The 2012 GCSE English results prompted significant controversy, which ultimately resulted in an application for judicial review. This report sets out the background to these events and identifies lessons to be learned. The problems with GCSE English can be traced back to the 2007-09 development phase of the qualification- in particular the turbulence which resulted from the shift away from a mostly linear to a modular system, combined with a high proportion of controlled assessment and generous marking tolerances. Exam board experts raised concerns at the time, but these were not acted upon by the regulator (the then-interim Ofqual). Further difficulties arose because of pressures from the school accountability system. The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening, with consequences for grade awarding. The current status of Ofqual, as an independent regulator accountable to Parliament, is the right one. However, the Coalition Government is bringing in

wholesale changes to GCSEs and A levels, to a tight timetable and at the same time. Ofqual must have systems in place. The Committee is also concerned that there is a rush towards separate exam systems for England, Wales and Northern Ireland, without careful reflection on what might be lost, or consensus that this is the right thing to do.

Love To Teach: Research and Resources for every classroom is an exciting book that combines the latest educational research with examples of what this can look like in the classroom. Filled with research-informed ideas to support all teachers and leaders in both Primary and Secondary this book would be great for NQTs to more experienced teachers and leaders alike. The educational research is presented in a format which is accessible, helpful and informative and will help inform educators about cutting-edge research in practical and applicable ways. The practical resources are easily adaptable and ready to be implemented in any classroom and are grounded in Kate's own classroom practice. 'Written with the same passion, reflection and drive that runs through everything Kate does, Love To Teach is a real gem. Kate explores a huge range of practical pick-up-and-use strategies rooted deeply in educational research. The book is an equal balance between thought-provoking and extremely useful. Love to Teach is a great resource for all teachers who are committed to improving their practice and increasing their impact upon the futures of the young people they teach.' -- Sarah Findlater Secondary Principal at Gems First Point

Interest in structured catalysts is steadily increasing due to the already proven, as well as potential, advantages of these catalysts. Updating the comprehensive coverage of the first edition published in 1998 with the latest science and applications, *Structured Catalysts and Reactors, Second Edition* gives detailed information on all aspects of structured catalysts and reactors, including: materials, mass transfer, selectivity, activity, and stability; catalyst preparation, design, and characterization; process development; modeling and optimization; reactor design; and operation costs and considerations. The book first examines how monolithic catalysts are used to clean exhaust gas from gasoline engines, treat industrial off-gases, burn fuels in commercial settings, and synthesize chemicals in two- and three-phase processes. It discusses configurations, microstructure, physical properties, and manufacture of ceramic and metallic monoliths before directing its focus to arranged catalysts and structured packings in terms of mass transfer. The book then explores catalytically active membranes and filters, featuring metallic membranes, permeation mechanisms, preparation and modeling, commercial membranes, and the latest applications, such as zeolitic membranes. Finally, several chapters present techniques for incorporating catalytic species into the structured catalyst support and controlling catalyst nanoporosity. This book conveys the scientific as well as economic advantages of using these unconventional catalytic techniques. With over 1500 references, tables, drawings, and photographs, as well as in-depth discussions and a new approach to catalytic processes, *Structured Catalysts and Reactors, Second Edition* is an essential reference for anyone working with or studying catalysis.

For 50 years, educator and sociologist Geoff Whitty resolutely pursued social justice through education, first as a classroom teacher and ultimately as the Director of the Institute of Education in London. The essays in this volume - written by some of the most influential authors in the sociology of education and critical policy studies - take Whitty's work as the starting point from which to examine key contemporary issues in education and the challenges to social justice that they present. Set within three themes of knowledge, policy and practice in education, the chapters tackle the issues of defining and accessing 'legitimate' knowledge, the changing nature of education policy under neoliberalism and globalization, and the reshaping of teacher workplaces and professionalism - as well as attempts to realize more emancipatory practice. Whitty's scholarship on what constitutes quality and impact in educational research is also explored. Together, the essays open a window on a life in the sociology of education, the scholarly community of which it was part, and the facets of education policy, practice and research that they continue to reveal and challenge in pursuit of social justice. They celebrate Whitty as one of the foremost sociologists of education of his generation, but also as a friend and colleague. And they highlight the continued relevance of his contribution to those seeking to promote fairer and more

The American master's first novel since *Winter's Bone* tells of a deadly dance hall fire and its impact over several generations. Alma DeGeer Dunahew, the mother of three young boys, works as the maid for a prominent citizen and his family in West Table, Missouri. Her husband is mostly absent, and, in 1929, her scandalous, beloved younger sister is one of the 42 killed in an explosion at the local dance hall. Who is to blame? Mobsters from St. Louis? The embittered local gypsies? The preacher who railed against the loose morals of the waltzing couples? Or could it have been a colossal accident? Alma thinks she knows the answer-and that its roots lie in a dangerous love affair. Her dogged pursuit of justice makes her an outcast and causes a long-standing rift with her own son. By telling her story to her grandson, she finally gains some solace-and peace for her sister. He is advised to "Tell it. Go on and tell it"-tell the story of his family's struggles, suspicions, secrets, and triumphs.

A Novel John Catt Educational

What does pleasure have to do with morality? What role, if any, should intuition have in the formation of moral theory? If something is 'simulated', can it be immoral? This accessible and wide-ranging textbook explores these questions and many more. Key ideas in the fields of normative ethics, metaethics and applied ethics are explained rigorously and systematically, with a vivid writing style that enlivens the topics with energy and wit. Individual theories are discussed in detail in the first part of the book, before these positions are applied to a wide range of contemporary situations including business ethics, sexual ethics, and the acceptability of eating animals. A wealth of real-life examples, set out with depth and care, illuminate the complexities of different ethical approaches while conveying their modern-day relevance. This concise and highly engaging resource is tailored to the Ethics components of AQA Philosophy and OCR Religious Studies, with a clear and practical layout that includes end-of-chapter summaries, key terms, and common mistakes to avoid. It should also be of practical use for those teaching Philosophy as part of the International Baccalaureate. Ethics for A-Level is of particular value to students and teachers, but Fisher and Dimmock's precise and scholarly approach will appeal to anyone seeking a rigorous and lively introduction to the challenging subject of ethics. Tailored to the Ethics components of AQA Philosophy and OCR Religious Studies.
