This is the first tutorial to cover all of these App Inventor database and file features. App Inventor 2:App Inventor 2 Databases And Files Step By Step Tinydb ...Creating a Custom TinyWebDB Service (App Inventor 2) TinyWebDB is an App Inventor component that allows you to store data persistently in a database on the web. Because the data is stored on the web instead of a particular phone, TinyWebDB can be used to facilitate communication between phones and apps (e.g., multi-player games).Custom TinyWebDB (App Inventor 2)You can set it to any App Inventor compliant web service, that is, any site that has been setup especially for use with

App Inventor and TinyWebDB. By default, TinyWebDB stores data at `appinvtinywebdb.apps.pot.com`. Be careful, though, as this web database is shared amongst all App Inventor programmers.Web Databases - AppinventorA database is a place where information or data can be stored until it is removed or replaced. Facebook uses a database to store usernames and corresponding passwords. Android devices have internal databases that store information about you or your phone. App Inventor allows us to access this database through the use of TinyDB.App Inventor 2 ConceptsThis app is a simple app that uses

the CloudDB component to store data in the cloud, and allows multiple users of the app to communicate over multiple devices. Go to [ai2.appinventor.mit.edu](http://ai2.appinventor.mit.edu) and start a new project. In the Designer, add the following components:
