IN HIS OWN WORDS: "Mysteries haunting mankind intrigue me the most, and I like writing about them." DECODING GOD—as the name suggests, the book is about explaining the mysterious god phenomenon that prevails in our society. I've taken a simple & direct approach to explaining the god phenomenon by taking help from research work done by others. This book is written in such a way that everyone can understand it, irrespective of his or

her background in the subject. The book has been made concise so that it remains interesting to read. Furthermore, this book does not deal with the denial or acceptance of the existence of god but rather with the extent of god's influence. It is this phenomenon that I question. --- ANDY

Mysteries in History: World History Simon and Schuster
Offers accounts of mysteries and phenomena and explores a range of subject areas including research into alien interaction with humans, revelations about the nature of US and Soviet space exploration, experiments in the name of science, mysteries of the ancient world and paranormal powers.

For Centuries Mysteries Have Intrigued The Human Mind And

Remain A Secret. Need Help But Can't Find Any Solution or Even Sign of It? Don't fret, Let The Wonders of This World Be Open To You! There are many lists that claim to have contained the Seven Wonders of the World. These lists have travelled through history and have been handed over by the seekers of truth and scholars. Through these narrations we have drawn a mean result which is an agreed upon version of the list that we used today. The contents of these lists, however, tend to be distinct and separate. The seven wonders that are most widely agreed upon as being in the original list are the seven wonders of the ancient world, which was compiled by ancient Greek historians. This is a list of wonderful places that were known to the people of ancient Greece. It is therefore the natural cause that we only find these mysterious places only around the shores of Mediterranean. Of all the ancient wonders, the pyramids alone survive today. Here are some of the chapters that our e-book contains - Unexplained Mysteries - An Intriguing Journey Into History: The Pyramids Of Egypt The Hanging Gardens Of Babylon The Statue Of Zeus (Jupiter), At Olympia The Temple Of Artemis (Diana) At Ephesus. The Mausoleum At Halicarnassus Colossus Situated At Rhodes. Pharos's Lighthouse Of Alexandria.

Imagine the following scene: Eric Schliemann having to get the permission of scientists, telling them that, based on Homer's descriptions, he believes he can discover the mythical Troy. Besides laughing their hearts out, do you believe there would even be the slightest chance for Schliemann to have gotten their permission? And it is not just Troy nor just Knossos nor just the

Mycenae, most major archaeological findings in the entire world, despite the references in the ancient texts, were a complete surprise for the scientific establishment. If that establishment had full control, all those discoveries would simply never have happened. The main purpose of this book is to present evidence supporting the theory of a relatively advanced civilization during prehistory, which was however lost due to some natural catastrophe. This is mainly attempted by presenting knowledge of the ancient people which they are not justified to have had and similarities between very distant cultures which should not have existed. How advanced was that civilization? I would say somewhat more advanced than that of Europe during the 18th century AC. Secondly, but no less important, there are the following goals: *To reveal the huge danger our civilization faces from cosmic impacts and help realize how much more frequent natural catastrophes are than we think. *To shoot down the theories regarding Indo-Europeans & foreign invaders in the area of Greece, proving that the Greeks have preserved knowledge from events that happened in this area many thousand years before their time. *To show that mythology hides within itself big doses of historical truth as it describes real events, although often distorted by the human imagination. And this truth may be of great help to the work of science in the investigation of the unknown aspects of our past. *To trouble the reader on how much we really differ from men of past eras, even from other human species, contrary to the common belief that we are vastly "superior". *To arouse the reader's interest in the ancient mysteries which spread like a fog over the history of the human civilization. Science after all accepts that large-scale catastrophes

often occur while man walked the earth, so is it really unlikely for the human civilization to have had a set-back at least once in the past? On the contrary I would say, it is probably the normal thing. In a smaller scale than the one proposed here, there have been many set-backs in the human civilization, like the domination of the Romans (when the Hellenistic Age collapsed), the collapse of the Romans themselves later on, the rise of Islam, and more. The funny part is that science accepts the Indo-European theory, meaning that there was an Indo-European / Arian race which started travelling around the world during prehistoric times spreading civilization, but left no single trace behind before mysteriously disappearing. But how far is the Indo-European theory from that of a lost civilization? Not much, as one difference is the time period and the other one is the geographical area (the present theory presupposes the crossing of the ocean). So how reasonable is it for one theory to be officially adopted by science and the other to be out of the question? We are used to rejecting anything opposed to the established views, but during the course of human history all the great pioneers did exactly that: challenged the status quo.

Due to government secrecy, the public never learned of the numerous UFO incursions at strategic nuclear weapons installations where they disabled ICBM missiles and even activated their launch codes. They never heard about UFO encounters reported by police officers, civilian and military pilots and astronauts, and they were never told the real facts of the Roswell event. The volume of evidence suggesting we are not alone, and probably never have been, is overwhelming. It suggests an alien agenda to accelerate the evolution of the human race. To understand what is happening requires knowledge of what is going on today as well as the past, particularly during the biblical era. Much has been learned through the Freedom of Information Act, from whistleblowers, and government and military officials. This book connects the dots suggesting what aliens have been doing for the past several thousand years.

Shakespeare has been one of the most-cited authors since his plays were performed, and yet little attention has been paid to his views on psychic phenomena. It took another 300 years of paranormal experiences before scholars at Cambridge University helped to found the Society for Psychical Research, which brought scientific scrutiny to the area, and the UK is now a world leader in university research on this topic. This book throws new light on many historical case reports from Shakespeare's time

onwards. It identifies the core experiences that transcend time and give clues to an understanding of psychic phenomena. The book highlights Shakespeare's insights, showing how these relate to, and even amplify, the conclusions of later and on-going research. In our time of disconnectedness from nature, the book discusses neglected human experiences which represent an important part of life and which do, in fact, occur to most of us. In doing so, the book raises awareness against the emptiness of a zombie-like existence in today's society and offers a new approach to life and death, and their deeper meaning.

The Bible is easily the most influential and most quoted book in western society. It is revered so much that it is used to swear in to office the President of the United States, Supreme Court Justices, and other elected government officials. When the President and other U.S. government officials swear that they will carry out their duties with the help of the Biblical God, few if any are aware that according to scripture the Biblical God is actually a

man. He is specifically a man of war, as stated in the following scripture, "The Lord is a man of war: the Lord is his name" (Exodus 15:3). Perhaps this is a reason why the United States has been at war 93 percent of the time since its existence. The Bible has had significant historical, social, and political influences on humanity. More importantly, the Bible continues to significantly influence humanity today. A specific example is today's conflict in the Middle East between Israel and its neighbors. Israel bases its claim to the land in dispute with the argument that the God of the Bible gave them that land approximately 3,425 years ago as described in the Old Testament of the Judeo Christian bible. This book takes this same literal approach in interpreting the narrative/scripture concerning the God and events described in the same bible. A few of the many items discussed in this book concerning biblical scripture are:

- The U.S. is the modern version of Old Testament Israel
- That the Biblical God is actually a man or manlike entity
- Inferences to very advanced technology
- Inferences that Jesus of the Gospel was gay
- More than one Jesus Christ
- The second coming has already happened
- Reincarnation concerning Jesus and the prophets
- Periodic mass extinction

Misthological Models Part 5 continues the author's exploration of the nature of the outer darkness in relation to New Jerusalem. An examination of New Jerusalem in the historical past and prehistorical past is made in conjunction with theories of pre-Adamic cities to explain how Abraham could be searching for a Heavenly City that existed from before the foundation of the world. Present and future implications regarding New Jerusalem

are also explored. Discussions of the existence of both God and the City in their own spacetimes are also evaluated. Principle improvements over *The Outer Darkness* in the present book include the following: (1) the juxtaposition of a celestial outer darkness for those in celestial bodies as opposed to a terrestrial outer darkness for those in terrestrial bodies; (2) scriptural affirmation that Jesus in His glorified body can be in multiple places at one time and thus as omnipresent as He wishes to be in the fullest sense of the word; (3) inferences that the Bride can be semi-omnipresent; (4) the plausible inference that Jesus is a 7D being with a 6D Bride; (5) the speculation that the Heavenly City might be found in 5D, 4D, and 3D spacetime continuums with hierarchical degrees of access, spatiality, and temporality; (6) the pragmatic suggestion that the 3D City will be replicated; (7) a proposal as to why the gates of the replicated Celestial City correspond to terrestrial access and direction; (8) the proposition that faithful 3D mortals can become 4D immortals who assist in the commerce of the replicated 3D Cities and serve as assistant rulers over other mortals; (9) the broadening of mortals to include select Jews during the tribulation; (10) the postulation that the Bride will be able to create universes; (11) spatial and temporal visualizations for the higher degree of dimensionality for Lord and Bride; (12) a hypothesis for why the Satanic rebellion at the end of the millennium is allowed.

chance? Might the paranoid be on to something? Who really holds the levers of power? History admonishes us to be vigilant of hidden plots and nefarious agendas of governments and the powerful. Shedding light onto sometimes sinister and coercive groups, *Secret Societies: The Complete Guide to Histories, Rites, and Rituals* is packed with details on nearly 200 organizations, their histories, found members, backgrounds, and suspected conspiracies. It uncovers and examines the hidden, overlooked, and buried history of some of the most notorious groups, including the Illuminati, the Freemasons, Skull and Bones, World Bankers, the Secret Government, and extraterrestrial invaders, to name a few. Tracing the chilling and corrosive affects of powerful cliques and their plots, it exposes their deep reach into the operations of today's world. Providing gripping details, presenting the facts, and letting the reader decide, this revealing work probes the hidden agendas and agreements of secret cabals and associations. Along the way, it debunks myths and presents the evidence on an invisible world of influence and power.

In 1921, Paul Amadeus Dienach, a Swiss-Austrian teacher with fragile health, falls into a one-year-long coma. During this time, his consciousness slides into the future and enters the body of another man in 3906 A.D. When Dienach awakens from his coma, he finds himself back in 1922. Knowing that he doesn't have much time left, he writes a diary, recording whatever he could remember from his amazing experience: the mankind's history in the forthcoming centuries, from the nightmare of overpopulation and World Wars up until the world-changing globalisation, the

radical new administration system, the colony on Mars and the next human evolutionary stage. Without any close friends and relatives to entrust, he doesn't say a word to anyone out of fear of being branded a lunatic. Before he dies, he hands his diary to his favourite student, George Papachatzis, later prominent Professor of Law and Rector of Panteion University of Greece. The diary circulates as hidden knowledge amongst high ranking masons in the lodges of Athens. In 1972, professor Papachatzis, despite an intense dispute, decides to publish Dienach's diary in Greek. Paul Dienach was not an author, poet, or professional writer. Rather, he was an ordinary man who kept a journal, never with the expectation that it would be published. This unique and controversial book, a universal legacy, is now carefully edited, translated and available to everyone. This is the history of our future! We deliver it to you."

Cutting-edge thinkers on the origins of civilization, the Giza pyramids, pre-Columbian and early America, and the power of human consciousness • With contributions by David Frawley, Geoff Stray, Joscelyn Godwin, Daniel Pinchbeck, Antoine Gikal, and others • Topics range from the origins of the Inca to the architecture of the Giza plateau to unified theories of physics and consciousness • Companion volume to *Lost Knowledge of the Ancients* As we pull back the curtain from the European version of history, we discover the vast depth of knowledge of our ancient ancestors--knowledge that not only dispels our image of them as primitive peoples but also corresponds with the forefront of modern science, philosophy, and spirituality. With contributions by David Frawley, Geoff Stray, Joscelyn Godwin, Daniel Pinchbeck, Antoine Gikal, and other provocative, cutting-edge thinkers, this collection of essays commissioned by Graham Hancock, bestselling author of *Fingerprints of the Gods*, represents the latest, often controversial findings in alternative science, history, archaeology, and consciousness research. Covering topics ranging from the origins of the Inca and the secrets hidden in Vedic literature, to the architecture of the Giza pyramids and the Sphinx, to unified theories of physics and consciousness, this book shows how, by recovering our lost history, we too can experience the higher consciousness and advanced wisdom of the ancients.

History's Mysteries is an absorbing and meticulously researched exploration of the archaeology, history, and mysteries of 35 ancient places worldwide. Houghton's book takes the reader on

an unforgettable journey, from the 8,000-year-old stone circle of Nabta Playa to India's magical Taj Mahal; from Rhode Island's controversial Newport Tower to the enigmatic Royston Cave in the UK; from the strange medieval castle-village of Rennes-le-Château to the massive ancient walled city of Great Zimbabwe. Using the latest archaeological evidence, *History's Mysteries* explores: The incredible archaeological discoveries at the 11,000 year-old sanctuary of Göbekli Tepe in Turkey. The heated debate over the 47-million-year-old 'Ida Fossil'--could it be the missing link in our evolutionary history? The reality behind controversial ancient artifacts such as the Iron Pillar of Delhi, the Oak Island Treasure, and Egypt's "Dendera Lamps." What really happened to the Neanderthals? With 36 photographs and illustrations, this is the perfect reference work for those fascinated by the great mysteries of ancient history.

Aliens, ghosts, and cryptids may all fall under the category of "strange" or "unusual," but all are classified as paranormal. There are plenty of spooky and scary stories throughout history. From Abraham Lincoln's doppelganger to the mysteries of the Bermuda Triangle and even the feeling of déjà vu, there are many unexplained phenomena. Even some aspects of history itself are still a mystery, like the Antikythera mechanism found in a Greek shipwreck. This book shows readers that there is often a blurry line between fact and the paranormal, and sometimes fact is even stranger than fiction!

We Did That? The Myth of ManHidden History and the Ancient Origins of HumankindA compelling and controversial nonfiction in the tradition of Graham Hancock, Fingerprints of the Gods,

Magicians of the Gods and Forbidden Archaeology. The Myth of Man challenges modern perceptions of the origins of mankind and the rise of civilization - bringing Atlantis, giants, Bigfoot, and the worldwide flood myths back to life. History is wrong. Much of what is known about humankind and our mysterious past originates from a lot of unsubstantiated guesswork and scientific dogma which has corralled the general populace into accepting outdated notions of human origins and the rise of civilization. The Myth Of Man reveals suppressed information and hidden history which contradicts these current paradigms of thought regarding the origins and development of Man. Forbidden archaeology challenges Darwin's evolutionary model and reinforces the possibility that our species originated much further back in antiquity than is considered acceptable by the present day scientific establishment. Could some of the world's most enduring myths such as giants, Bigfoot, Atlantis and the Great Flood actually be grounded in reality contrary to modern thinking? And how do these myths fit into the larger context of human progress and evolution? What could the presence of anomalous artefacts around the world tell us about the technological capabilities of our advanced and ancient ancestors? Maybe it is time for a total reappraisal of ancient history in order to fill the blank pages of prehistory and rewrite the amazing story of humankind.Chronicles from the FutureThe Amazing Story of Paul Amadeus Dienach

Weird Trivia and Strange History Everyone loves fun trivia! Buckle up for a very odd ride through history and enjoy this trivia book full of stuff you missed in history class. *We Did That?* is a great bathroom reader gift for people who have everything. How did we

come up with that? Everyone knows about mousetraps, but did you know they were originally inspired by burglar alarms? What was so important to Samuel Hopkins that he became the first person to have a US patent? Many curious creations have been born over the centuries. In this section, author and historian Sophie Stirling dives into the curious minds of inventors and their unique (and sometimes wild) ideas throughout history. Strange beauty and fashion fads. The phrase “pain is beauty” has a very real history across the globe. Discover painful fashion trends, wooden bathing suits, breast enhancers in the shape of toilet plungers, and death-inducing cosmetics. People are willing to do anything to stay beautiful. But why would ingredients include arsenic, beetles, or “hog’s pisse”? Odd superstitions and folklore. Do you know about the centuries-old Banana Curse? The origin of the Tooth Fairy? Our weird obsession with shoes? Some strange beliefs might seem be the stuff of old wives’ tales, but many have become ingrained in our minds. You might be more superstitious than you think! *We Did That?* is an entertaining collection of odd history! In this book, you will learn about:

- Odd jobs throughout the centuries that will leave you appreciating your day job
- Curious inventions that never made it big, or that were the first versions of mainstream products today
- Interesting and sometimes gross medical cures and deathly beauty trends
- Embarrassing human bloopers and weirdness that will leave you wondering...we did that?

If you enjoyed books like *Strange History*, *The Book of Extraordinary Facts*, or *The Totally Awesome Book of Crazy Stories*, then *We Did That?* should be next on your list.

Black Holes. Dark Energy. Dark Matter. Entanglement Theory. Quantum Physics. Modern science estimates dark energy permeates roughly 68% of the universe. Dark matter makes up another 27%, leaving the "normal" matter visible to humans at less than 5% of the cosmos around us. String Theory and Membrane Theory both suggest that parallel dimensions very probably exist. Quantum Entanglement Theory shows two objects connected despite being large distances apart. What does the universe hold—and hide? Where do we come from and where are we headed? Can science explain psychic and supernatural phenomena? Exploring the collision of science, the universe and the "supernatural" unknown, *Supernatural Gods: Spiritual Mysteries, Psychic Experiences, and Scientific Truths* by Jim Willis looks at the myths, stories, history, science and facts of healing energies, psychic connections, heavenly messengers, miracles, déjà vu, dreams, out-of-body experiences, and many other psychic phenomena beyond the limits of the five senses. Surveying scientists and experts, it probes the physical existence of "gods" from other dimensions and realities. The past, present and future are investigated to glimpse at the truth of animal envoys, earth spirits, evolution, parallel universes, religious stories, mythological shape shifting superheroes, the origins of the agricultural revolution, alien visitors, dowsing, past life regression, channeling, intuition, meditation, shamanism, spiritualism, and much, much more. Also included are a helpful bibliography and an extensive index, adding to the book’s usefulness.

Over the centuries, researchers have found bones and artifacts proving that humans like us have existed for millions of years; the author argues, however, that mainstream science has suppressed these facts and that prejudices based on current scientific theory act as a "knowledge filter," giving us a picture of prehistory that is largely incorrect.
