Project Kid Macmillan

Sonia Faruqi had an Ivy League degree and a job on Wall Street. But when the banking industry collapsed, she found herself on a small organic

dairy farm that would change her life for the better, although it didn't seem that way in the beginning. First, she had to come to grips with cows shocked into place, cannibal chickens, and "free range" turkeys that went nowhere. But there were bright lights as well: happy, frolicking calves on a veal farm, and farmers who cared as much about the animals as their pocketbooks. What started as a two-week volunteer vacation turned into a journey that reached into the darkest recesses of the animal agriculture industry. Surrounded by a colorful cast of characters, Faruqi's quest to discover the truth about modern agribusiness took her around the world. Lively, edgy, and balanced, *Project Animal Farm* sheds light on the international agribusiness, with the ultimate goal of improving the lives of farm animals here at home. Using her finance background to forecast the future of agriculture, Faruqi discusses the changes we need to make—using our forks and our votes.
