## GILLIAN SWANSON

**A Tour of Our Solar System and Beyond** National Geographic Society

A tour of outer space explores the solar system as well as stars, galaxies, and the birth of planets, and speculates on whether other intelligent beings exist in the universe.

*300 Dino-Mite Facts to Sink Your Teeth Into* National Geographic Books

If you're wild about animals, this visual encyclopedia is the ultimate page-turner, bringing our planet's creatures together in spectacular style. This inspiring children's reference guide welcomes you to the animal kingdom where you can meet more than 1,500 species, ranging from ants to zebras and everything in between. Stunning pictures bring you face to face with giant predators you know and love, including polar bears and tigers, as well as mysterious microscopic life, including amoebas and bacteria. A variety of animal habitats are shown in beautiful detail, while accessible information, additional fact boxes, and amazing galleries complete the stories. A jaw-dropping spectrum of animal types - from fish and birds to reptiles and mammals - provides a learning experience like no other. Whether you're a budding naturalist or simply want to complete a school project, *The Animal Book* has got it covered.

*National Geographic Little Kids First Big Book of Science* National Geographic Books

This charming reference book takes a closer look at the different ways people move from place to place, whether it is in a car, subway, hang glider, or submarine. More than 100 colorful photos are paired with age-appropriate text that explains how racecars, bicycles, rockets, and so many other modes of transportation work. This book inspires kids to be curious, ask questions, and explore the world around them.

**Animal** National Geographic Kids

A comprehensive volume of more than one thousand animals introduces the entire animal kingdom, touring every corner of the planet and covering such topics as scientific and common names, conservation data, habitat, and behavior.

**2,500 Animals With Photos, Maps, and More!** National Geographic Books

A single-volume reference provides the latest research on Earth's fragile ecosystems and climate shift and includes coverage of the world's oceans, landforms, weather, and resources.

**The Best of the City** National Geographic Books

Provides comprehensive information on the planet, including its geological history, physical composition, weather, and humankind's relationship with the Earth.

**First Big Book of Dinosaurs** ABDO

This encyclopedia highlights more than 50 different cats. Alongside colorful photographs of both adult cats and kittens, readers learn about the history, appearance, and behavior of various breeds. Features include information about cat care, a glossary, additional resources, and an index. Aligned to Common Core Standards and correlated to state standards. *Abdo Reference* is an imprint of *Abdo Publishing*, a division of *ABDO*.

*Weird But True! - Dinosaurs* National Geographic Children's Books

View the animal kingdom up close as never before in this breathtaking title, which has already sold over 1.5 million copies. Written by 70 specialists, it features stunning wildlife photography of more than 2000 of the world's most important wild mammals, birds, reptiles, amphibians, and insects. With around two million species identified to date, animals are the dominant and most varied form of life on the planet. *Animal* presents a representative selection, ranging from the giant baleen whale, to fast-moving predators such as sharks, big cats, and birds of prey, as well as microscopic beetles barely 1mm long and other insects. It presents some of the latest species to be described: meet the cute but elusive olinguito from South America, which was only identified in 2013, or the skywalker hoolock gibbon that was named after a Star Wars character in 2017. *Animal* also explains

how the earth's biodiversity is in sharp decline and the conservation projects underway to safeguard precious species. For each one, it gives a locator map and statistics, including its conservation status. For anyone who wants a reliable and enthralling reference, in which you can find the answers to everything - from why zebras are striped or how the sunbear got its name - *Animal* is your essential one-stop guide.

**2,500 Animals with Photos, Maps, and More!** National Geographic Books
