"Raines masterfully blends the latest empirical research on workplace conflict with practical knowledge, skills, and tools to effectively manage and prevent a wide range of conflict episodes. This is a highly applicable 'top shelf book' that will assist anyone from the aspiring manager to top level management and leadership in the public, private, and nonprofit sectors. It will also be a fast favorite of professors,

trainers, and students of business and conflict management." - Brian Polkinghorn, Distinguished Professor, Center for Conflict Resolution, Salisbury University. "With her broad dispute resolution, teaching, and editing experience, Susan Raines is uniquely qualified to organize what is known about conflict management in the workplace. She has succeeded in providing private, public, and nonprofit managers with accessible concepts and tools to deal effectively with the internal and external conflicts they must confront every day. Essential reading for all managers!" - Alan E. Gross, senior director, training coordinator, New York Peace Institute "After reading an advance copy of Raine's impressive book, I can't wait to begin to

use it as a seminal text in my classes in organizational conflict. I am amazed at her ability to cover so well such disparate subjects as systems design, public policy disputes, small and large group processes, customer conflicts, conflicts in a unionized environment, and conflicts within regulatory contexts. Her user-friendly writing style is enhanced by her salient examples of exemplary and mistake-laden practices within public and private sector organizations. A 'must-read' for scholars, students, and practitioners interested in organizational conflict." - Neil H. Katz, professor, Conflict Analysis and Resolution, Nova-Southeastern University "Conflict management skills are essential to a manager's success. Raines, a leading

scholar and practitioner, provides a comprehensive and strategic new guide to these critical skills and how to use them in any organization." - Lisa Blomgren Bingham, Keller-Runden Professor of Public Service, School of Public and Environmental Affairs, Indiana University

 Entrepreneurship, Institutional Framework and Support Mechanisms in the EU sheds light on the important and yet crucially under-explored interactions between entrepreneurship, institutions and support mechanisms within the EU.

Managing Conflict of Interest in the Public Service OECD Guidelines and Country Experiences American Bar Association

This collection explores the subject of conflicts of interest. It investigates how to manage conflicts of interest, how they can affect well-meaning professionals, and how they can limit the effectiveness of corporate boards, undermine professional ethics, and corrupt expert opinion. Legal and policy responses are considered, some of which (e.g. disclosure) are shown to backfire and even fail. The results offer a sobering prognosis for professional ethics and for anyone who relies on professionals who have conflicts of interest. The contributors are leading authorities on the subject in the fields of law, medicine, management, public policy, and psychology. The nuances of the problems posed by conflicts of interest will be highlighted for readers in an effort to demonstrate the many ways that structuring incentives can affect decision making and organizations' financial well-being.

A Comparative Study of Holders of Public Office in the EU Member States Cambridge University Press

Conflict prevention and crisis management has become a key activity for the EU since the creation of the Common Security and Defence Policy in 1999. The rapid growth of this policy area, as well as the number of missions deployed beyond the EU's border raise important questions about the nature of the EU's international role and its contribution to international security. The Contributions to EU Conflict Prevention and Crisis Management analyze European conflict prevention and crisis management in terms of the EU's evolving global role, its institutions and its policies. The volume analyzes the EU's position in relation to the US, the UN and other regional security organizations, and applies three different institutionalist perspectives - historical, rational choice and sociological institutionalism - to

explain the increasing institutionalization of EU crisis management. It also critically analyzes the application of EU policies in West Africa, Afghanistan and the Caucasus. Providing a comprehensive analysis of EU crisis management, the volume explores what role EU conflict prevention and crisis management plays in a European and a global context. Offering a comprehensive and original contribution to the literature on EU foreign and security policy, this volume will be of interest to students and scholars of European politics, international relations and security studies.

This book seeks to balance normative prescriptions on fiscal policy with its practical aspects in the context of the Indian scenario. In doing so, it brings together views of leading experts from academic and policy spheres. It highlights the specificities of Indian fiscal policy and studies current issues like the impact of development expenditures, the Goods and Services Tax (GST), the challenge of reducing subsidies and different aspects of political economy. India's Fiscal Policy discusses rapid developments in the field following the fiscal stimulus of 2008, subsequent attempts at fiscal consolidation and the formation of the NDA government. It focuses on policy and political considerations and adopts a wider approach for the analysis of fiscal policy by taking into consideration aspects such as the effectiveness and targeting of social expenditures, which are essential for a critical analysis of the Indian policy matrix.

This volume, edited by David Folkerts-Landau and Marcel Cassard, consists of papers presented at a conference held in Hong Kong SAR that was hosted by the IMF and the Hong Kong Monetary Authority. It focuses on a wide range of issues confronting policymakers in managing their sovereign assets and liabilities in a world of mobile capital and integrated capital markets. Topics include public debt management strategy, central bank reserves management, technical and quantitative aspects of risk management, and credit costs and borrowing capacity in optimizing debt management. The papers draw on experiences of policymakers and private sector participants actively involved in formulating and implementing debt and reserves policy.

Biomedical research results in the collection and storage of increasingly large and complex data sets. Preserving those data so that they are discoverable, accessible, and interpretable accelerates scientific discovery and improves health outcomes, but requires that researchers, data curators, and data archivists consider the long-term disposition of data and the costs of preserving, archiving, and promoting access to them. Life Cycle Decisions for Biomedical Data examines and assesses approaches and considerations for forecasting costs for preserving, archiving, and promoting access to biomedical research data. This report provides a comprehensive conceptual framework for cost-effective

decision making that encourages data accessibility and reuse for researchers, data managers, data archivists, data scientists, and institutions that support platforms that enable biomedical research data preservation, discoverability, and use.

Collaborations of physicians and researchers with industry can provide valuable benefits to society, particularly in the translation of basic scientific discoveries to new therapies and products. Recent reports and news stories have, however, documented disturbing examples of relationships and practices that put at risk the integrity of medical research, the objectivity of professional education, the quality of patient care, the soundness of clinical practice guidelines, and the public's trust in medicine. *Conflict of Interest in Medical Research, Education, and Practice* provides a comprehensive look at conflict of interest in medicine. It offers principles to inform the design of policies to identify, limit, and manage conflicts of interest without damaging constructive collaboration with industry. It calls for both short-term actions and long-term commitments by institutions and individuals, including leaders of academic medical centers, professional societies, patient advocacy groups, government agencies, and drug, device, and pharmaceutical companies. Failure of the

medical community to take convincing action on conflicts of interest invites additional legislative or regulatory measures that may be overly broad or unduly burdensome. *Conflict of Interest in Medical Research, Education, and Practice* makes several recommendations for strengthening conflict of interest policies and curbing relationships that create risks with little benefit. The book will serve as an invaluable resource for individuals and organizations committed to high ethical standards in all realms of medicine.

From the creator of the popular website Ask a Manager and New York's work-advice columnist comes a witty, practical guide to 200 difficult professional conversations—featuring all-new advice! There's a reason Alison Green has been called "the Dear Abby of the work world." Ten years as a workplace-advice columnist have taught her that people avoid awkward conversations in the office because they simply don't know what to say. Thankfully, Green does—and in this incredibly helpful book, she tackles the tough discussions you may need to have during your career. You'll learn what to say when • coworkers push their work on you—then take credit for it • you accidentally trash-talk someone in an email then hit "reply all" • you're being micromanaged—or not being managed at all • you catch a colleague in a lie • your boss seems unhappy with your work • your cubemate's loud speakerphone is making you homicidal • you got drunk at the holiday party Praise for Ask a Manager "A must-read for anyone who works . . . [Alison Green's] advice boils down to the idea that you should be professional (even when others are not) and that communicating in a straightforward manner with candor and kindness will get you far, no matter where you work."—Booklist (starred review) "The author's friendly, warm, no-nonsense writing is a pleasure to read, and her advice can be widely applied to relationships in all areas of readers' lives. Ideal for anyone new to the job market or new to management, or anyone hoping to improve their work experience."—Library Journal (starred review) "I am a huge fan of Alison Green's Ask a Manager column. This book is even better. It teaches us how to deal with many of the most vexing big and little problems in our workplaces—and

to do so with grace, confidence, and a sense of humor."—Robert Sutton, Stanford professor and author of *The No Asshole Rule* and *The Asshole Survival Guide* "Ask a Manager is the ultimate playbook for navigating the traditional workforce in a diplomatic but firm way."—Erin Lowry, author of *Broke Millennial: Stop Scraping By and Get Your Financial Life Together* *Corruption and Conflicts of Interest* Oxford University Press

In the context of a growing criticism on the influence of the pharmaceutical industry on physicians, scientists, or politicians, *Conflict of Interest and Medicine* offers a comprehensive analysis of the conflict of interest in medicine anchored in the social sciences, with perspectives from sociology, history, political science, and law. Based on in-depth empirical investigations conducted within different territories (France, the European Union, and the United States) the contributions analyze the development of conflict of interest as a social issue and how it impacts the production of medical knowledge and expertise, physicians' work and their prescriptions, and also the framing of health crises and controversies. In doing so, they bring a new understanding of the transformations in the political economy of pharmaceutical knowledge, the politicization of public health risks, and the promotion of transparency in science and public life. Complementing the more normative and quantitative understandings of conflict of interest issues that dominate today, this book will be of interest to researchers in a broad range of areas including social studies of sciences and technology, sociology of health and illness, and political sociology and ethics. It will be also a valuable resource for health professionals, medical scientists, or regulators facing the question of corporate influence.

The Ethics of Conflicts of Interest in Business International Monetary Fund The potential misuse of advances in life sciences research is raising concerns about national security threats. *Dual Use Research of Concern in the Life Sciences: Current Issues and Controversies* examines the U.S. strategy for reducing biosecurity risks in life sciences research and considers mechanisms that would allow researchers to manage the dissemination of the results of research while mitigating the potential for harm to national security. *Resolving Workplace, Client, and Policy Disputes* Edward Elgar Publishing *The Comparative Law Yearbook of International Business*, published under

the auspices of the Center for International Legal Studies, in this 41st volume spans an arc from nuanced discussion of the notion of 'creativity' under various copyright regimes and product designations over corporate organization, acquisition and criminal conduct, regulation of payment services and tax evasion to dealing with disruptive behaviour in international arbitration. The authors, practitioners and academics from Japan, Poland, Romania, Greece, Turkey, Iran, Spain and England bring a medley of perspectives addressing developments and pressing legal issues for businesses that are engaged in international commerce and investment, such as the difficulty of prosecuting corporate crimes, disincentives for tax offenders to cooperate with authorities, and new paradigms for banking. What's in this book: Among the broad spectrum of aspects, the book covers such issues and topics as the following: - reorganization of the concept of creativity by functions; - designation of products, business and entrepreneurs; - dividend distribution in public companies; - tax evasion,

disproportionate punishment and lack of remedies; and - transposition of the European Payment Services Directive 2. How this will help you: As a scrutiny of the updated developments in the legal fields, this Yearbook helps readers gain insight into national and regional perspectives on the interpretation of laws. The presentation of the reports aids in understanding the impact of such legal developments in practice. Thus, this book serves as a source of knowledge for lawyers and academics to comprehend the changing legal rules and regulations and to confidently apply them in solving problems.

Stark draws on legal, moral, and political thought to analyze several decades of debate over conflict of interest in American public life. He offers new ways of interpreting the controversies about conflict of interest, explains their prominence in American political combat, and suggests how we might make them less venomous and intractable.
