" Do you have digestion problems due to stress? Do you have problems with authority? How many alcoholic drinks do

you consume a week? Would you rather be a florist or a truck driver? These are the questions that decide who has what it takes to live at South Pole Station, a place with an average temperature of -54°F and no sunlight for six months a year. Cooper Gosling is adrift at thirty, unmoored by a family tragedy and floundering in her career as a painter. So she applies to the National Science Foundation Artists & Writers Program and flees to Antarctica -- the bottom of the Earth -- where she encounters a group of misfits motivated by desires as ambiguous as her own. There's Pearl, the cook whose Carrot Mushroom Loaf becomes means toward her Machiavellian ambitions; the oxymoronic Sal (he is an attractive astrophysicist); and Tucker, the only gay black man on

the continent who, as station manager, casts a watchful eye on all. The only thing they have in common is the conviction that they don't belong anywhere else. Enter Frank Pavano -- a climatologist with unorthodox beliefs. His presence will rattle this already unbalanced community, bringing Cooper and the Polies to the center of a global controversy and threatening the 800-million-year-old ice chip they call home. In the tradition of *And Then We Came to the End* and *Where'd You Go Bernadette?*, South Pole Station is a warmhearted comedy of errors set in the world's harshest place. "--  
*Priestley's Progress* W. W. Norton & Company  
Frustrated by his experiences on an expedition led by Captain Robert Scott,

explorer Ernest Shackleton, in 1907, launched his own attempt to reach the South Pole. At the mercy of a hostile continent it was to become the most extreme test of endurance imaginable. This is his thrilling account of that expedition.

World Whiskey Mireille Pavane

Sir Ernest Shackleton could never have imagined his name being closely associated with whisky, certainly not in the title of a book. Rarely did he consume strong drink. On his expeditions, he tolerated a 'mild spree' at times of celebration. But that was all. Drinking to excess appalled him. From an early age, growing up in a teetotal home, he was wary of alcohol. How, then, must he have felt about signing an order for twenty-five cases of whisky —

300 bottles — for his 1907–09 British Antarctic Expedition? Shackleton's Whisky follows the story of the Rare Old Highland Whisky taken south on his Nimrod expedition. It celebrates the extraordinary achievements of men exploring an extraordinary place. It dips into the human-interest stories of polar life in the 'heroic era' of Antarctic exploration. Shackleton once wrote of his interest in documenting 'the little incidents that go to make up the sum of the day's work, the humour and the weariness, the inside view of men on an expedition'. Here is one such account, based largely on what he wrote and said about the expedition and also on what the members of his expedition wrote, for most participants kept a diary or journal. Antarctic exploration and whisky, in their

own way, are both steeped in history, maturity, endurance, character, and technology. Both have a worldwide following, millions of fans. Their pathways coincided on the British Antarctic Expedition 1907-09. With the recovery 100 years later of three cases of Scotch from icy entombment under the hut at Cape Royds and the subsequent return of three bottles to Scotland for sampling, analysis and a near-magical replication, the relationship of whisky and Antarctic exploration came sharply into focus, making a unique odyssey to the end of the Earth and back.

By the #1 New York Times bestselling author of Killers of the Flower Moon, a powerful true story of adventure and obsession in the Antarctic, lavishly illustrated with color photographs Henry Worsley was a devoted husband and father and a decorated British special forces officer who believed in honor and sacrifice. He was also a man obsessed. He spent his life idolizing Ernest Shackleton, the nineteenth-century polar explorer, who tried to become the first person to reach the South Pole, and later sought to cross Antarctica on foot. Shackleton never completed his

journeys, but he repeatedly rescued his men from certain death, and emerged as one of the greatest leaders in history. Worsley felt an overpowering connection to those expeditions. He was related to one of Shackleton's men, Frank Worsley, and spent a fortune collecting artifacts from their epic treks across the continent. He modeled his military command on Shackleton's legendary skills and was determined to measure his own powers of endurance against them. He would succeed where Shackleton had failed, in the most brutal landscape in the world. In 2008, Worsley set out across Antarctica with two other descendants of Shackleton's crew, battling the freezing, desolate landscape, life-threatening physical exhaustion, and hidden crevasses. Yet

when he returned home he felt compelled to go back. On November 13, 2015, at age 55, Worsley bid farewell to his family and embarked on his most perilous quest: to walk across Antarctica alone. David Grann tells Worsley's remarkable story with the intensity and power that have led him to be called "simply the best narrative nonfiction writer working today." Illustrated with more than fifty stunning photographs from Worsley's and Shackleton's journeys, *The White Darkness* is both a gorgeous keepsake volume and a spellbinding story of courage, love, and a man pushing himself to the extremes of human capacity.

Shackleton's Whisky A Spirit of Discovery: Ernest Shackleton's 1907 Antarctic Expedition, and the Rare Malt Whisky He Left Behind Go beyond the glass and discover the secrets behind your favorite style of whiskey. Over the past three decades, Lew Bryson has been one of the most influential voices in whiskey—a longtime editor of Whisky Advocate and author of the definitive guide Tasting Whiskey. In this book, Lew shares everything he's learned on his journey through the

worlds of bourbon, Scotch, rye, Japanese whiskey, and more (yes, there are tasty Canadian and Irish whiskeys as well!). In this book, you'll find it all: An overview of the different types of whiskeys, including the rules and identities of each. He also includes information on craft whiskeys, which tend to be more creative and freewheeling than the styles made by traditional producers. Exploration of the key whiskey ingredients, with a close look at the flavor contributions of malt, peat, corn, rye, wheat—even water matters. Distillation for non-distillers and the beauty of barrels: Whiskey is both an art and a science, and what's in the glass is affected by things like pot stills vs. column stills, barrel char, and of course, time. Numerous interviews with master distillers, still makers, and other

artisans at the top of their field. Tasting notes throughout so you can identify the whiskeys you might want to try next. Every chapter contains a variety of unique, often behind-the-scenes photography. And with whiskey as the subject, this is a class where you'll want to do the homework!

"Whenua Hou Codfish Island, largest of Rakiura's satellite islands, is best known as a wildlife sanctuary, with kākāpō, the critically endangered parrot, centre stage. But the Foveaux Strait island has an even greater claim to fame - as the first foothold of bicultural Aotearoa New Zealand 200 years ago. From the early 1800s, European sealers and their Māori wives were raising families on the island,

which the sealers knew as Codfish. It gained another name as a result of the mixed-race settlement: Whenua Hou, New Land"--Inside front flap.

Cold Courage relates back to Willy Mitchell's grandfathers meeting with Harry McNish in Wellington, New Zealand and in exchange for a hot meal and a pint or two, he told his story of The Endurance. Flipping through the London Times, McNish had come across a classified advertisement for the crew to join a ship's journey to the Antarctic and on to the South Pole. It warned of low wages and high danger and at forty, he decided that he wanted a taste of adventure and set off to London to meet the rest of the newly recruited crew. On

6th August 1914, The Endurance set sail from Plymouth, England on its way to Buenos Aires, Argentina and meet with the entire 28-man crew. This is a tale of the great age of exploration and the extraordinary journey that these men endured, not only in Antarctica but upon their return to England amidst the Great War and their legendary lives thereafter. This is the story of Harry McNish and although set in a different era, continues the ARGUS series and a homage to those brave men and women who go to extraordinary lengths to achieve their goals.

The gripping biography of one of New Zealand's most distinguished farmers, entrepreneurs and aviation heroes.

When Sir Tim Wallis's Spitfire crashed at Wanaka airfield in 1996, his accident was reported around the world. This lion-hearted Central Otago man, a legendary figure in the aviation, deer farming and business worlds, was suddenly fighting for his life. Sir Tim Wallis is known as the helicopter pilot and entrepreneur who pioneered New Zealand's deer industry. A multi-millionaire, he is also the man behind the successful Warbirds Over Wanaka air pageant. For decades he's had a passion for collecting, restoring and flying vintage fighter planes. Tim's adventurous life story is told here by writer Neville Peat, who shares his great love of the South: Fiordland, South Westland, Central Otago and the Southern Alps. Hurricane Tim is an absorbing account of the adventures of

Tim Wallis that equally extends to faraway places where he applied his business instincts - southern Siberia, tropical Vanuatu and Canada. After Sir Tim's 1996 crash, he was given just a slim chance of survival. But survive he did. With astounding determination he has learned to speak and walk again, albeit slowly. Undoubtedly Tim inspires all who meet him; his story is equally inspiring. What drove this extraordinary character to live at the edge throughout his life? Author Neville Peat draws us into the hurricane that is Sir Tim Wallis.

It's been called the greatest survival story of all time. In 1916, Ernest Shackleton's ship the Endurance was trapped in pack ice, his supplies running were out, his men were exhausted, cold

and desperate. Shackleton faced a horrible quandary: should he and the crew stay on a tiny inhospitable stretch of Antarctic island with the winter setting in or make what was almost certainly a doomed journey, sailing in a lifeboat across miles of the world's wildest ocean and then trekking over unmapped glaciers to reach help? Showing astonishing courage Shackleton and a small band of men set off in their boat. They faced monstrous seas, icebergs, storms and vile seasickness. Even more astonishingly, they survived. In 2013, explorer Tim Jarvis and a crew of five, set out to replicate Shackleton's journey, using the same equipment, eating the same unpalatable food, facing the same hostile ocean and desolate conditions. Here for the first time is the

whole story of that trip, the wretched lows and the occasional highs, the gruelling mental and physical toughness it takes to test yourself in one of the last wildernesses on Earth. Moving between the past and the present, and combining a thrilling survival story with over 200 beautiful contemporary and historical photographs, this is a must-read book for all Shackleton fans and lovers of epic adventure.

—Brad Meltzer, bestselling author of *The First Conspiracy: The Secret Plot to Kill George Washington* Based on the author's exhaustive research, the incredible true story of the Greely Expedition, one of the most harrowing adventures in the annals of polar exploration. In July 1881, Lt. A.W. Greely and his crew of 24 scientists and explorers were bound for the last region unmarked on global maps. Their goal:

Farthest North. What would follow was one of the most extraordinary and terrible voyages ever made. Greely and his men confronted every possible challenge—vicious wolves, sub-zero temperatures, and months of total darkness—as they set about exploring one of the most remote, unrelenting environments on the planet. In May 1882, they broke the 300-year-old record, and returned to camp to eagerly await the resupply ship scheduled to return at the end of the year. Only nothing came. 250 miles south, a wall of ice prevented any rescue from reaching them. Provisions thinned and a second winter descended. Back home, Greely’s wife worked tirelessly against government resistance to rally a rescue mission. Months passed, and Greely

made a drastic choice: he and his men loaded the remaining provisions and tools onto their five small boats, and pushed off into the treacherous waters. After just two weeks, dangerous floes surrounded them. Now new dangers awaited: insanity, threats of mutiny, and cannibalism. As food dwindled and the men weakened, Greely's expedition clung desperately to life. *Labyrinth of Ice* tells the true story of the heroic lives and deaths of these voyagers hell-bent on fame and fortune—at any cost—and how their journey changed the world.

**In Shackleton's Footsteps** Penguin Random House New Zealand Limited  
This book, written by Scottish explorer and biologist James Marr, documents the last Antarctic expedition of Sir Ernest Henry Shackleton. The expedition,

known as the "Shackleton-Rowe Expedition," set out from England on September 24, 1921 with several members of the crew from the *Endurance Expedition* joining Shackleton on his last journey south. Upon reaching South Georgia, Shackleton died of a heart attack in the early morning of January 5, 1922, and he was buried on the island at the wishes of his wife. The expedition continued on, but was called back to England by financier, John Rowett, and the expedition was not greatly publicized.

*The Endurance Expedition* Hodder & Stoughton

The harrowing tale of British explorer Ernest Shackleton's 1914 attempt to reach the South Pole, one of the greatest adventure stories of the modern age. In

August 1914, polar explorer Ernest Shackleton boarded the Endurance and set sail for Antarctica, where he planned to cross the last uncharted continent on foot. In January 1915, after battling its way through a thousand miles of pack ice and only a day's sail short of its destination, the Endurance became locked in an island of ice. Thus began the legendary ordeal of Shackleton and his crew of twenty-seven men. When their ship was finally crushed between two ice floes, they attempted a near-impossible journey over 850 miles of the South Atlantic's heaviest seas to the closest outpost of civilization. In *Endurance*, the definitive account of Ernest Shackleton's fateful trip, Alfred Lansing brilliantly narrates the harrowing and miraculous voyage that has defined

heroism for the modern age.

*The Story of the Quest She Writes Press* Shackleton's Forgotten Expedition is the story of Ernest Shackleton's epic journey

toward the South Pole. Lacking funds and plagued by hunger, cruel weather, and unpredictable terrain, Shackleton and his party accomplished some of the most remarkable feats in the history of exploration. Not only were members of the expedition the first to climb the active volcano Mount Erebus and the first to reach the South Magnetic Pole, but Shackleton himself led a party of four that trudged hundreds of miles across uncharted wastelands and up to the terrible Antarctic Plateau to plant the Union Jack only ninety-seven miles from the South Pole itself. Based on extensive research and first-hand accounts Riffenburgh makes the expedition vivid while providing fascinating insight into the age of British exploration and Empire. Beau Riffenburgh is a historian

specializing in exploration. A native of California, he earned his doctorate at the Scott Polar Research Institute, University of Cambridge, where he is currently the editor of Polar Record. He is the author of the critically praised The Myth of the Explorer and editor of the Encyclopedia of the Antarctic. Time magazine dubbed him 'The Dr. Kinsey of the penguin world.' Lance Richdale grew up in New Zealand's Wanganui district. He took a tertiary course in agriculture in New South Wales in Australia before he returned to New Zealand to teach mainly in rural schools for several years, eventually taking a position as an inspiring agricultural

instructor and nature teacher. On weekends, holidays, and evenings, Richdale undertook major, meticulous, and time-consuming research on penguins, albatrosses, and several petrel species. His study of the muttonbird was achieved during prolonged solo camps on tiny Whero Island in stormy Foveaux Strait, where the winds blew straight from Antarctica.

"Frances Brody writes marvelous British mysteries, and if you haven't met the wonderful Kate Shackleton, *Death at the Seaside* is the perfect place to start this terrific series! Whether you are already a Brody fan or new to the Kate Shackleton series, *Death at the Seaside* is a mystery you just plain can't miss!" —Charles

Todd, bestselling author of the Ian Rutledge Mysteries and the Bess Crawford Mysteries Frances Brody returns with an intricate, absorbing plot while capturing the atmosphere and language of 1920s England in the eighth book of her cozy mystery series. Nothing ever happens in August, and tenacious sleuth Kate Shackleton deserves a break. Heading off for a long-overdue holiday to Whitby, she visits her school friend Alma who works as a fortune teller there. Kate had been looking forward to a relaxing seaside sojourn, but upon arrival discovers that Alma's daughter Felicity has disappeared, leaving her mother a note and the pawn ticket for their only asset: a watch-guard. What makes this more intriguing is the jeweler who advanced Felicity the thirty shillings

is Jack Phillips, Alma's current gentleman friend. Kate can't help but become involved, and goes to the jeweller's shop to get some answers. When she makes a horrifying discovery in the back room, it becomes clear that her services are needed. Met by a wall of silence by town officials, keen to maintain Whitby's idyllic façade, it's up to Kate - ably assisted by Jim Sykes and Mrs Sugden - to discover the truth behind Felicity's disappearance. And they say nothing happens in August...

#### Death at the Seaside Penguin

The Imperial Trans-Antarctic Expedition was perhaps the most ambitious, elaborate and confident of all the British attempts to master the South Pole. Like the others it ended in disaster, with the Endeavour first trapped and then

crushed to pieces in the ice and its crew trapped in the Antarctic, seemingly doomed to a slow and horrible death. In the face of extraordinary odds, Shackleton, the expedition's leader, decided on the only course that might just save them: a 700 nautical mile voyage in a small boat across the ferocious Southern Ocean in the forelorn hope of reaching the only human habitation within range: a small whaling station on the rugged, ice-sheeted island of South Georgia. South tells the story both of the whole astonishing expedition and of Shackleton's journey to rescue his men - one of the greatest feats of navigation ever recorded.

The definitive story of the British

adventurers who survived the trenches of World War I and went on to risk their lives climbing Mount Everest. On June 6, 1924, two men set out from a camp perched at 23,000 feet on an ice ledge just below the lip of Everest's North Col. George Mallory, thirty-seven, was Britain's finest climber. Sandy Irvine was a twenty-two-year-old Oxford scholar with little previous mountaineering experience. Neither of them returned. Drawing on more than a decade of prodigious research, bestselling author and explorer Wade Davis vividly re-

creates the heroic efforts of Mallory and his fellow climbers, setting their significant achievements in sweeping historical context: from Britain's nineteenth-century imperial ambitions to the war that shaped Mallory's generation. There was a country broken, and the Everest expeditions emerged as a powerful symbol of national redemption and hope. In Davis's rich exploration, he creates a timeless portrait of these remarkable men and their extraordinary times.
