 Our Isometric Paper Notebook is printed with a grid of equilateral triangles. (each measuring 0.28") It is invaluable for any kind of three-dimensional design including architecture, landscaping or sculpture. Some artists enjoy using it to draw puzzles or complex or labyrinthine 3D images with boxes and staircases (rather like the style of MC Escher). It has become particularly popular for planning 3D Printer projects. Some schools and many colleges now offer 3D printing facilities and classes. It may also be used for geometry. GPU programming in MATLAB is intended for scientists, engineers, or students who develop or maintain applications in

MATLAB and would like to accelerate their codes using GPU programming without losing the many benefits of MATLAB. The book starts with coverage of the Parallel Computing Toolbox and other MATLAB toolboxes for GPU computing, which allow applications to be ported straightforwardly onto GPUs without extensive knowledge of GPU programming. The next part covers built-in, GPU-enabled features of MATLAB, including options to leverage GPUs across multicore or different computer systems. Finally, advanced material includes CUDA code in MATLAB and optimizing existing GPU applications. Throughout the book, examples and source codes illustrate every concept so that readers can immediately apply them to their own development. - Provides in-depth, comprehensive coverage of GPUs with MATLAB, including the parallel computing toolbox and built-in features for other MATLAB toolboxes - Explains how to accelerate computationally heavy applications in MATLAB without the need to re-write them in another language - Presents case studies illustrating key concepts across multiple fields - Includes source code, sample datasets, and lecture slides

The Isometric Drawing Notebook is a triangular graph paper which uses a series of three guidelines forming grid of 1/2 inch triangles. The triangles are arranged in groups of six to make hexagons. The name suggests the use for isometric views or pseudo-three-dimensional views. Among other functions, they can be used in the design of triangle point embroidery. It can be used to draw angles accurately. Ideal for engineer, artist, college. A lot of gamers and other artists use the Isometric paper for many different purposes.
