 Critical Approaches to
 Heritage for Development
 This is a comprehensive
 study and erudite
 description of the struggle
 of African Indigenous
 Knowledge Systems in an
 Age of Globalization,
 using in particular eighty-
 four children's traditional

games in south-eastern
 Zimbabwe. The book is an
 informative and
 interesting
 anthropological account of
 rare African children's
 games at the risk of
 disappearing under
 globalization. The virtue
 of the book does not only
 lie in its modest
 philosophical questioning
 of those knowledge forms
 that consider themselves
 as superior to others, but
 in its laudable, healthy
 appreciation of the
 creative art forms of
 traditional literature that
 features in genres such as
 endangered children's
 traditional games. The
 book is a clarion call to
 Africans and the world

beyond to come to the
 rescue of relegated and
 marginalized African
 creativity in the interest of
 future generations.

 African Books Collective
 This book investigates the
 relationship between
 heritage and development

from the global visions articulated by UNESCO and the Sustainable Development Goals (SDGs) to local activism, livelihood innovations and political strategies employed in diverse countries of the Global South. In recent years, as culturally informed approaches to international development have become increasingly important, engaging with heritage has been seen as a way to draw on practices and meanings from the past to help build future development. This book gathers researchers and practitioners from across disciplines to address important themes such as health, the environment, sustainability, peace, security, tourism and economic growth. In doing

so, the book asks us to consider whose past and whose future is ultimately at stake in efforts to use heritage for development. Key topics explored include histories and legacies of colonialism and calls for decolonisation, and related questions of expertise, ownership and agency. Students, practitioners and researchers from across the broad areas of history, heritage, education, archaeology, geography and development studies will find this book an invaluable guide to dynamic and contested understandings of heritage and development and the relationship between them.
