Leading for Instructional Improvement John Wiley & Sons

Leading for Instructional Improvement Educational experts agree that quality teaching is the single most important factor in improving educational outcomes for all students. Teaching is a highly sophisticated and complex endeavor requiring deep expertise on the part of teachers and school leaders. This book shows how teacher, school, and district leaders can cultivate the expertise of teachers to deliver high quality instruction for all students. *Leading for Instructional Improvement* captures the nationally acclaimed work conducted by the Center for Educational Leadership at the University of Washington in its effort to improve the quality of teaching and leadership in schools across the country. The book provides extensive practical guidance grounded in theory and research, along with powerful stories and examples from classrooms, schools, and districts. Many of the tools, protocols, and

frameworks contained in this book can be accessed electronically by visiting the Center for Educational Leadership website at www.k-12leadership.org. Praise for *Leading for Instructional Improvement* "This book offers insights that are invaluable to educators who seek to enhance teacher effectiveness now. The ideas presented are practical and applicable to schools in a variety of settings." —PEDRO A. NOGUERA, Ph.D., Peter L. Agnew Professor of Education, Steinhardt School of Culture, Education and Development and executive director, Metropolitan Center for Urban Education "A deep and thoughtful look at how the issue of expertise is cultivated. Seizing upon their Center's research-based instructional framework, the authors provide important insights and tools." —DR. BEVERLY HALL, superintendent, Atlanta Public Schools "In this age of intense focus on how we evaluate teachers, we have to remember that any evaluation is only as good as the evaluator. This extremely useful book provides an excellent roadmap for how principals can become

more effective in the most important aspect of their work, instructional leadership." —JERRY D. WEAST, Ed.D., superintendent of schools, Montgomery County Public Schools, Maryland

"Fink and Markholt offer practitioners a guide to effective teaching. *Leading for Instructional Improvement* asks us to heed the lessons within and support the kind of teacher education that will improve student achievement for today's schools and those of tomorrow." —BARNETT BERRY, president, Center for Teaching Quality

Moral Development in Couple Therapy Oxford University Press

The idea for this book came while I was observing a student teacher and a master teacher. I realized that most student teachers while in training do not have the opportunity to think creatively about their lessons. I also noticed that teachers new to the field of teaching suffer the same fate; they are too busy trying to survive the day and are not sure how to plan and organize their teaching. Lesson plans are one of the most important tools for a teacher and more important for the novice

teacher. I believe that during student teaching or during their undergraduate years, if students were equipped with this book their first year teaching will not look so first year. Imagine an undergraduate class filled with soon to be Social Studies teachers discussing these selected lesson plans, improving upon them and making them their own. Most first year teachers over teach or under teach and both types still miss the marks on the standardized test. These lesson plans will give the new teacher a place to begin.

Planning Sterling Publishing Company, Inc. *Assessing Expressive Learning* is the only book in the art education field to date to propose and support a research-supported teacher-

directed authentic assessment model for evaluating K-12 studio art, and to offer practical information on how to implement the model. This practical text for developing visual arts assessment for grades 1-12 is based on and supported by the results of a year-long research effort primarily sponsored by the National Endowment for the Arts, involving 70 art teachers and 1,500 students in 12 school districts in Florida, Indiana, and Illinois. The purpose of the study was to demonstrate that creative artwork by K-12 students can be empirically assessed using quantitative measures that are consistent with the philosophical assumptions of authentic learning and with the means and ends of art, and that these measures can reliably assess student art growth. A further goal was to provide a rationale for the assessment of student art as an essential part of the K-12 instructional program and to encourage art teachers to take responsibility for and assume a leadership role in the assessment of art learning in the school and the school district. *Assessing Expressive*

Learning: *reports on current assessment methods but also stresses a time-tested portfolio assessment process that can be used or adapted for use in any K-12 art classroom; *includes the assessment instruments used in the study and several case studies of art teachers using electronic portfolios of student work, a bibliography of major art assessment efforts, and a critical review of current methods; *is designed to be teacher- and system-friendly, unlike many other art assessment publications that provide only a review of information on assessment; and *both documents an experiment where artistic values and aesthetic issues were considered paramount in the education of K-12 students in the visual arts, and also serves as a guide for the conduct of similar experiments by art teachers in the nation's schools--the research methodology and results are reported in an appendix in a format that will enable educational researchers to duplicate the study. This volume is ideal as a text for upper-division undergraduate and graduate classes in visual arts education assessment, and highly

relevant for college art education professors, researchers, and school district personnel involved in the education and supervision of art teachers, and researchers interested in performance measurement.

Instructional theory describes a variety of methods of instruction (different ways of facilitating human learning and development) and when to use--and not use--each of those methods. It is about how to help people learn better. This volume provides a concise summary of a broad

sampling of new methods of instruction currently under development, helps show the interrelationships among these diverse theories, and highlights current issues and trends in instructional design. It is a sequel to *Instructional-Design Theories and Models: An Overview of Their Current Status*, which provided a "snapshot in time" of the status of instructional theory in the early 1980s. Dramatic changes in the nature of instructional theory have occurred since then, partly in response to advances in knowledge about the human brain and learning theory, partly due to shifts in educational philosophies and beliefs, and partly in response to advances in information technologies. These changes have made new methods of instruction not only possible, but also necessary in order to take advantage of new instructional capabilities offered by the new technologies. These changes are so dramatic that many argue they constitute a new paradigm of instruction, which requires a new paradigm of instructional theory. In short, there is a clear need for this Volume

II of *Instructional Design Theories and Models*. To attain the broad sampling of methods and theories it presents, and to make this book more useful for practitioners as well as graduate students interested in education and training, this volume contains twice as many chapters, but each half as long as the ones in Volume I, and the descriptions are generally less technical. Several unique features are provided by the editor to help readers understand and compare the theories in this book: *Chapter 1, which discusses the characteristics of instructional theory and the nature of the new paradigm of instruction, helps the reader identify commonalities across the theories. *Chapter forewords, which summarize the major elements of the instructional-design theories, are useful for reviewing and comparing theories, as well as for previewing a theory to decide if it is of interest, and for developing a general schema that will make it easier to understand. *Editor's notes provide additional help in understanding and comparing the theories and the new paradigm of

instruction to which they belong. *Units 2 and 4 have introductory chapters to help readers analyze and understand the theories in those units. This is an essential book for anyone interested in exploring new approaches to fostering human learning and development and thinking creatively about ways to best meet the needs of learners in all kinds of learning contexts. Readers are invited to use Dr. Charles Reigeluth's Web site to comment and to view others' comments about the instructional design theories in this book, as well as other theories. In too many districts, evaluation of teachers ensures competence but does little or nothing to encourage and support

expertise. In this thought-provoking and groundbreaking book, Tony Frontier and Paul Mielke address this issue head-on, combining the conceptual and the practical by offering a compelling vision of teacher growth, along with nearly three dozen step-by-step protocols for working with teachers. They present a powerful rationale for reconceptualizing teacher evaluation by creating a balanced system of three equally important components: * Reliable and valid evaluation. * Empowering and focused supervision. * Meaningful and purposeful reflection. Each component is discussed in terms of its purpose, premise, processes, practices, and payoffs. Revealing examples based on the authors' experiences in classrooms across the country show what evaluation, supervision, and reflection look like when they're not done well--and what they could look like if done more effectively. Providing insight and inspiration, Making Teachers Better, Not Bitter paves a clear path to better teaching and helps you acknowledge and support the hard work that

teachers do every day to make learning come alive for their students.
