Unlike existing textbooks written for law students on specific subjects impacting real estate transactions, *Real Estate Law: Fundamentals for The Development Process* uses "The Development Process" as a framework for understanding how the U.S. legal system regulates, facilitates, and generally impacts real estate transactions and their outcomes. This book not only addresses the nature of specific legal issues directly relating to real estate transactions but also how those issues may best be identified and addressed in advance. This book breaks down the myriad of laws

influencing the selection, acquisition, development, financing, ownership, and management of real estate, and presents them in context. Readers of *Real Estate Law* will gain a practical understanding, from the perspective of a real property developer or real estate executive, investor, or lender, of: how to identify potential legal issues before they arise; when to involve a real estate attorney; how to select an attorney with the appropriate, relevant experience; and how to efficiently and economically engage and manage legal counsel in addressing real estate issues. Written as a graduate-level text book, *Real Estate Law* comes with

numerous useful features including a glossary of terms, chapter summaries, discussion questions, further reading, and a companion website with instructor resources. It is a resource of great value to real estate and finance professionals, both with and without law degrees, engaged in one aspect or another of real estate development and finance, who want to become more conversant in the legal issues impacting these transactions.
