Selected by the Modern Library as one of the 100 best nonfiction books of all time From the Modern Library's new set of beautifully repackaged hardcover classics by Truman Capote—also available are *Breakfast at Tiffany's* and *Other Voices, Other Rooms* (in one volume), *Portraits and Observations*, and *The Complete Stories* Truman Capote's masterpiece, *In Cold Blood*, created a sensation when it was first published, serially, in *The New Yorker* in 1965. The intensively researched, atmospheric narrative of the lives of the Clutter family of Holcomb, Kansas, and of the two men, Richard Eugene Hickock and Perry Edward Smith, who brutally killed them on the night of November 15, 1959, is the seminal work of the "new journalism." Perry Smith is one of the great dark characters of American literature, full of contradictory emotions. "I thought he was a very nice gentleman," he says of Herb Clutter. "Soft-spoken. I thought so right up to the moment I cut his throat." Told in chapters that alternate between the Clutter household and the approach of Smith and Hickock in their black Chevrolet, then between the investigation of the case and the killers' flight, Capote's account is so detailed that the reader comes to feel almost like a participant in the events.

Killing Mr. Griffin Catapult

From the cofounder of VerySmartBrothas.com, and one of the most read writers on race and culture at work today, a provocative and humorous memoir-in-essays that explores the ever-shifting definitions of what it means to be Black (and male) in America For Damon Young, existing while

Black is an extreme sport. The act of possessing black skin while searching for space to breathe in America is enough to induce a ceaseless state of angst where questions such as "How should I react here, as a professional black person?" and "Will this white person's potato salad kill me?" are forever relevant. *What Doesn't Kill You Makes You Blacker* chronicles Young's efforts to survive while battling and making sense of the various neuroses his country has given him. It's a condition that's sometimes stretched to absurd limits, provoking the angst that made him question if he was any good at the "being straight" thing, as if his sexual orientation was something he could practice and get better at, like a crossover dribble move or knitting; creating the farce where, as a teen, he wished for a white person to call him a racial slur just so he could fight him and have a great story about it; and generating the surreality of watching gentrification transform his Pittsburgh neighborhood from predominantly Black to "Portlandia . . . but with Pierogies." And, at its most devastating, it provides him reason to believe that his mother would be alive today if she were white. From one of our most respected cultural observers, *What Doesn't Kill You Makes You Blacker* is a hilarious and honest debut that is both a celebration of the idiosyncrasies and distinctions of Blackness and a critique of white supremacy and how we define masculinity.

The Odyssey Little, Brown

A group biography of seven enduring and beloved games, and the story of why—and how—we play them. Checkers, backgammon, chess, and Go. Poker, Scrabble, and bridge. These seven games, ancient and modern, fascinate millions of people worldwide. In *Seven Games*, Oliver Roeder charts

their origins and historical importance, the delightful arcana of their rules, and the ways their design makes them pleasurable. Roeder introduces thrilling competitors, such as evangelical minister Marion Tinsley, who across forty years lost only three games of checkers; Shusai, the Master, the last Go champion of imperial Japan, defending tradition against “modern rationalism”; and an IBM engineer who created a backgammon program so capable at self-learning that NASA used it on the space shuttle. He delves into the history and lore of each game: backgammon boards in ancient Egypt, the Indian origins of chess, how certain shells from a particular beach in Japan make the finest white Go stones. Beyond the cultural and personal stories, Roeder explores why games, seemingly trivial pastimes, speak so deeply to the human soul. He introduces an early philosopher of games, the aptly named Bernard Suits, and visits an Oxford cosmologist who has perfected a computer that can effectively play bridge, a game as complicated as human language itself. Throughout, Roeder tells the compelling story of how humans, pursuing scientific glory and competitive advantage, have invented AI programs better than any human player, and what that means for the games—and for us. Funny, fascinating, and profound, *Seven Games* is a story of obsession, psychology, history, and how play makes us human.

How to Kill a Dragon Rodale Books

The #1 New York Times bestselling memoir of U.S. Navy Seal Chris Kyle, and the source for Clint Eastwood's blockbuster movie which was nominated for six academy awards, including best picture. From 1999 to 2009, U.S. Navy SEAL Chris Kyle recorded the most career sniper kills in United States military history. His fellow American warriors, whom he protected with deadly precision from rooftops and stealth positions during the Iraq War, called him “The Legend”; meanwhile, the enemy

feared him so much they named him al-Shaitan (“the devil”) and placed a bounty on his head. Kyle, who was tragically killed in 2013, writes honestly about the pain of war—including the deaths of two close SEAL teammates—and in moving first-person passages throughout, his wife, Taya, speaks openly about the strains of war on their family, as well as on Chris. Gripping and unforgettable, Kyle's masterful account of his extraordinary battlefield experiences ranks as one of the great war memoirs of all time.

[How Freezing Water, Extreme Altitude, and Environmental Conditioning Will Renew Our Lost Evolutionary Strength](#) Montlake Romance

A beautifully written and darkly funny journey through the world of the allergic. Like twelve million other Americans, Sandra Beasley suffers from food allergies. Her allergies—severe and lifelong—include dairy, egg, soy, beef, shrimp, pine nuts, cucumbers, cantaloupe, honeydew, mango, macadamias, pistachios, cashews, swordfish, and mustard. Add to that mold, dust, grass and tree pollen, cigarette smoke, dogs, rabbits, horses, and wool, and it's no wonder Sandra felt she had to live her life as “Allergy Girl.” When butter is deadly and eggs can make your throat swell shut, cupcakes and other treats of childhood are out of the question—and so Sandra's mother used to warn guests against a toxic, frosting-tinged kiss with “Don't kill the birthday girl!” It may seem that such a person is “not really designed to survive,” as one blunt nutritionist declared while visiting Sandra's fourth-grade class. But Sandra has not only survived, she's thrived—now an essayist, editor, and award-winning poet, she has learned to navigate a world in which danger can lurk in an unassuming corn chip. *Don't Kill the Birthday Girl* is her story. With candor, wit, and a journalist's curiosity, Sandra draws on her own experiences while covering the scientific, cultural, and sociological terrain of allergies. She explains exactly what an allergy is, describes surviving a family reunion in heart-of-Texas beef country with her vegetarian sister, delves into how being allergic has affected her romantic relationships, exposes the dark side of Benadryl, explains how parents can work with schools to protect their allergic children, and details how people with allergies should advocate for themselves in a restaurant. A compelling mix of memoir, cultural history, and science, *Don't Kill the Birthday Girl* is mandatory reading for the millions of families navigating the world of allergies—and a not-to-be-missed literary treat for the rest of us.

What Doesn't Kill Us, a New York Times bestseller, traces our evolutionary journey back to a time when survival depended on how well we adapted to the environment around us. Our ancestors crossed deserts, mountains, and oceans without even a whisper of what anyone today might consider modern technology. Those feats of endurance now seem impossible in an age where we take comfort for granted. But what if we could regain some of our lost evolutionary strength by simulating the environmental conditions of our ancestors? Investigative journalist and anthropologist Scott Carney takes up the challenge to find out: Can we hack our bodies and use the environment to stimulate our inner biology? Helping him in his search for the answers is Dutch fitness guru Wim Hof, whose ability to control his body temperature in extreme cold has sparked a whirlwind of scientific study. Carney also enlists input from an Army scientist, a world-famous surfer, the founders of an obstacle course race movement, and ordinary people who have documented how they have cured autoimmune diseases, lost weight, and reversed diabetes. In the process, he chronicles his own transformational journey as he pushes his body and mind to the edge of endurance, a quest that

culminates in a record-bending, 28-hour climb to the snowy peak of Mt. Kilimanjaro wearing nothing but a pair of running shorts and sneakers. An ambitious blend of investigative reporting and participatory journalism, *What Doesn't Kill Us* explores the true connection between the mind and the body and reveals the science that allows us to push past our perceived limitations.
