 what happens in the

 bulls feel more strongly  
 than bears. They rally  
 when buyers are

First place in the 2020 American Journal of Nursing Book of the Year Award in History and Public Policy Winner of the 2020 Lavinia L. Dock Award from the American Association for the History of Nursing Talking Therapy traces the rise of modern psychiatric nursing in the United States from the 1930s to the 1970s. Through an analysis of the relationship between nurses and other mental health professions, with

an emphasis on nursing scholarship, this book demonstrates the inherently social construction of 'mental health', and highlights the role of nurses in challenging, and complying with, modern approaches to psychiatry. After WWII, heightened cultural and political emphasis on mental health for social stability enabled the development of psychiatric nursing as a distinct knowledge project through which nurses aimed to transform institutional approaches

to patient care, and to contribute to health and social science beyond the bedside. Nurses now take for granted the ideas that underpin their relationships with patients, but this book demonstrates that these were ideas not easily won, and that nurses in the past fought hard to make mental health nursing what it is today.

Kek comes from Africa. In America he sees snow for the first time, and feels its sting. He's never walked on ice, and he falls. He wonders if the people in this new place will be like the winter - cold and unkind. In Africa, Kek lived with his mother, father, and brother. But only he and his mother have survived, and now she's missing. Kek is on his own. Slowly, he makes friends: a girl who is in foster care; an old woman who owns a rundown farm, and a cow whose

name means "family" in Kek's native language. As Kek awaits word of his mother's fate, he weathers the tough Minnesota winter by finding warmth in his new friendships, strength in his memories, and belief in his new country.
