This book compares New Testament and Rabbinical texts in order to recover the oral tradition accompanying the written Biblical text. Although New Testament Greek is a hellenistic idiom, it reflects a Semitic rather than a hellenistic culture. Therefore, Culbertson looks to Jewish sources in order to understand the Greek text, rather than to the philosophical, methodological, and literary sources of hellenistic culture. The author uses specific examples to illustrate various literary theories and to prove the value of a Listener Response Analysis of Gospel texts. A dozen parables are discussed in detail.

Annual Report Sod Seventy!The Guide to Living Well

The earliest medieval Jewish mystical writings, or kabbalah, date from the late twelfth and early thirteenth centuries. This is the first book to focus on the most prodigious group active at that time--the 'Circle of Contemplation'. The 'Circle of Contemplation' generated a mystical theology that differs radically from mainstream kabbalistic theosophy. Two of this group's penetrating speculations on God and the origins of the universe are The Book of Contemplation and The Fountain of Wisdom. A meticulous and systematic study of these writings forms the core of this book. Verman discovered that the 'Circle of Contemplation' produced a series of distinct treatises, each entitled The Book of Contemplation and attributed to the same fictitious author. These treatises, embodying one of the most intriguing puzzles of medieval literature, are included here. The author concludes that these writings were a product of thirteenth-century Spain, not France, as claimed by Gershom Scholem. His conclusion engendered a critical evaluation of the premises of Scholem's historiography of early medieval Jewish mysticism.

"In this splendid book a gifted observer and a terrific idea have come together in a real love match. In 1990, a century after the census bureau's famous observation of the frontier's imminent end, Dayton Duncan set out in an aging GMC Suburban to visit a large sampling of counties outside Alaska that have fewer than two persons per square milethe bureau's old standard for places still in a frontier condition. There are 132 such counties. All are in the West. . . . The result of his tour is an insightful and entertaining book, troubling and funny and consistently illuminating. . . . Much of the book's charm comes from Duncan's sketches of people who choose to live 'miles from nowhere'ranchers in the Nebraska sandhills, a New Mexican bar owner, a priest and United Parcel Service driver along the Texas-Mexico border, and the descendant of a Seminole Negro army scout in west Texas. In them he finds characteristics associated with the mythic frontier. . . . Great fun to read."Montana Born and

raised in a small town in Iowa, Dayton Duncan has been a reporter, humor columnist, editorial writer, chief of staff to a governor, and deputy press secretary for presidential campaigns. He lives in Walpole, New Hampshire. His books include *Out West: An American Journey*, also available in a Bison Books edition.

'If I can start to run at 50 and become the oldest British woman to complete an Ironman, everyone should realise it's never too late!' At the age of 50, Eddie Brocklesby decided to run her first half marathon. Until that point, she'd done little running, and her exercise regime consisted of little more than chauffeuring her children to their own sports clubs. In common with so many people, any interest she'd shown in sport in her childhood had diminished as her adult life progressed, with spare time becoming ever more limited in the face of work and family commitments. After that event, and following the loss of her husband of thirty years to cancer, she completed a marathon. Now, 75 years old, the past twenty years has seen Eddie take part in marathons, triathlons and Ironman races across the globe and she has accrued many medals and awards. In Irongran, Eddie looks back on her life and explains just how she's managed to develop the energy to match the enthusiasm she's always had for an active lifestyle. She shares the difficulties she's experienced in her sporting endeavours, and explains how she's managed to overcome them. Eddie is passionate about the health and wellbeing of our ageing population and provides up to date research about why keeping active in later years is so important, along with guidance about how to remain full of life in your later years.

A Word Fitly Spoken Santa Ana River Press

A comprehensive treatment of visionary experience in some of the main texts of Jewish mysticism, this book reveals the overwhelmingly visual nature of religious experience in Jewish spirituality from antiquity through the late Middle Ages. Using phenomenological and critical historical tools, Wolfson examines Jewish mystical texts from late antiquity, pre-kabbalistic sources from the tenth to the twelfth centuries, and twelfth- and thirteenth-century kabbalistic literature. His work demonstrates that the sense of sight assumes an epistemic priority in these writings, reflecting and building upon those scriptural passages that affirm the visual nature of revelatory experience. Moreover, the author reveals an androcentric eroticism in the scopic mentality of Jewish mystics, which placed the externalized and representable form, the phallus, at the center of the visual encounter. In the visionary experience, as Wolfson describes it, imagination serves a primary function, transmuting sensory data and rational concepts into symbols of those things beyond sense and reason. In this view, the experience of a vision is inseparable from the process of interpretation. Fundamentally challenging the conventional distinction between experience and exegesis, revelation and interpretation, Wolfson argues that for the mystics themselves, the study of texts occasioned a visual experience of the divine located in the imagination of the mystical interpreter. Thus he shows how Jewish mystics preserved the invisible transcendence of God without doing away with the visual dimension of belief.
