Independent Projects, Step by Step
Rowman & Littlefield

As new media mature, the changes they
bring to writing in college are many and
suggest implications not only for the tools
of writing, but also for the contexts,
personae, and conventions of writing. An
especially visible change has been the
increase of visual elements-from
typographic flexibility to the easy use and
manipulation of color and images. Another
would be in the scenes of writing-web
sites, presentation "slides," email, online

conferencing and coursework, even help files, all reflect non-traditional venues that new media have brought to writing. By one logic, we must reconsider traditional views even of what counts as writing; a database, for example, could be a new form of written work. The authors of *Writing New Media* bring these ideas and the changes they imply for writing instruction to the audience of rhetoric/composition scholars. Their aim is to expand the college writing teacher's understanding of new media and to help teachers prepare students to write effectively with new media beyond the classroom. Each chapter in the volume includes a lengthy discussion of rhetorical and technological background, and then follows with classroom-tested assignments from the authors' own teaching.

* Diagnostic tests to determine students' level of knowledge
* Defined learning goals and objectives
* Seminar descriptions
* Established grading criteria
* Useful outside resources
Six courses make up the interdisciplinary curriculum: The North American Indian, American Indian History, American Indian Law and Federal Policy, American Indian Religion and Philosophy, American Indian Literature, and the History of American Indian Education. Tackling the College Paper CRC Press

This is a book to help social work, psychology, counseling and other human service students and professionals improve their writing. It is written without the use of complicated grammatical terms or complex rules that often confuse and discourage writers. Because it is written specifically for the human services, it contains chapters with examples on writing student papers, client reports, psychosocial histories, evaluations, professional papers, research reports, papers for mass audiences, requests for funding, letters to the editor, the use of the Internet in helping clients, the privacy

rules of HIPAA, and the many other uses of writing by professionals. The book contains an easy-to-use chapter on the rules and application of APA Style and explains, in simple terms, when certain punctuation marks are needed and why the choice of certain words may give incorrect or vague meaning.

Best Practices for Curricular Planning and Instruction Prentice Hall Press

The premise that writing is a socially-situated act of interaction between readers and writers is well established. This volume first, corroborates this premise by citing pertinent evidence, through the analysis of written texts and interactive writing contexts, and from educational settings across different cultures from which we have scant evidence. Secondly, all chapters, though addressing the social nature of writing,

propose a variety of perspectives, making the volume multidisciplinary in nature. Finally, this volume accounts for the diversity of the research perspectives each chapter proposes by situating the plurality of terminological issues and methodologies into a more integrative framework. Thus a coherent overall framework is created within which different research strands (i.e., the sociocognitive, sociolinguistic research, composition work, genre analysis) and pedagogical practices developed on L1 and L2 writing can be situated and acquire meaning. This volume will be of particular interest to researchers in the areas of language and literacy education in L1 and L2, applied linguists interested in school, and academic contexts of writing, teacher educators and graduate students working in the fields of L1 and L2 writing.

Why They Can't Write Corwin Press
Spotlighting the challenges and realities faced by linguistically diverse immigrant and resident students in U.S. secondary schools and in their transitions from high school to community colleges and universities, this book looks at programs, interventions, and other factors that help or hinder them as they make this move. Chapters from teachers and scholars working in a variety of contexts build rich understandings of how high school literacy contexts, policies such as the proposed DREAM Act and the Common Core State Standards, bridge programs like Upward Bound, and curricula redesign in first-year college composition courses designed to recognize increasing linguistic diversity of student populations, affect the success of this growing population of students as they move from high school into higher education.

The introducers' passionate, provocative, and personal engagements with the spirituality and the language of the text make the Bible come alive as a stunning work of literature and remind us of its overwhelming contemporary relevance.

Volume V of *The Handbook of Research in Middle Level Education* highlights action research in middle grades education. As a method of inquiry, action research compels educators to take action and think reflectively about those actions in order to effect positive educational change (Mills, 2000). Teachers, administrators,

university professors, and other professionals conduct action research in different ways to examine classroom practices and school issues. Educational action researchers initiate their inquiries in various contexts: alone, in small peer teams, or larger faculty groups (Zeichner, 2001). Using individual and collaborative

approaches, educators gain insights into teaching and learning processes. As evidenced throughout this volume, action research in the middle grades occurs in a variety of configurations. This volume examines the dynamic ways that preservice and inservice teachers, school administrators, university faculty, and educational consortia use action research.
