 The Mystery of the Seven Deaths: A Case Study in Cellular Respiration Michaela A. Gazdik Biology Department Ferrum College, Ferrum VA Part 1 - The Symptoms
 Imagine that you work at the medical examiner's office for a major metropolitan city. As Chief Medical Officer, you investigate suspicious deaths and provide toxicology services for the county.
 Solved: The Mystery Of The Seven Deaths: A Case Study In C ...
 Transcript of The Mystery of the Seven Deaths: A Case Study in Cellular Re. * Significantly lower NAD+ levels and significantly higher NADH levels. Cyanide does not allow the transfer of electrons to oxygen, so although the oxygen is still present, but it is not doing the required functions.
 The Mystery of the Seven Deaths: A Case Study in Cellular ...
 In the past five days, seven people have died, all with similar symptoms. It is your job to examine the data and determine the cause of death for these victims. The first was a 12-year-old girl. Her parents said that she

was awake in the middle of the night complaining of a stuffy nose and sore throat.
 KEY - Mrs. Slovacek's Science
 Cellular respiration, the central component of cellular metabolism, can be a difficult concept for many students to fully understand. In this interrupted, problem-based case study, students explore the purpose of cellular respiration as they play the role of medical examiner, analyzing autopsy evidence to determine the mysterious cause of death for seven people.

 Cellular Respiration Case Study - The Mystery of Seven Deaths
 When Gerald Wade died, apparently from an overdose of sleeping draught, seven clocks appeared on the mantelpiece. Who put them there and had they any connection with the Night Club in Seven Dials? That is the mystery that Bill Eversleigh and Bundle and two other young people set out to investigate.
