Red Wheel/Weiser

Leah Giancarelli makes balancing her new role as a single mom look easy, but she'd have crumbled if not for her late husband's best friend, Marcus. She has her issues with HORNET, an elite hostage rescue team—after all, Danny would still be alive if he'd never accompanied them on their last mission—but Marcus has always been by her side, a strong shoulder to lean on... Until, after one impulsive kiss, he's so much more. Eaten alive by guilt, Marcus takes off, leaving both HORNET and Leah behind. Alone is easier. Safer. Because his feelings for Leah are all kinds of wrong, the worst kind of betrayal, and he can't trust himself not to act on them. But Danny's death was only the beginning. Whoever hired the hitman is looking for something, and they think Leah knows where it is... In today's extensively wired world, cryptology is vital for guarding communication channels, databases, and software from intruders. Increased processing and communications speed, rapidly broadening access and multiplying storage capacity tend to make systems less secure over time, and security becomes a race against the relentless creativity of the unscrupulous. The revised and extended third edition of this classic reference work on

cryptology offers a wealth of new technical and biographical details. The book presupposes only elementary mathematical knowledge. Spiced with exciting, amusing, and sometimes personal accounts from the history of cryptology, it will interest general a broad readership.

Since the publication of *The Wretched of the Earth* in 1961, Fanon's work has been deeply significant for generations of intellectuals and activists from the 60s to the present day. *Alienation and Freedom* collects together unpublished works comprising around half of his entire output – which were previously inaccessible or thought to be lost. This book introduces audiences to a new Fanon, a more personal Fanon and one whose literary and psychiatric works, in particular, take centre stage. These writings provide new depth and complexity to our understanding of Fanon's entire oeuvre revealing more of his powerful thinking about identity, race and activism which remain remarkably prescient. Shedding new light on the work of a major 20th-century philosopher, this disruptive and moving work will shape how we look at the world.

Don't miss one of America's top 100 most-loved novels, selected by PBS's *The Great American Read*. This beloved book by E. B. White, author of *Stuart Little* and *The Trumpet of the Swan*, is a classic of children's literature that is "just about perfect." Illustrations in this ebook appear in vibrant full color on a full-color device and in rich black-and-white on all other devices. Some Pig. Humble. Radiant. These are the words in

Charlotte's Web, high up in Zuckerman's barn. Charlotte's spiderweb tells of her feelings for a little pig named Wilbur, who simply wants a friend. They also express the love of a girl named Fern, who saved Wilbur's life when he was born the runt of his litter. E. B. White's Newbery Honor Book is a tender novel of friendship, love, life, and death that will continue to be enjoyed by generations to come. It contains illustrations by Garth Williams, the acclaimed illustrator of E. B. White's *Stuart Little* and *Laura Ingalls Wilder's Little House* series, among many other books. Whether enjoyed in the classroom or for homeschooling or independent reading, *Charlotte's Web* is a proven favorite.

Ice-cold and unbreakable, Travis Quinn is the HORNET team's hard-ass. No weaknesses. Except, of course, for the accident that not only destroyed his career as a Navy SEAL, but left terrifying blanks in his memory. But Travis remembers everything about Mara Escareno—the curve of her lips, the feel of her body...and how he walked out on her suddenly six weeks ago. Mara could never resist the dangerously sexy Travis, which is probably how she ended up pregnant and disowned by her family. But before Travis can fully process the news, Mara is kidnapped by his enemies and plunged into the violent, merciless world of human trafficking. They want Travis—and the information locked within his damaged memory—no matter the cost. And now Travis's enemies have discovered his only weakness...Mara.

fascinating look at how consumers perceive logos, ads, commercials, brands, and products.”—Time How much do we know about why we buy? What truly influences our decisions in today's message-cluttered world? In *Buyology*, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can “cool” brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? *Buyology* is a fascinating and shocking journey into the mind of today's consumer that will captivate anyone who's been seduced—or turned off—by marketers' relentless attempts to win our loyalty, our money, and our minds.

*Becoming the Woman God Wants Me to Be* University of Chicago Press  
Second in the *Rifters Trilogy*, Hugo Award-winning author Peter Watts' *Maelstrom* is a terrifying explosion of cyberpunk noir. This is the way the world ends: A nuclear strike on a deep sea vent. The target was an ancient microbe—voracious enough to drive the whole biosphere to extinction—and a handful of amphibious humans called *rifters* who'd inadvertently released it from three billion years of solitary confinement. The resulting tsunami killed millions. It's not as through there

was a choice: saving the world excuses almost any degree of collateral damage. Unless, of course, you miss the target. Now North America's west coast lies in ruins. Millions of refugees rally around a mythical figure mysteriously risen from the deep sea. A world already wobbling towards collapse barely notices the spread of one more blight along its shores. And buried in the seething fast-forward jungle that use to be called Internet, something vast and inhuman reaches out to a woman with empty white eyes and machinery in her chest. A woman driven by rage, and incubating Armageddon. Her name is Lenie Clarke. She's a rifter. She's not nearly as dead as everyone thinks. And the whole damn world is collateral damage as far as she's concerned. . . . At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Human error is implicated in nearly all aviation accidents, yet most investigation and prevention programs are not designed around any theoretical framework of human error. Appropriate for all levels of expertise, the book provides the knowledge and tools required to conduct a human error analysis of accidents, regardless of operational setting (i.e. military, commercial, or general aviation). The book contains a complete description of the Human Factors Analysis and Classification System (HFACS), which incorporates James Reason's model of latent and active failures as a foundation. Widely disseminated among military and civilian organizations, HFACS encompasses all aspects of human error, including the conditions of operators and elements of supervisory

and organizational failure. It attracts a very broad readership. Specifically, the book serves as the main textbook for a course in aviation accident investigation taught by one of the authors at the University of Illinois. This book will also be used in courses designed for military safety officers and flight surgeons in the U.S. Navy, Army and the Canadian Defense Force, who currently utilize the HFACS system during aviation accident investigations. Additionally, the book has been incorporated into the popular workshop on accident analysis and prevention provided by the authors at several professional conferences worldwide. The book is also targeted for students attending Embry-Riddle Aeronautical University which has satellite campuses throughout the world and offers a course in human factors accident investigation for many of its majors. In addition, the book will be incorporated into courses offered by Transportation Safety International and the Southern California Safety Institute. Finally, this book serves as an excellent reference guide for many safety professionals and investigators already in the field.

A New York Times bestseller • One of Time Magazine's 100 Best YA Books of All Time • Winner of the Michael L. Printz Award • A Stonewall Honor Book The radiant, award-winning story of first love, family, loss, and betrayal for fans of John Green, Becky Albertalli, and Adam Silvera "Dazzling."—The New York Times Book Review "A blazing prismatic explosion of color."—Entertainment Weekly "Powerful and well-crafted . . . Stunning." —Time Magazine "We were all heading for each other on a collision course, no matter what. Maybe some people are just meant to be in the same story." At first, Jude and her twin brother are Noah and Jude; inseparable. Noah draws constantly and is falling in love with the charismatic boy next door, while daredevil Jude wears red-red lipstick, cliff-dives, and does all the talking for both of them. Years later, they are barely speaking. Something has happened to change the twins in different yet equally devastating ways . . . but then Jude meets an intriguing, irresistible boy and a mysterious new mentor. The early years are Noah's to tell; the later years are Jude's. But they each have only half the story, and if they can only find their way back to one another, they'll have a chance to remake their world. From the acclaimed author of *The Sky Is Everywhere*, this exhilarating novel will leave you breathless and teary and laughing—often all at once.

Lean Thinking was launched in the fall of 1996, just in time for the recession of

1997. It told the story of how American, European, and Japanese firms applied a simple set of principles called 'lean thinking' to survive the recession of 1991 and grow steadily in sales and profits through 1996. Even though the recession of 1997 never happened, companies were starving for information on how to make themselves leaner and more efficient. Now we are dealing with the recession of 2001 and the financial meltdown of 2002. So what happened to the exemplar firms profiled in *Lean Thinking*? In the new fully revised edition of this bestselling book those pioneering lean thinkers are brought up to date. Authors James Womack and Daniel Jones offer new guidelines for lean thinking firms and bring their groundbreaking practices to a brand new generation of companies that are looking to stay one step ahead of the competition.

With the narrative punch of Jonathan Harr's *A Civil Action* and the commitment to environmental truth-telling of Erin Brockovich, *The Fluoride Deception* documents a powerful connection between big corporations, the U.S. military, and the historic reassurances of fluoride safety provided by the nation's public health establishment. *The Fluoride Deception* reads like a thriller, but one supported by two hundred pages of source notes, years of investigative reporting, scores of scientist interviews, and archival research in places such as the newly opened files of the Manhattan Project and the Atomic Energy Commission. The book is nothing less than an exhumation of one of the great secret narratives of the industrial era: how a grim workplace poison and the most damaging environmental pollutant of the cold war was added to our drinking water and

toothpaste.

BESTSELLER A WATERSTONES POLITICS  
PAPERBACK OF THE YEAR, 2018  
*The Strange Death of Europe* is a highly personal account of a continent and culture caught in the act of suicide. Declining birth-rates, mass immigration and cultivated self-distrust and self-hatred have come together to make Europeans unable to argue for themselves and incapable of resisting their own comprehensive change as a society. This book is not only an analysis of demographic and political realities, but also an eyewitness account of a continent in self-destruct mode. It includes reporting from across the entire continent, from the places where migrants land to the places they end up, from the people who appear to welcome them in to the places which cannot accept them. Told from this first-hand perspective, and backed with impressive research and evidence, the book addresses the disappointing failure of multiculturalism, Angela Merkel's U-turn on migration, the lack of repatriation and the Western fixation on guilt. Murray travels to Berlin, Paris, Scandinavia, Lampedusa and Greece to uncover the malaise at the very heart of the European culture, and to hear the stories of those who have arrived in Europe from far away. In each chapter he also takes a step back to look at the bigger issues which lie behind a continent's death-wish, answering the question of why anyone, let alone an entire civilisation, would do this to themselves? He ends with two visions of Europe - one hopeful, one pessimistic - which paint a picture of Europe in crisis and offer a choice as to what, if anything, we can do next.

*Treasure Island* Springer Science & Business Media

This book explores French imperialism in Latin America in the nineteenth century, taking Mexico as a case study. The standard narrative of nineteenth-century imperialism in Latin America is one of US expansion and British informal influence. However, it was France, not Britain, which made the most concerted effort to counter US power through Louis-Napoléon's military intervention in Mexico, begun in 1862, which created an empire on the North American continent under the Habsburg Archduke Ferdinand Maximilian. Despite its significance to French and Latin American history, this French imperial project is invariably described as an "illusion", an "adventure" or a "mirage". This book challenges these conclusions and places the French intervention in Mexico within the context of informal empire. It analyses French and Mexican ideas about monarchy in Latin America; responses to US expansion and the development of anti-Americanism and pan-Latinism; the consolidation of Mexican conservatism; and, finally, the collaboration of some Mexican elites with French imperialism. An important dimension of the relationship between Mexico and France, explored in the book, is the transatlantic and transnational context in which it developed, where competing conceptions of Mexico and France as nations, the role of Europe and

the United States in the Americas and the idea of Latin America itself were challenged and debated.

Paul Hawken believes that the impending ecological catastrophe cannot be prevented by individuals - only big business is powerful and influential enough to reverse the present trend. In this book he sets out to show the need for a new relationship between governments and businesses, believing that their present collusion against the public is undemocratic.

It's a good thing Gabe Bristow lives and breathes the Navy SEAL credo, "the only easy day was yesterday," because today, his life is unrecognizable. When his prestigious career comes to a crashing halt, he's left with a bum leg and few prospects for employment that don't include a desk. That is, until he's offered the chance to command a

private hostage rescue team and free a wealthy American businessman from Colombian paramilitary rebels. It seems like a good deal—until he meets his new team: a drunk Cajun linguist, a boy-genius CIA threat analyst, an FBI negotiator with mob ties, a cowboy medic, and an EOD expert as volatile as the bombs he defuses. Oh, and who could forget the sexy, frustratingly impulsive Audrey Van Amee? She's determined to help rescue her brother—or drive Gabe crazy. Whichever comes first. As the death toll rises, Gabe's team of delinquents must figure out how to work together long enough to save the day. Or, at least, not get themselves killed. Because Gabe's finally found something worth living for, and God help him if he can't bring her brother back alive.
