History of New York City Construction Regulations. New York City has one of the longest histories of building safety regulation in the United States. The first regulations came in 1647, when Dutch colonial officials established the post

“Surveyor of Buildings,” and required that no construction proceed without 2017 Construction Codes Revision Cycle Handbook This Handbook is made to provide simple information to house owners, to house designers and builders, and building monitors to teach principles of good design and good construction in natural hazard prone areas. Thoroughly studied, they will also guide on whether to repair or rebuild damaged houses. Handbook on Good Building, Design and Construction in the ... Earth-sheltered Pinnacle House is an award-winning, sustainably-designed home in Lyme, New Hampshire. The home was designed and built

by architect Don Metz in 1971, a pioneer in green home design and construction. The north-side of the house is built into the hillside, creating a green roof through the use of earth-sheltered building techniques. Earth Sheltered Homes • Instead of Sedimentary rocks are formed over thousands of years, as layers of soil are carried to a settlement bed by water and compacted by each subsequent layer of sediment. Building a rammed earth home is like creating sedimentary rock but very, very quickly. The number of rammed earth construction crews is growing, but a house can also be completed by an owner without professional help.
