 “Rocks. Goats. Dry shrubs. Buffaloes. Thorns. A fallen tamarind tree.” Such were the sights that greeted David Shulman on his arrival in the South Indian state of Andhra Pradesh in the spring of 2006. An expert on South Indian languages and cultures, Shulman knew the region well, but from the moment he arrived for this seven-month sojourn he actively soaked up such simple aspects of his surroundings, determined to attend to the rich texture of daily life—choosing to be at the same time scholar and tourist, wanderer and wonderer. Lyrical, sensual, and introspective, Spring, Heat, Rains is Shulman’s diary of that experience. Evocative reflections on daily events—from explorations of crumbling temples to battles with ineradicable bugs to joyous dinners with friends—are organically interwoven with considerations of the ancient poetry and myths that remain such an inextricable part of life in contemporary India. With Shulman as our guide, we meet

singers and poets, washermen and betel-nut vendors, modern literati and ancient gods and goddesses. We marvel at the “golden electrocution” that is the taste of a mango fresh from the tree. And we plunge into the searing heat of an Indian summer, so oppressive and inescapable that when the monsoon arrives to banish the heat with sheets of rain, we understand why, year after year, it is celebrated as a miracle. An unabashedly personal account from a scholar whose deep knowledge has never obscured his joy in discovery, Spring, Heat, Rains is a passionate act of sharing, an unforgettable gift for anyone who has ever dreamed of India.

 In recent years, India has made impressive strides in increasing literacy rates and in enabling access to education. The country now seems well set to provide universal and good quality basic education. Yet, behind this otherwise rosy picture lie serious concerns relating primarily to gender and equity. /-/-/This volume provides an insightful understanding of the ground realities of primary education programmes, particularly those run by the District Primary Education Programme (DPEP). Combining secondary research with field studies conducted in six states, the contributors explore gender and social equity issues in primary education. They conclude that there is a subtle

but nevertheless discernible 'hierarchy of access' to education, which has resulted in new forms of segregation in primary schools.

The book discusses the socio-cultural-historical, occupational, educational, employment and discriminatory status of one of the most neglected and marginalised communities: the de-notified tribes or ex-criminal tribes of Telangana and Andhra Pradesh. Based on primary data collected from 14 communities in 11 districts in these states, it discusses the current state of affairs concerning de-notified tribes. There is no accurate and comprehensive information available on the present socio-economic status of these communities, either in the literature or with government agencies. This book provides valuable information on how they are faring in post-independence India since their de-notification from the Criminal Tribes Act, 1871.

This book provides analysis of a variety of biblical narratives and texts which are the vehicle for the expression, articulation and performance of diverse identities in the Indian context and is the first attempt to do so for a global audience of scholars and students. From pan-Indian social problems attributed to caste, class and gender inequality, to specific North Eastern tribal settings, Dalit struggles in rural Andhra Pradesh and the experience of Christian autorickshaw drivers in urban Chennai, the book explores the diverse geographical, cultural, social, economic and linguistic settings in which the Bible is encountered. The holistic and multidisciplinary approach to Biblical studies adopted broadens the field beyond textual exegesis. Encounters with the Bible are revealed in diverse chapters impacted by contexts of caste realities, the history of Indian Christianity, colonial and post-colonial frameworks and educational institutions. Full use is made of 'vernacular' texts and traditions including oral and written cultural, folk tale, literary and auto/biographical narratives in Tribal, Dalit and British colonial settings. Diversity of method is championed through including sociological analysis of Indian social realities, qualitative fieldwork techniques and a kaleidoscope of visual and sensory environments with over 30 photographs. The book celebrates and promotes diversity in Indian biblical studies, creativity and sometimes conflicting perspectives. Encountering Diversity in Indian Biblical Studies will be of interest to students, scholars and researchers working on post-colonial biblical studies and diversity in Christianity, particularly in the Indian context.

Ethnobotany and Medicinal Plants of Indian Subcontinent Rowman & Littlefield Publishers Early anthropological evidence for plant use as medicine is 60,000 years old as reported from the Neanderthal grave in Iraq. The importance of plants as medicine is further supported by archeological evidence from Asia and the Middle East. Today, around 1.4 billion people in South Asia alone have no access to modern health care, and rely instead on traditional medicine to alleviate various symptoms. On a global basis, approximately 50 to 80 thousand plant species are used either natively or as pharmaceutical derivatives for life-threatening conditions that include diabetes, hypertension and cancers. As the demand for plant-based medicine rises, there is an unmet need to investigate the quality, safety and efficacy of these herbals by the "scientific methods". Current research on drug discovery from medicinal plants involves a multifaceted approach combining botanical, phytochemical, analytical, and molecular techniques. For instance, high throughput robotic screens have been developed by industry; it is now possible to carry out 50,000 tests per day in the search for compounds, which act on a key enzyme or a subset of

receptors. This and other bioassays thus offer hope that one may eventually identify compounds for treating a variety of diseases or conditions. However, drug development from natural products is not without its problems. Frequent challenges encountered include the procurement of raw materials, the selection and implementation of appropriate high-throughput bioassays, and the scaling-up of preparative procedures. Research scientists should therefore arm themselves with the right tools and knowledge in order to harness the vast potentials of plant-based therapeutics. The main objective of Plant and Human Health is to serve as a comprehensive guide for this endeavor. Volume 1 highlights how humans from specific areas or cultures use indigenous plants. Despite technological developments, herbal drugs still occupy a preferential place in a majority of the population in the third world and have slowly taken roots as alternative medicine in the West. The integration of modern science with traditional uses of herbal drugs is important for our understanding of this ethnobotanical relationship. Volume 2 deals with the phytochemical and molecular characterization of herbal medicine. Specifically, it focuess on the secondary metabolic compounds, which afford protection against diseases. Lastly, Volume 3 discusses the physiological mechanisms by which the active ingredients of medicinal plants serve to improve human health. Together this three-volume collection intends to bridge the gap for herbalists, traditional and modern medical practitioners, and students and researchers in botany and horticulture.

Electrifying India Springer

Throughout the 20th century, electricity was considered to be the primary vehicle of modernity, as well as its quintessential symbol. In India, electrification was central to how early nationalists and planners conceptualized Indian development, and huge sums were spent on the project from then until now. Yet despite all this, sixty-five years after independence nearly 400 million Indians have no access to electricity. *Electrifying India* explores the political and historical puzzle of uneven development in India's vital electricity sector. In some states, nearly all citizens have access to electricity, while in others fewer than half of households have reliable electricity. To help explain this variation, this book offers both a regional and a historical perspective on the politics of electrification of India as it unfolded in New Delhi and three Indian states: Maharashtra, Odisha, and Andhra Pradesh. In those parts of the countryside that were successfully electrified in the decades after independence, the gains were due to neither nationalist idealism nor merely technocratic plans, but rather to the rising political influence and pressure of rural constituencies. In looking at variation in how public utilities expanded over a long period of time, this book argues that the earlier period of an advancing state apparatus from the 1950s to the 1980s conditioned in important ways the manner of the state's retreat during market reforms from the 1990s onward.

Police Killings and Rural Violence in Andhra Pradesh Archers & Elevators Publishing House For one hundred and forty years, *The Statesman's Yearbook* has been relied upon to provide accurate and comprehensive information on the current political, economic and social status of every country in the world. The appointment of the new editor - only the seventh in the book's history - brought enhancements to the 1998-99 edition and these have been continued since then. The 2004 edition is fully updated and contains more information than ever before. In an endlessly changing world, the annual publication of *The Statesman's Yearbook* gives all the information you need in one easily digestible single volume. It will save hours of research and cross-referencing between different sources, and it is an essential annual purchase. *Politics, Ethics and Emotions in 'New India'* Oxford University Press

This book is a comprehensive history of city planning in post-independence India. It explores how the nature and orientation of city planning have evolved in India's changing sociopolitical context over the past hundred or so years. The book situates India's experience within a historical framework in order to illustrate continuities and disjunctions between the pre- and post-independent Indian laws, policies, and programs for city planning and development. It focuses on the development, scope, and significance of professional planning work in the midst of rapid economic transition, migration, social disparity, and environmental degradation. The volume also highlights the need for inclusive planning processes that can provide clean air, water, and community spaces to large, diverse, and fast growing communities. Detailed and insightful, this volume will be of interest to researchers and students of public administration, civil engineering, architecture, geography, economics, and sociology. It will also be useful for policy makers and professionals working in the areas of town and country planning.

This book revisits South Indian Christian communities that were studied in 1959 and written about in *Village Christians and Hindu Culture* (1968). In 1959 the future of these village congregations was uncertain. Would they grow through conversions or slowly dissolve into the larger Hindu society around them? John Carman and Chilkuri Vasantha Rao s carefully gathered research fifty years later reveals both the decline of many older congregations and the surprising emergence of new Pentecostal and Baptist churches that emphasize the healing power of Christ. Significantly, the new congregations largely cut across caste lines, including both high castes and outcastes (Dalits). Carman and Vasantha Rao pay particular attention to the social, political, and religious environment of these Indian village Christians, including their adaptation of indigenous Hindu practices into their Christian faith and observances.

These two volumes make a comprehensive and analytic anthropological study of 63 major primitive tribes of India in an alphabetical order. Attention has been paid to the significant aspects of the identity of the primitive tribes. These are mainly statutory positions, surnames, tribe s ethnic identity, distribution of population, family and clan, language and literacy, life cycle and related customs, dress, ornaments, food habits , traditional occupations, religious beliefs, festivals, social change and mobility. These volumes will be useful for bureaucrats, planners, anthropologists, teachers and students in India and abroad. The material on these primitive tribes has deep bearing on micro-study gathered from the writings of the reputed academicians. The Bibliography with regard to these volumes is fairly comprehensive. An effort has been made not to leave any old and new publication without giving it proper recognition in these tribes. Columnist, author and political commentator, Aakar Patel has long been a close observer of the political scenario. In *Price of the Modi Years*, he seeks to explain the data and facts on India's performance under Narendra Modi. Modi's predecessor, Manmohan Singh, had once said that Modi would be a disaster as prime minister. This book shows how. It concedes Modi's popularity; this is an accounting of the damage he has wrought. It is the history of India since 2014, assessing the damage across the polity from the economy, national security, federalism, foreign relations, legislations and the judiciary to media and civil society. Our memories are not long, news cycles are transient and incidents are forgotten or misclassified as being only episodic, unless documented, unified and placed together as a record. And, therefore, this book-a history of these

present times.

The Independent Evaluation Group (IEG) of the World Bank has undertaken impact evaluations of the Bank's support to irrigation in Andhra Pradesh, India (under AP Irrigation II and III), and of the U.K. Department for International Development supported Rural Livelihoods Project (RLP). This is one of a series of IEG impact evaluations (see appendix H). IEG's program of impact evaluation is in part carried out under a Department for International Development-IEG partnership agreement; hence the focus on RLP. However, survey villages are also covered by the Bank supported DPIIP project, so that the findings are also relevant to this project.

After decades of imperfect secularism, presided over by an often corrupt Congress establishment, Nehru's diverse republic has yielded to Hindu nationalism. India is collapsing under the weight of its own contradictions. Since 2014, the ruling BJP has unleashed forces that are irreversibly transforming the country. Indian democracy, honed over decades, is now the chief enabler of Hindu extremism. Bigotry has been ennobled as a healthy form of self-assertion, and anti-Muslim vitriol has deluged the mainstream, with religious minorities living in terror of a vengeful majority.

Congress now mimics Modi; other parties pray for a miracle. In this blistering critique of India from Indira Gandhi to the present, Komireddi lays bare the cowardly concessions to the Hindu right, convenient distortions of India's past and demeaning bribes to minorities that led to Modi's decisive electoral victory. If secularists fail to reclaim the republic from Hindu nationalists, Komireddi argues, India will become Pakistan by another name.

How do emotions mobilise in politics? How do they frame ideologies? Broadly focusing on these questions, this book explains the role emotions play in Indian politics and the part they played in the aftermath of the 2019 general elections. It traces the consolidation of the Right in India and highlights the reasons for its electoral successes with a focus on the interplay between ethics and emotions such as fear, anxiety, guilt, shame, anger, hatred, betrayal, and violence. At the same time, it traces the changing dynamic in the way we think about politics and analyses the failure of liberal democratic institutions to make space for emotions in politics and political motivations. An accessible and essential guide to understanding contemporary India, this book will be of great interest to scholars and researchers of politics, especially governance and political theory, as well as South Asian studies.
