LOGAN GABRIELLE

A Journal of Shipbuilding, Marine Engineering, Dock, Harbours & Shipping

Xlibris Corporation
Sea Trial brings the
reader along on a very
detailed odyssey

ranging from the
authors days as a
merchant marine cadet
at a state maritime
academy in the early
sixties to his more-
than-a-quarter century
of service with the US
Coast Guard both on
board the ship and in
the marine safety
program. Written by a
licensed merchant

marine engineer, the point of view of this book is one that is rarely seen: someone speaking from the deck plates in the boiler room rather than the traditional view from the bridge. The book details various voyages, safety inspections, casualties, fires, repairs, oil spills, and sea trials that occurred during that time. It is a look at the work of hundreds of Coast Guard sailors and Marine Inspection personnel whose story rarely, if ever, gets told.

Engineering and Contract Record ... Fox Chapel Publishing
Contains a selection of major decisions of the GAO. A digest of all decisions has been issued since Oct. 1989 as: United States. General Accounting

Office. Digests of decisions of the Comptroller General of the United States. Before Oct. 1989, digests of unpublished decisions were issued with various titles. The Journal of Industry and Trade Causey Enterprises, LLC British Opencast Coal is an illustrated history of coal mining by surface methods from 1942 to 1985. Written by Keith Haddock, a leading authority on the subject, this book details the origins of the industry and documents the types of earthmoving machines employed during the first 40 years. The book highlights the importance of surface coal mining operations and site restoration and their necessity for the British economy. Meticulously

researched, the facts, figures and data covered are taken from Keith's extensive collection of magazine articles, newspaper cuttings and manufacturers' machine brochures and specifications. They are also drawn from publications by the National Coal Board Opencast Executive and Keith's own research conducted on numerous site visits. The sites included represent a cross section of geologically different locations in England, Scotland and Wales, and those employing the most interesting variety of earthmoving machines, such as Maesgwyn in South Wales, Newman Spinney in Derbyshire, Radar North in Northumberland and Ox-Bow in

Yorkshire. The book's 364 historical photographs, many taken for the National Coal Board or British Coal Opencast, provide a nostalgic look at obsolete earthmoving and heavy construction equipment, and form an excellent historical resource for the student, researcher or enthusiast.

Sea Trial Causey Enterprises, LLC
Contains current information on hovercraft and hydrofoils.

 "This colossal
 reference book
 documents the
 timeless urge to
 reshape the world, and
 the machines used to
 do so from the 1088's
 to today. From utility
 tractors and loaders up
 to the largest diggers
 and bulldozers, every
 piece of heavy
 equipment is listed
 here by model and
 manufacturer, making
 this the most
 exhaustive book on the
 world's most hard-
 working vehicles and
 machines"--Publisher's
 description.
