Jones and George are
dedicated to the

challenge of "Making It
Real" for students. As a
team, they are
uniquely qualified to
write about the
organizational
challenges facing
today's managers. No
other author team in
the management
discipline matches

their combined research and text-writing experience. Essentials of Management concisely surveys current management theories and research. Through a variety of real world examples from small, medium, and large companies the reader learns how those ideas are used by practicing managers. The organization of this text follows the mainstream functional approach of planning, organizing, leading, and controlling; but the content is flexible and encourages instructors to use the organization they are most comfortable with. The themes of diversity, ethics, and information technology are clearly evident through in-text examples, photographs,

"unboxed" stories, and the end-of-chapter material - all areas of importance that truly serve to bring to life the workplace realities that today's student will encounter in the course of a career.

Management Principles for Health Professionals

McGraw-Hill Companies Contemporary Management by Jones and George distinguishes itself through its authorship, comprehensive,

current contents, rich and relevant examples and applications and experiential exercises provided in every single chapter. This #1 best-selling text continues to redefine what principles of management texts should look, sound, and feel like. As an author team Gareth Jones and Jennifer George are uniquely qualified to write about both the strategic and organizational challenges managers face. Contemporary Management is a comprehensive text that surveys the theoretical underpinnings of modern management thought and research. Through a variety of examples from an expanded number of small business to medium and large

companies it shows the reader how those ideas are used by practicing managers. A hallmark of this text is its focus on the “Manager as a Person,” which discusses managers as real people with their own personalities, strengths, weaknesses, opportunities, and problems.

Now published in its Third Edition, Principles of Strategic Management by Tony Morden is a proven textbook that offers a comprehensive introduction to the study and practice of strategic management. This new edition covers the fundamentals of strategic analysis and planning, strategy formulation, strategic choice, and strategy implementation. It contains new material

on leadership and corporate governance, and on the strategic management of time, risk, and performance. There is a new chapter on the key issue of crisis and business continuity management. The book retains the strong international flavour of its predecessors. The book is constructed in sharply focused Parts and Chapters. The text is then broken down into accessible Sections. The presentation is clear and reader-friendly. Principles of Strategic Management is ideal for use on undergraduate, conversion masters, and MBA courses in business and management. Its reader-friendly approach also makes it suitable for block-

release type courses, distance-learning programmes, self-directed study, in-company training, and continuing personal professional development. Contemporary Management McGraw-Hill/Irwin Book & CD. To improve on an award-winning book poses a major challenge to its authors. The authors of this book took the challenge head-on by conducting a major research study to determine what exactly the outcomes are that managers at different levels must deliver in contemporary organisations in South Africa, and the rest of Africa. The findings of this study, which dealt with current and near-future management

issues, as well as classical and contemporary thinking about management, were used as the blueprint for the updating of this book. After placing management in context, the authors deal with the knowledge, skills and dispositions required of managers to perform the management functions of planning, organising, leading and controlling in a volatile business world. Examples of how the functions are applied in practice are cited throughout the book. These examples refer mainly to South African organisations and situations that managers in South Africa, and Africa, have to deal with to create and sustain a competitive advantage

for their organisations. The book endeavours to break down the silo effect of seeing the management functions as separate activities. This is done by continuously placing the management function at hand in a bigger context. This enables learners of management to assess the implications of management decisions on different people, processes, systems and so on that make up the organisation.

Revised and updated, this second edition discusses first-line supervisors' management principles from a general management perspective. Covering a variety of topics—including

fairness, business culture, leadership, and planning—the book acknowledges that all levels of management must be part of a strategic framework, but that responsibilities differ at various levels.

Employment relations, as well as some contemporary issues that influence operational managers, are also discussed.
