Greek and Demotic Texts from the Zenon Archive Augsburg
Fortress Publishing

The Book of Enoch (also 1 Enoch) is an ancient Jewish religious work, traditionally ascribed to Enoch, the great-grandfather of Noah. It is not part of the biblical canon as used by Jews, apart from Beta Israel. It is regarded as canonical by the Ethiopian Orthodox Tewahedo Church and Eritrean Orthodox Tewahedo Church, but no other Christian group.

Principles of Conduct CreateSpace

The author's purpose for *Introduction to Old Testament Theology* is to show how different approaches to the Old Testament can be brought together into a single theology. The author develops his own distinctive approach which he calls canonical theology.

The Book of Enoch, the man from the Bible, who was taken alive to heaven and saw what human eye has not seen.

The Two Babylons; Or, the Papal Worship Proved to be the Worship of Nimrod and His Wife Suomalaisen Kirjallisuuden Seura

We cannot overestimate the importance of a thorough familiarity with the Bible. I try to lose no opportunity of urging people by every means in my power to the constant study of this wonderful Book. If through the pages that follow, I can reach still others and rouse them to read their Bibles, not at random but with a plan and purpose, I shall be indeed thankful. - Preface.

Jews, Greeks, and Barbarians Harper Collins

This comprehensive work covers many different Jewish and Christian apocalyptic texts and movements from the second century BCE through the fourth century CE. It focuses on two major themes, cosmology which studies the structure of the universe, including its religious function and eschatology, which interprets history and the future. The relevant Jewish texts and history are discussed thoroughly in their own right. The Christian material is approached in a way that shows both its continuity with Jewish tradition and its distinctiveness.

The Visio Pauli and the Gnostic Apocalypse of Paul Peeters
Publishers

This book considers the early history of Jewish-Christian relations focussing on the fallen angels.

This collection of essays honors James C. VanderKam on the occasion of his sixty-fifth birthday and twentieth year on the faculty of the University of Notre Dame. An international group of scholars—including peers specializing in Second Temple Judaism and Biblical Studies, colleagues past and present, and former students—offers essays that interact in various ways with ideas and themes important in VanderKam's own work. The collection is divided into five sections spanning two volumes. The first volume includes essays on the Hebrew Bible and ancient Near East along with studies on Qumran and the Dead Sea Scrolls. Essays in the second volume address topics in early Judaism, Enoch traditions and Jubilees, and the New Testament and early Christianity.

In *Ancient Cosmologies* (1975) nine eminent scholars seek to answer the question, what was the shape of the universe to the ancient Egyptians, Babylonians, Jews, Indians, Chinese, Arabs, Greeks and Norsemen? How did they see the visible heavens as well as the other hidden worlds of the dead, gods and demons?

3 Enoch Or the Hebrew Book of Enoch BRILL

This is the second edition of a 1979 commentary on the book of Daniel. The commentary is completely revised, and the introduction in particular is here much extended and addresses fundamental questions regarding the book of Daniel and the apocalyptic movement it inaugurates (with 1 Enoch). Daniel is an indispensable trove and reference about issues like the apocalyptic vision of world's periodized history, the notion of Son of Man, messianism without a messiah, the belief in resurrection, the kingdom of God, the centrifugal spread of divine revelation, and the positive role of the Jewish diaspora. This edition is meant for scholars, college and university researchers, and students of the Bible (of the Old Testament and New Testament) in general.

*New Developments in Lipid-Protein Interactions and Receptor
Function* Fortress Press

A NATO Advanced Study Institute on "New Developments in Lipid-Protein Interactions and Receptor Function" was held on the Island of Spetsai, Greece, from August 16-27, 1992. This Institute was organized to bring together researchers in the field of membrane organization and dynamics with those actively involved in studies on receptor function, signal transduction mechanisms and gene regulation. 2 Presentations and discussions focussed on the regulation of intracellular Ca⁺-levels, on the second messengers derived from inositol lipids and on the specific phospholipase C isozymes involved in these processes. A major focus was on G-proteins and the effect of lipid anchors on their function. These principles of regulation were further discussed in the context of receptors for acetylcholine, lysophosphatidic acid and low-density lipoproteins. In addition, various aspects of the genomic regulation of cell growth and differentiation by transcription factors were presented. These topics were put into perspective by discussing the most recent developments in lipid-protein interactions, protein insertion into membranes, membrane lipid organization and lipid dynamics as mediated by phospholipid transfer proteins. This book presents the content of the major lectures and a selection of the most relevant of the most important topics posters. These proceedings offer a comprehensive account presented during the course of the Institute. The book is intended to make these proceedings accessible to a large audience.

Unmasking the Powers BRILL

One of the most important apocryphic works of the Second Temple Period is *Enoch*. According to the biblical narrative (Genesis 5:21-24), Enoch lived only 365 years (far less than the other patriarchs in the period before the Flood). Enoch "walked

with God; then he was no more for God took him." The original language of most of this work was, in all likelihood, Aramaic (an early Semitic language). Although the original version was lost in antiquity, portions of a Greek translation were discovered in Egypt and quotations were known from the Church Fathers. The discovery of the texts from Qumran Cave 4 has finally provided parts of the Aramaic original. In the fragment exhibited here, humankind is called on to observe how unchanging nature follows God's will. *The Book of Enoch* is a pseudoepigraphal work (a work that claims to be by a biblical character). *The Book of Enoch* was not included in either the Hebrew or most Christian biblical canons, but could have been considered a sacred text by the sectarians. The original Aramaic version was lost until the Dead Sea fragments were discovered. English Translation of *Enoch* (Hanokh) 4Q201 (En ara) Courtesy of the Israel Antiquities Authority Ena I ii:12. ...But you have changed your works, 13. [and have not done according to his command, and transgressed against him; (and have spoken) haughty and harsh words, with your impure mouths, 14. [against his majesty, for your heart is hard]. You will have no peace. Ena I iii:13. [They (the leaders) and all ... of them took for themselves] 14. wives from all that they chose and [they began to cohabit with them and to defile themselves with them]; 15. and to teach them sorcery and [spells and the cutting of roots; and to acquaint them with herbs.] 16. Winemaking as a form of food preservation is as old as civilization. Wine has been an integral component of people's daily diet since its discovery and has also played an important role in the development of society, religion, and culture. We are currently drinking the best wines ever produced. We are able to do this because of our increased understanding of grape growing, biochemistry and microbiology of fermentation, our use of advanced technology in production, and our ability to measure the various major and minor components that comprise this fascinating beverage. Historically, winemakers succeeded with slow but gradual improvements brought about by combinations of folklore, observation, and luck. However, they also had monumental failures resulting in the necessity to dispose of wine or convert it into distilled spirits or vinegar. It was assumed that

even the most marginally drinkable wines could be marketed. This is not the case for modern producers. The costs of grapes, the technology used in production, oak barrels, corks, bottling equipment, etc., have increased dramatically and continue to rise. Consumers are now accustomed to supplies of inexpensive and high-quality varietals and blends; they continue to demand better. Modern winemakers now rely on basic science and the systematic application of their art to produce products pleasing to the increasingly knowledgeable consumer base that enjoys wine as part of its civilized society.

What are the most popular names of the Ambo people in Namibia? Why do so many Ambos have Finnish first names? What do the African names of these people mean? Why is the

namesake so important in Ambo culture? How did the long independence struggle affect personal naming, and what are the latest name-giving trends in Namibia? This study analyses the changes in the personal naming system of the Ambo people in Namibia over the last 120 years, starting from the year 1883 when the first Ambos received biblical and European names at

baptism. The central factors in this process were the German and South African colonisation and European missionary work on the one hand, and the rise of African nationalism on the other hand. Eventually, this clash between African and European naming practices led to a new and dynamic naming system which includes elements of both African and European origin.
