Bringing Institutions Back In Kluwer Law International B.V.

This book is concerned to explore the changing role of the Parole Board across the range of its responsibilities, including the prediction of risk and deciding on the release (or continued detention) of the growing number of recalled prisoners and of those subject to indeterminate sentences. In doing so it aims to rectify the lack of attention that has been given by lawyers, academics and practitioners to back door sentencing (where the real length of a sentence is decided by those who take the decision to release) compared to front door sentencing' (decisions taken by judges or magistrates in court). Particular attention is given in this book to the important changes made to the role and working of the Parole Board as a result of the impact of the early release scheme of the Criminal Justice Act 2005, with the Parole Board now deciding in Panels concerned with determinate sentence prisoners, lifers and recalled prisoners. A wide range of significant issues, and case law, has arisen as a result of these changes, which the contributors to this book, leading authorities in the field, aim to explore.

Legal and environmental concerns related to Indian law and tribal lands remain an understudied branch of both indigenous law and environmental law. Native American tribes have a far more complex relationship with the environment than is captured by the stereotype of Indians as environmental stewards. Meaningful tribal sovereignty requires that non-Indians recognize the right of Indians to determine their own relationship to the land and the environment. But tribes do not exist in a vacuum: in fact they are deeply affected by off-reservation activities and, similarly, tribal choices often have effects on nearby communities. This book brings together diverse essays by leading Indian law scholars across the disciplines of indigenous and environmental law. The chapters reveal the difficulties encountered by Native American tribes in attempts to establish their own environmental standards within federal Indian law and environmental law structures. Gleaning new insights from a focus on tribal land and property law, the collection studies the practice of tribal sovereignty as experienced by Indians and non-Indians, with an emphasis on the development and regulatory challenges these tribes face in the wake of climate change. This volume will advance the reader's knowledge and understanding of these challenging issues.

Citizenship is often assumed to be a clear-cut issue—either one has it or one does not. However, as the contributors to *Citizenship in Question* demonstrate, citizenship is not self-evident; it emerges from often obscure written records and is interpreted through ambiguous and dynamic laws. In case studies that analyze the legal barriers to citizenship rights in over twenty countries, the contributors explore how states use evidentiary requirements to create and police citizenship, often based on fictions of racial, ethnic, class, and religious differences. Whether examining the United States' deportation of its own citizens, the selective use of DNA tests and secret results in Thailand, or laws that have stripped entire populations of citizenship, the contributors emphasize the political, psychological, and personal impact of citizenship policies. *Citizenship in Question* incites scholars to revisit long-standing political theories and debates about nationality, free movement, and immigration premised on the assumption of clear demarcations between citizens and noncitizens. Contributors. Alfred Babo, Jacqueline Bhabha, Jacqueline Field, Amanda Flaim, Sara L. Friedman, Daniel Kanstroom, Benjamin N. Lawrance, Beatrice McKenzie, Polly J. Price, Rachel E. Children's Rights from International Educational Perspectives Univ. Press of Mississippi

This book makes the legal and political case for Indigenous constitutional recognition through a constitutionally guaranteed First Nations voice, as advocated by the historic Uluru Statement from the Heart. It argues that a constitutional amendment to empower Indigenous peoples with a fairer say in laws and policies made about them and their rights, is both constitutionally congruent and politically achievable. A First Nations voice is deeply in keeping with the culture, design and philosophy of Australia's federal Constitution, as well as the long history of Indigenous advocacy for greater empowerment and self-determination in their affairs. Morris explores the historical, political, theoretical and international contexts underpinning the contemporary debate, before delving into the constitutional detail to craft a compelling case for change.

In an age of multiculturalism and identity politics, many minority groups seek some form of official recognition or public accommodation of their identity. But can public institutions accurately recognize or accommodate something as subjective and dynamic as "identity?" Avigail Eisenberg and Will Kymlicka lead a distinguished team of scholars who explore state responses to identity claims worldwide. Their case studies focus on key issues where identity is central to public policy. By illuminating both the risks and opportunities of institutional responses to diversity, this volume shows that public institutions can either enhance or distort the benefits of identity politics.

This book critically examines contemporary educational practices with a children's rights lens. Through investigating the factors that contribute to (or hinder) the realisation of children's rights in and through education in different contexts, it discusses how using a rights framework for education furthers the agenda for achieving international educational aims and goals. Using diverse international examples, the book provides a snapshot of the complexity of children's rights and education. It draws on the expertise of international research teams from Australia, England, Finland, Italy, Mexico, Poland, Portugal, Scotland, Spain, Sweden, Switzerland, and the United States, and highlights wide-ranging interpretations of the same mandate across different national contexts. Beginning with a critical overview of the broader context of children's rights in education, the book explores obligations for States and their representatives, tensions and convergences in implementation, and implications for teaching and learning. Using underutilised educational and theoretical concepts, it contributes to broadening understandings of children's rights, education and associated theoretical frameworks. Despite a human rights framework emphasising the indivisibility, interrelatedness and interconnectedness of all rights, the 'right to education' (Article 28) dominates discussions about children's rights and education. As such, equally important rights including the 'aims of education' (Article 29) are often less considered or absent from the conversation. Recognising that children's education rights involve more than just access and provision, this book advocates for a much broader understanding of the nuances underpinning children's education related rights.

Despite the tremendous progress in the development of scientific knowledge, the understanding of the causes of poverty and inequality, and the role of politics and governance in addressing modern challenges, issues such as social inclusion, poverty, marginalization and despair continue to be a reality across the world - and most often impact Indigenous Peoples. At the Margins of Globalization explores how Indigenous Peoples are affected by globalization, and the culture of individual choice without responsibility that it promotes, while addressing what can be done about it. Though international trade and investment agreements are unlikely to go away, the inclusion of Indigenous rights provisions has made a positive difference. This book explains how these provisions operate and how to build from their limited success.

Ecological restoration is as essential as sustainable development for the health of the biosphere. Restoration, however, has been a low priority of most countries' environmental laws, which tend to focus narrowly on rehabilitation of small, discrete sites rather than the more ambitious recovery of entire ecosystems and landscapes. Through critical theoretical perspectives and topical case studies, this book's diverse contributors explore a more ambitious agenda for ecological restoration law. Not only do they investigate current laws and other governance mechanisms; they also consider the philosophical and methodological bases for the law to take ecological restoration more seriously. Through exploration of themes relating to time, space, geography, semiotics, social justice, and scientific knowledge, this book offers innovative and critical insights into ecological restoration law.

This new work argues that a broad Indigenous rights framework is crucial to achieving positive change in the socio-economic disadvantage into which Indigenous Australians are born. It explains why addressing problems in Indigenous communities at a practical level needs to be done in conjunction with rights protection.

A Contemporary Evaluation Duke University Press

Constitutional law provides the legal framework for the Australian political and legal systems, and thus touches almost every aspect of Australian life. The Handbook offers a critical analysis of some of the most significant aspects of Australian constitutional arrangements, setting them against the historical, legal, political, and social contexts in which Australia's constitutional system has developed. It takes care to highlight the distinctive features of the Australian constitutional system by placing the Australian system, where possible, in global perspective. The chapters of the Handbook are arranged in seven thematically-grouped parts. The first, 'Foundations', deals with aspects of Australian history which have influenced constitutional arrangements. The second, 'Constitutional Domain', addresses the interaction between the constitution and other relevant legal systems and orders, including the common law, international law, and state constitutions. The third, 'Themes', identifies themes of special constitutional significance, including the legitimacy of the constitution, citizenship, and republicanism. The fourth, 'Practice and Process', deals with practical issues relevant to constitutional litigation, including the processes, techniques, and authority of the High Court of Australia. The final three parts deal with the structural building blocks of the Australian Constitutional system: 'Separation of Powers', 'Federalism', and the 'Protection of Rights.' Written by a team of experts drawn from academia and practice, the Handbook provides Australian and international readers alike with a reliable source of knowledge, understanding, and insight into the Australian Constitution.

This book considers how the law should manage conflicts between the right of religious freedom and that of non-discrimination on the grounds of sexual orientation. These disputes are often high-profile and frequently receive a lot of media attention and public debate. Starting from the basis that both these rights are valuable and worthy of protection, but that such disputes are often characterised by animosity, it contends that a proportionality analysis provides the best method for resolving these conflicts. The work takes a comparative approach, examining the law in England and Wales, Canada, and the USA and examines four main areas of law, considering how a proportionality approach could be used in each. The book will be an invaluable resource for students and researchers in the areas of Public Law, Human Rights Law, Law and Religion, Discrimination Law, and Comparative Law.

Written for Higher Education educators, managers and policy-makers, Plagiarism, the Internet and Student Learning combines theoretical understandings with a practical model of plagiarism and aims to explain why and how plagiarism developed. It offers a new way to conceptualize plagiarism and provides a framework for professionals dealing with plagiarism in higher education. Sutherland-Smith presents a model of plagiarism, called the plagiarism continuum, which usefully informs discussion and direction of plagiarism management in most educational settings. The model was developed from a cross-disciplinary examination of plagiarism with a particular focus on understanding how educators and students perceive and respond to issues of plagiarism. The evolution of plagiarism, from its birth in Law, to a global issue, poses challenges to international educators in diverse cultural settings. The case studies included are the voices of educators and students discussing the complexity of plagiarism in policy and practice, as well as the tensions between institutional and individual responses. A review of international studies plus qualitative empirical research on plagiarism, conducted in Australia between 2004-2006, explain why it has emerged as a major issue. The book examines current teaching approaches in light of issues surrounding plagiarism, particularly Internet plagiarism. The model affords insight into ways in which teaching and learning approaches can be enhanced to cope with the ever-changing face of plagiarism. This book challenges Higher Education educators, managers and policy-makers to examine their own beliefs and practices in managing the phenomenon of plagiarism in academic writing.

Although negotiation still lies at the heart of international commercial agreements, much of the detail has migrated to the Internet and has become part of electronic commerce. This incomparable one-volume work??now in its sixth edition??with its deeply informed emphasis on both the face-to-face and electronic components of setting up and performing an international commercial agreement, stands alone among contract drafting guides and has proven its enduring worth. Following its established highly practical format, the book's much-appreciated precise information on a wide variety of issues??including those pertaining to intellectual property, alternative dispute resolution, and regional differences??is of course still here in this new edition. There is new and updated material on such matters as the following: • the need for contract drafters to understand and to use the concepts of "standardization" (i.e., the work of the International Organization for Standardization (ISO) as a contract drafting tool); • new developments and technical progress in e-commerce; • new developments in artificial intelligence in contract drafting; • the possible use of electronic currencies such as Bitcoin as a payment device; • foreign direct investment; • special considerations inherent in drafting licensing agreements; • online dispute resolution including the innovations referred to as the "robot" arbitrator; • changes in the arbitration rules of major international organizations; and • assessment of possible future trends in international commercial arrangements. Each chapter provides numerous references to additional sources, including a large number of websites. Materials from and citations to appropriate literature in languages other than English are also included. In its recognition that a business executive entering into an international commercial transaction is mainly interested in drafting an agreement that satisfies all of the parties and that will be performed as promised, this superb guide will immeasurably assist any lawyer or business executive to plan and carry out individual transactions even when that person is not interested in a full-blown understanding of the entire landscape of international contracts. Business executives who are not lawyers will find that this book gives them the understanding and perspective necessary to work effectively with the legal experts.
