In this introductory textbook, the author contextualises approaches and theories on communication studies by making use of local examples from the mass media, as well as relevant political and social experiences. The book is divided into two parts. The first provides students with a strong foundation in communication while the second focuses on the areas of specialisation within communication studies. Each chapter

starts with the learning Outcomes and a short overview of the chapter. Students can monitor their learning by using the summaries and 'test yourself' questions at the end of every chapter. Scenarios provide examples of how the theory can be applied in practice. This makes for a learner-friendly and accessible book which will prove invaluable to Students and professionals alike. Beginner students majoring in Communication Studies, as well as those studying towards various degrees or qualifications where communication is a prerequisite will find this book useful.

This book disseminates original research on learning in and from practice in pre-service teacher education. Authors such

as Lederman and Lederman describe the student teaching practicum (or work-integrated learning [WIL]), which is an essential component of pre-service teacher education, as the 'elephant in the room'. These authors note that 'the capstone experience in any teacher education programme is the student teaching practicum... [a]fter all, this is where the rubber hits the road'.

However, many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student teacher to develop their own footing and voice as a teacher. This is the 'gap' that this research book addresses. Most of the chapters in the book report empirical data, with the exception of two chapters that can be categorized as systematic reviews. WIL

is addressed from various angles in the chapters. Chapter 6 focuses on research related to what makes Finnish teacher education so effective, and in Chapter 4 researchers of the University of Johannesburg disseminate their findings on establishing a teaching school (based on Finnish insights) in Johannesburg. Chapter 3 highlights the challenges faced in open-and distance learning teacher education contexts. Several of the chapters disseminate research findings on alternative interventions to classic WIL, namely, where “safe spaces” or laboratories are created for student teachers to learn and grow professionally. These could either be simulations, such as software programmes and avatars in the intervention described in Chapter 2;

student excursions, as the findings in chapters 5, 7 and 10 portray; or alternative approaches to WIL (e.g. Chapters 11 and 12). The book is devoted to scholarship in the field of pre-service teacher education. The target audience is scholars working in the fields of pre-service teacher education, work-integrated learning, and self-directed learning. The book makes a unique contribution in terms of firstly its extensive use of Cultural-Historical Activity Theory as a research lens, and secondly in drawing on various theoretical frameworks. Both quantitative and qualitative research informed the findings of the book.

This fifth edition of International Law: A South African Perspective is now titled Dugard's International Law: A South

African Perspective, in recognition of the fact that this work is a continuation of the earlier editions written by John Dugard. The substance of the work has undergone major changes to take account of new developments both on the international legal scene and in South Africa. Dugard's International Law: A South African Perspective presents a South African perspective of international law. The basic principles of international law are described and examined with reference to the principal sources of international law. This examination, however, takes place within the context of South African law. South African state practice, judicial decisions and legislation on international law receive equal treatment with international law as it is practised and

taught abroad. The present work is designed to assist judicial officers and practitioners, educate students, and guide diplomats in the intricacies of international law both at home in South Africa and abroad.

INTRODUCTION TO LEGAL PLURALISM IN SOUTH AFRICA Oxford University Press, USA

Organized topically rather than historically, this book provides an excellent introduction to the subject of African Philosophy. Samuel Oluoch Imbo synthesizes the ideas of key African philosophers into an accessible narrative. The author focuses on five

central questions: What are the definitions of African philosophy? Is ethno-philosophy really philosophy? What are the dangers of an African philosophy that claims to be 'unique'? Can African philosophy be done in foreign languages such as English and French? Are there useful ways to make connections between African philosophy, African American philosophy, and women's studies? By making cross-disciplinary and transnational connections, Imbo stakes out an important place for African philosophy. Imbo's book is an invaluable introduction to this dynamic and growing area of study.
