Logical Investigative Methods: Critical Thinking and ... Intelligence has been defined in many ways: the capacity for logic, understanding, self-awareness, learning, emotional knowledge, reasoning, planning, creativity, critical thinking, and problem-solving. More generally, it can be described as the ability to perceive or infer information, and to retain it as knowledge to be applied towards adaptive behaviors within an environment or context. Intelligence - Wikipedia Sir Karl Raimund Popper CH FBA FRS (28 July 1902 - 17 September 1994) was an Austrian-British philosopher, academic and social commentator.. One of the 20th century's most influential philosophers of science, Popper is known for his rejection of the classical inductivist views on the scientific method in favour of empirical falsification. According to Popper, a
