Rise of the Modern West SAGE
Remarkable developments have taken place in the domain of political theory in the present age of liberalisation and globalisation. The concept of the nation-state has undergone a major change on account of the irresistible erosion of sovereignty in the internal and external spheres and the emergence of the model of a transnational state. Different models of state may be seen in the countries of the Third World. It has put a question mark on the future of the nation-state. The basic tenets of liberalism have been challenged by Neo-liberalism and Communitarianism with the result that now it is on the retreat. In the post-World War II period, the New Fabians had revised the tenets of Fabianism, but in the post-Cold War era it has been replaced by the Third Way. The pluralists had attacked the classical theory of sovereignty, but the neo-pluralists have given a new shape to it. The theme of political legitimacy has been revisited. The old concept of citizenship requires to be reinterpreted

in the contexts of civic republicanism, multi-culturalism and identity politics. It has happened with other themes as well which may be taken note of in the emergence of new topics like Neo-colonialism, Post-colonialism, Post-communism and the like. The task of a political scientist is to comprehend and critically describe the underlying principles of political behaviour in their empirical as well as normative dimensions. Inter-disciplinary focus has become so popular now that the implications of the themes of various social sciences have penetrated into the domain of each other. The discipline of political science has become a study of 'power' and of 'struggle' for its sake at any level -- local, regional, national and international. In the light of these salient features, university courses have been modernised, and the author has done well to cover them in this work so as to adequately meet the requirements of students offering this course at the degree and postgraduate levels and of candidates preparing for competitive examinations.

In this book, we explore the many shades and nuances of his towering and unique persona. The wisdom and skill with which he has managed his whole life is astonishing, and worth the time spent in appreciating and understanding it. Sri Ram teaches us to respect and obey our Guru and parents, love our brothers and reach out to our friends and well-wishers (indeed, all of society) selflessly. His is the rare (indeed, the only one of its kind) personality that will even risk his life to keep a promise, and to protect those who have approached him for shelter. Humble, sensible and far-sighted, Sri Ram abides by his duties and the call of truth and righteousness his entire life and continues to captivate, charm and guide us by the near-divine judiciousness and perfection of his many-layered nature.

A Comprehensive History of Assam Themes in Politics

Do places influence human behavior? In everyday thinking, spaces and places are generally seen as empty vessels where human activity occurs. Digging a bit deeper, we can distinguish spaces from places: places are spaces that have meanings attached -- an empty room becomes a classroom or a bedroom depending on what people do in it. Focusing on the Japanese concept *ba* -- usually translated as 'place' -- these studies recognize that places imbued with social meaning influence human behavior. *Ba* takes into account the social context, the norms that dictate behavior, the mood of a place, and the individual's feelings about it. Conceptualized as *ba*, places limit and direct what we can do, and in the process, shape who we are. Drawing from a wide array of ethnographic studies, this collection illustrates various ways in which place and human agency co-emerge.
