This objective narration, set off in italicized type, describes the different positions of the sun in the sky during one day. There are six main characters in The Waves, and each character serves as a first-person narrator. Through soliloquies, each character takes a turn directly speaking to the reader, revealing his or her own thoughts about events and characters in the story.The Waves Study Guide | Course HeroTrough. Lowest point of a transverse wave or the weakest compressional/longitudinal wave. Amplitude. Measure of the energy a wave carries. One-half the distance between a crest and a trough of a transverse wave. Frequency. Number of waves that pass a given point in one second; measured in waves per second, or hertz (Hz) Erosion. Process that wears away surface materials and moves them from one place to another by agent such as gravity, glaciers, wind and water.Study Guide Answers - Waves Flashcards | QuizletWaves Unit Study Guide KEY 4 Each picture below shows a ray of light interacting with a different surface. One surface is a shiny metal, one surface is clear plastic, and one surface is painted black. 36. E-Study Guide | FIMM

Wave is defined as the movement of any periodic motion like a spring, a pendulum, a water wave, an electric wave, a sound wave, a light wave, etc.

A wave with constant amplitude. Any periodic wave that has amplitude varied with time, phase sinusoidally can be expressed mathematically as $R(t, \theta) = R \sin(\omega t + \theta)$
