and fertile bottomland sustaining the local economy as it has for a century and a half. A large section of highway across the county has been designated the Kansas Native Stone Scenic Byway, and tourism has begun to play an increasingly larger role in the county's economy.
