This book deals with the carrier's liability for deck cargo in the Nordic countries and England as state parties of the Hague-Visby Rules. The comparative method serves to illustrate two widely differing methods of dealing with, first, the exclusion of certain deck cargo from the scope of the Hague-Visby Rules and, second, where not excluded, the Rules failure to include a special deck cargo liability regime. Various solutions similar to the English or Nordic approach, or a combination of the two, have also been adopted in a large number of other jurisdictions. Taking into consideration the massive quantities of cargo that are carried on deck today, the subject is more topical than ever. The complexity of the problem stems from the way in which the deck has, over the years, gradually become a common place to stow cargo. When the Hague Rules were introduced in 1924, deck stowage was an absolute exception due to the great risks involved. As such, the topic must first be looked at in the context of the shipping realities in which the Hague Rules were drafted and then in terms of today's shipping realities. The comparative analysis leading up to the author's conclusions and general remarks for future legislation consists of two parts, the first dealing with the situations in which the carrier is permitted to stow cargo on deck, and the second with the carrier's liability for deck cargo where he has stowed cargo on deck with, or as the case may be, without such permission.

Letters of Credit: Theory and Practice explains in simple English all the important information you'll ever need on letters of credit (LC). This book provides extensive, easy-to-understand, practical and useful suggestions to help during negotiations, in selecting the right terms of payment, improving operations, reducing errors and risks, facilitating trade and final settlement, and much more. It is extensively

researched, delving deep into the subject of international trade, presenting current issues and solutions related to LCs that the reader may not otherwise come across easily. A gold mine of information on payment risk management, it's the last word on documentary credits. "This book is a great read for knowledge and practical information on letters of credit. It succinctly takes the reader through the concepts of risk management, explains the fundamentals of global trade finance issues, the dilemmas plaguing international sellers and buyers, and standardised ways for the buyer and the seller to secure goods and make payments, respectively. This is a must-read book for academicians, exporters, importers and bankers looking for complete, authentic information on international trade finance and global business." - Dr. Deepankar Sinha, Professor; Head - Research Division, Kolkata Campus; Programme Director - Centre for Trade and Logistics (CFTL), Kolkata Campus, Indian Institute of Foreign Trade (IIFT)

This book endeavours to interpret the development of private international law in light of social change. Since the end of World War II the socio-economic reality of international relations has been characterised by a progressive move from closed to open societies. The dominant feature of our time is the opening of borders for individuals, goods, services, capital and data. It is reflected in the growing importance of ex ante planning – as compared with ex post adjudication – of cross-border relations between individuals and companies. What has ensued is a shift in the forces that shape international relations from states to private actors.

The book focuses on various forms of private ordering for economic and societal relations, and its increasing significance, while also analysing the role of the remaining regulatory powers of the states involved. These changes stand out more distinctly by virtue of the comparative treatment of the law and the long-term perspective employed by the author. The text is a revised and updated version of the lectures given by the author during the 2012 summer courses of the Hague Academy of International Law.

Commercial letters of credit are the lifeblood of the international trade system and, for more than 70 years, the International Chamber of Commerce (ICC) has established the rules governing documentary credits worldwide. Used by letter of credit practitioners (including bankers, traders, lawyers, transporters, academics and all who deal with letter of credit transactions worldwide), Uniform Customs and Practice for Documentary Credits (UCP) are the most successful private rules for trade ever developed. UCP 600 entered into force on July 1, 2007 and contains substantive changes to the existing rules that all international business professionals need to know. This version of UCP 600 also includes eUCP (ICC's supplement to the UCP governing presentation of documents in electronic or part-electronic form) and a glossary of international trading terms.

Exploring the advantages and disadvantages of codifying contract law, this book considers the question from the perspectives of both civil and common law systems, referring in detail to issues of international and consumer

law. With contributions from leading international scholars, the chapters present a range of opinions on the virtues of codification, encouraging further debate on this topic. The book commences with a discussion on the internationalization imperative for codification of contract law. It then turns to regional issues, exploring first codification attempts in the European Union and Japan, and then issues relevant to codification in the common law jurisdictions of Australia, New Zealand and the United States. The collection concludes with two chapters which consider the need to draw upon both private and comparative international law perspectives to inform any codification reforms. This book will be of interest to international and comparative contract law academics, as well as regulators and policy-makers. Commentary on UCP 600 Springer Nature

How does science work? Does it tell us what the world is “really” like? What makes it different from other ways of understanding the universe? In *Theory and Reality*, Peter Godfrey-Smith addresses these questions by taking the reader on a grand tour of more than a hundred years of debate about science. The result is a completely accessible introduction to the main themes of the philosophy of science. Examples and asides engage the beginning student, a glossary of terms explains key concepts, and suggestions for further reading are included at the end of each chapter. Like no other text in this field, *Theory and Reality* combines a survey of recent history of the philosophy of science with current key debates that any beginning scholar or critical reader can follow. The second edition is thoroughly updated and expanded by the author with a new

chapter on truth, simplicity, and models in science.

It is inherent in some creatures living in nature to take what is not his own. Getting the ready one without working, getting rich the easy way! Since the earliest times in history it has been more attractive and tempting for some people or groups of people to take what others produce by force rather than work and produce. This has always been the cause of the turmoil, Wars and invasions

among people since the early ages. In the past, this was done by force and physical force, today it is done as an idea, namely by deception and deception. In order to combat fraudsters, it is necessary to know the techniques and methods they use. In this book, we tried to give some experience to this subject and to give some experience to protect the traders. For this purpose, we tried to give primarily the techniques used, the areas where fraud occurred, case studies and ways of protection.

This book explains various methods of payment in international trade and trade finance schemes for international trade. It also presents an overview of the concepts, purposes, features, and risks of international trade. A grasp of the features and risks of international trade facilitates a better understanding of the numerous methods of payment in international trade and the relevant trade finance schemes, which is essential to success in international trade transactions. In order to complete an international trade transaction, depending on the terms, both parties need access to funds. Compared with large companies, small and medium-sized enterprises (SMEs), frequently face difficulties in raising capital or funds, but financing an international trade transaction is often the key to its successful completion. As such, selecting an appropriate financing mechanism from the various options available is vital. This book offers a systematic overview of international trade and payment together with trade finance, providing instructive examples and illustrations of trade documents, each method of payment, and trade finance including export credit insurance or

guarantee.

FRAUD AND MISTAKES IN

INTERNATIONAL TRADE Notion Press
Buyers and sellers engaging in the cross-border sale of goods are well-advised to be conversant with the United Nations Convention on Contracts for the International Sale of Goods (CISG), which governs international sales contracts. The CISG has been ratified by 89 states, which together account for over three-quarters of all world trade. This practically-oriented, article-by-article commentary on the CISG will be useful to legal practitioners, counsel and arbitrators dealing with international sales contracts. The in-depth annotations deal extensively with the

legal issues likely to arise under each CISG article. The annotations include up-to-date analyses of state court and arbitral decisions, the legal doctrines derived from these decisions, and relevant scholarship to date. Among the issues and topics discussed are the following: interface with national laws; scope of application; obligations of seller and buyer; non-conforming goods and duty to notify; breach of contract and remedies; damages; force majeure exemption; and termination of contract and its consequences. This book is an updated translation of the second German edition of a valued resource in Germany, Switzerland, and Austria, and an authority regularly cited by the Swiss Supreme Court. The commentary is influenced by legal authorities from both civil law and common law backgrounds. Throughout, the contributors refer to the cisg-online.ch database, enabling users to locate decisions easily. User-friendly, focused on practical questions, concise but comprehensive, this article-by-article commentary provides a quick and trenchant overview of existing legal opinions and court/arbitral decisions. It will prove immensely valuable to legal practitioners, facilitating their formulation of reliable solutions to legal problems involving the CISG.

This book consists of edited versions of the papers delivered at the Institute of International Shipping and Trade Law's 11th International Colloquium, held at Swansea Law School in September 2015. Featuring a team of contributors at the top of their profession, both in practice and academia, these papers have been carefully co-ordinated so as to ensure to give the reader a first class insight into the issues surrounding international sale and carriage contracts. The book is set out in three parts: Part I offers a detailed and critical analysis on emerging issues and unresolved questions in international sales and the carriage contracts affected to facilitate such sales. Part II critically and thoroughly analyses the legal issues that often arise in the context of security over goods, letters of credit and similar documents. Part III is dedicated to a critical and up-to-date discussion on matters concerning cargo insurance in this context. With its breadth of coverage and high-quality analysis, this book is vital reading for both professional and academic readers with an interest in international trade and carriage of goods.

This book outlines features of international business transactions, and discusses their various associated risks. For the successful completion of an international business transaction, depending on its terms, both parties need access to funds. This text deals with financing mechanisms mainly in the international sale of goods and in overseas construction projects.

Concerning financing international sale of goods, it discusses export working capital financing, documentary credit, negotiation of bills of exchange, export factoring, and international forfaiting. Concerning financing an overseas construction project, this book discusses supplier and buyer credit, project finance, syndicated loans, and independent guarantees (or standby letters of credit). The book also covers export credit insurance (or export credit guarantee), which is very useful for the facilitation of financing in the international sale of goods and in overseas construction projects.

During the European Middle Ages, diagrams provided a critical tool of analysis in cosmological and theological debates. In addition to drawing relationships among diverse areas of human knowledge and experience, diagrams themselves generated such knowledge in the first place. In *Diagramming Devotion*, Jeffrey F. Hamburger examines two monumental works that are diagrammatic to their core: a famous set of picture poems of unrivaled complexity by the Carolingian monk Hrabanus Maurus, devoted to the praise of the cross, and a virtually unknown commentary on Hrabanus's work composed almost five hundred years later by the Dominican friar Berthold of Nuremberg. Berthold's profusely illustrated elaboration of Hrabanus translated his predecessor's poems into a series of almost one hundred diagrams. By examining Berthold of Nuremberg's transformation of a Carolingian classic, Hamburger brings modern and medieval visual culture into dialogue, traces important changes in medieval visual culture, and introduces new ways of thinking about diagrams as an enduring visual and conceptual model.
