Old Cuba presents an insider's view of the splendid colonial-era sites of the storied island nation, from the grand apartments and magnificent cathedral of Old Havana to the plantation homes of Pinar del Río. Cuba dominates the entrance to the Gulf of Mexico, fixed between the great continents to the north and to the south, and has long served as a bridge between the Old World and the New. First visited by Christopher Columbus in 1492, its history of interaction with the Old World of Europe is among the longest in the Americas, and its architecture bears testament to this: Cuba is home to some of the most ancient cities and towns in the western hemisphere. As a result, the country once known as the "pearl of the Antilles," stands now as a treasure chest of alluring historic architecture—seasoned by European precedents mixed with colonial and Caribbean spice—and boasts an extraordinary number of UNESCO Cultural Heritage sites, from the historic center of Old Havana with its original city walls and the Castillo de la Real Fuerza—the oldest extant colonial fortress in the Americas—to the sixteenth-century city of Trinidad, within the central Cuban province of Sancti Spiritus, recognized by historians and scholars as a triumph of historic preservation and whose maze of pastel mansions and churches forms one of the best collections of colonial architecture to be found anywhere. From Old Havana to Santiago de Cuba, Old Cuba offers an intimate look at the historic architecture—the houses, apartments, monuments, charming public spaces, and centuries-old churches—of this storied country.

When Carson Reynolds gets hired to produce a documentary film at a gathering of Native American medicine men, he never

suspects it will be a portal into a world that will radically change his life. Despite his resistance to the Call, he is ineluctably drawn into a realm of shamans, priestesses, deities, and plant-medicine work, where he becomes engaged in a searing struggle with extra-dimensional forces that threaten the future of humanity as we know it.

When Red Guards arrived in Tibet in 1966, intent on creating a classless society, they unleashed a decade of revolutionary violence, political rallies, and factional warfare marked by the ransacking of temples, the destruction of religious artifacts, the burning of books, and the public humiliation of Tibet's remaining lamas and scholars. Within Tibet, discussion of those events has long been banned, and no visual records of this history were known to have survived. In *Forbidden Memory* the leading Tibetan writer Tsering Woeser presents three hundred previously unseen photographs taken by her father, then an officer in the People's Liberation Army, that show for the first time the frenzy and violence of the Cultural Revolution in Tibet. Found only after his death, Woeser's annotations and reflections on the photographs, edited and introduced by the Tibet historian Robert Barnett, are based on scores of interviews she conducted privately in Tibet with survivors. Her book explores the motives and thinking of those who participated in the extraordinary rituals of public degradation and destruction that took place, carried out by Tibetans as much as Chinese on the former leaders of their culture. Heartbreaking and revelatory, *Forbidden Memory* offers a personal, literary discussion of the nature of memory, violence, and responsibility, while giving insight into the condition of a people whose violently truncated history they are still unable to discuss today. ### A Universal History of the Destruction of Books Bantam

Drawing on newly declassified government files, this is the dramatic story of how a forbidden book in the Soviet Union became a secret CIA weapon in the ideological battle between East and West. In May 1956, an Italian publishing scout took a train to a village just outside Moscow to visit Russia's greatest living poet, Boris Pasternak. He left carrying the original manuscript of Pasternak's first and only novel, entrusted to him

with these words: "This is Doctor Zhivago. May it make its way around the world." Pasternak believed his novel was unlikely ever to be published in the Soviet Union, where the authorities regarded it as an irredeemable assault on the 1917 Revolution. But he thought it stood a chance in the West and, indeed, beginning in Italy, *Doctor Zhivago* was widely published in translation throughout the world. From there the life of this extraordinary book entered the realm of the spy novel. The CIA, which recognized that the Cold War was above all an ideological battle, published a Russian-language edition of *Doctor Zhivago* and smuggled it into the Soviet Union. Copies were devoured in Moscow and Leningrad, sold on the black market, and passed surreptitiously from friend to friend. Pasternak's funeral in 1960 was attended by thousands of admirers who defied their government to bid him farewell. The example he set launched the great tradition of the writer-dissident in the Soviet Union. In *The Zhivago Affair*, Peter Finn and Petra Couvée bring us intimately close to this charming, passionate, and complex artist. First to obtain CIA files providing concrete proof of the agency's involvement, the authors give us a literary thriller that takes us back to a fascinating period of the Cold War—to a time when literature had the power to stir the world. (With 8 pages of black-and-white illustrations.)

Since the time of the Italian explorer Christopher Columbus the man credited for the discovery of the new world, the new comers to the world have observed and documented the things which they seen, heard and experienced. The new comers to this world saw the ruins of what appeared as intricately built ancient cities, observed strange yet familiar habits of the indigenous. It wasn't until the mid 19th century that archaeology was even taken serious in this land, yet it would seem as though it was not for the purpose of documentation and understanding of those of the past. 100 years or so earlier Sir Richard Colt Hoare coined the motto for Antiquarianism in Europe, We Speak from Facts not Theory and it would seem here in the Americas, John W Powell and Ephraim George Squire after the creation of the Smithsonian Institution, together reconstructed and change the purpose of the existence of Smithsonian with what would seem to be their motto,

We Speak from Theory not from Facts. Since the days Smithsonian took a new path due to the influences of men such as Powell and Squire, thousands if not tens of thousands of artifacts and ruins have been dusted under the rug and or buried in the depths of Smithsonian, with a system of control and a constant threat of taking away their funding exist to this day over the heads of the Museums of this Nation. A threat of mockery and striping of ones title, destroying the ability of making a living in the archaeological world, hangs over the heads of many archaeologist today. The dictatorship of archaeology was now set up, the new religion of Atheism with its Bible of Manifest Destiny and Evolution, but what was the motive? Why would a group of men want to hide the history of this land? What was it that could have motivated the two sons of Methodist Ministers in Palmyra New York in 1830? I just can't put my finger on it. To this day thousands of unusual artifacts remain hidden in the basements of Museums across this land with no explanation as to why they cannot display them without the threat of loosing their funding. It would seem that of every claim of who came to this land first, all seem to forget that when they pushed their way onto the beaches of this new world, someone was peering at them from the bushes. Although not the first to come to this land, Europeans, Hebrew or Jewish and or Roman Jewish people, have been coming to this land as early as possibly 900 BC, and even then, someone was already here. Columbus knew this and so did all the others who followed him and preceded him, and those who funded the expeditions. Who were these people and how did they get here? Is there a written history of these people? It is my desire, not having this threat hanging over my head, to show you even a small portion of the amazing untold history of this land through photographic, archaeological, geographic, and scriptural evidence, legends, documentation of the past told by those who witnessed it, and just plain common sense. It is not my position that because an artifact find was not an "Official" archaeological excavation that we need disregard completely the evidence. Honesty and trust in a find is not inherent in the field of archaeology inclusively, it is within the men who make the find, and tell the story as it occurred. Just because it was not under the dictatorship of Smithsonian, does not make it any less credible, not in the slightest. The field of archaeology has come a long way since the days of the two sons of Methodist Ministers from Palmyra New

York, and it seems to have stooped to a new low many would not have ever thought. Many archaeologist of today are fed up and disgusted with the muzzle that is forced upon them with a threat of loosing their livelihood should they stray from the curriculum and the seeming untold oath to it. It is what seems to be, an effort to destroy the concept of God in the mind of the people for the sake of the religion of Evolution.

Forbidden Love is a pathbreaking book that only a master historian could write. The first work for younger readers to describe the true history of racial mixing in America, it exposes how desperately some people have fought to guard our racial borderlines. Gary Nash, a past president of the Organization of American Historians, has been instrumental in rethinking how history should be taught in schools. Now, starting with John Rolfe and Pocahontas, pausing to compare the United States with Canada and Mexico, and ending with his own multiracial classrooms, he shows how racial mixing, and the fear of it, is at the heart of American history.

"Wonderful . . . offers and provokes meditation on the timeless nature of censorship, its practices, its intentions and . . . its (unintended) outcomes." —Times Higher Education Forbidden Knowledge explores the censorship of medical books from their proliferation in print through the prohibitions placed on them during the Counter-Reformation. How and why did books banned in Italy in the sixteenth century end up back on library shelves in the seventeenth? Historian Hannah Marcus uncovers how early modern physicians evaluated the utility of banned books and facilitated their continued circulation in conversation with Catholic authorities. Through extensive archival research, Marcus highlights how talk of scientific utility, once thought to have begun during the Scientific Revolution, in fact began earlier, emerging from ecclesiastical censorship and the desire to continue to use banned medical books. What's more, this censorship in medicine, which preceded the Copernican debate in astronomy by sixty years, has had a lasting impact on how we talk about new and controversial developments in scientific knowledge. Beautiful illustrations accompany this masterful, timely book about the interplay between efforts at intellectual control and the utility of knowledge. "Marcus deftly explains the

various contradictions that shaped the interactions between Catholic authorities and the medical and scientific communities of early modern Italy, showing how these dynamics defined the role of outside expertise in creating 'Catholic Knowledge' for centuries to come." —Annals of Science "An important study that all scholars and advanced students of early modern Europe will want to read, especially those interested in early modern medicine, religion, and the history of the book. . . . Highly recommended." —Choice

Latifa was born into an educated middle-class Afghan family in Kabul in 1980. She dreamed of one day of becoming a journalist, she was interested in fashion, movies and friends. Her father was in the import/export business and her mother was a doctor. Then in September 1996, Taliban soldiers seized power in Kabul. From that moment, Latifa, just 16 years old became a prisoner in her own home. Her school was closed. Her mother was banned from working. The simplest and most basic freedoms - walking down the street, looking out a window - were no longer hers. She was now forced to wear a chadri. My Forbidden Face provides a poignant and highly personal account of life under the Taliban regime. With painful honesty and clarity Latifa describes the way she watched her world falling apart, in the name of a fanatical interpretation of a faith that she could not comprehend. Her voice captures a lost innocence, but also echoes her determination to live in freedom and hope. Earlier this year, Latifa and her parents escaped Afghanistan with the help of a French-based Afghan resistance group.

An instant classic and eerily prescient cultural phenomenon, from "the patron saint of feminist dystopian fiction" (New York Times). Now an award-winning Hulu series starring Elizabeth Moss. In this multi-award-winning, bestselling novel, Margaret Atwood has created a stunning Orwellian vision of the near future. This is the story of Offred, one of the unfortunate "Handmaids" under the new social order who have only one purpose: to breed. In Gilead, where women are prohibited from holding jobs, reading, and forming friendships, Offred's persistent memories of life in the "time before" and her will to survive are acts of rebellion. Provocative, startling, prophetic, and with Margaret Atwood's

devastating irony, wit, and acute perceptive powers in full force, *The Handmaid's Tale* is at once a mordant satire and a dire warning.

Li Ang (1952-) is a famous and prolific feminist writer from Taiwan who challenges and subverts sociocultural traditions through her daring explorations of sex, violence, women's bodies and desire, and national politics. As a taboo-breaking writer and social critic, she uses fiction to expose injustice and represent human nature. Her political engagement further affords her a visionary perspective for interrogating the problematic intersection of gender and politics. The ambivalence in her fictional representations invites controversies and debates. Her works have thus helped raise awareness of the problems, open up discussions, and bring about social and intellectual changes. Some of her works have been translated into such foreign languages as English, French, German, and Japanese. In her career spanning over forty years, she has won numerous literary awards. Li Ang's *Visionary Challenges to Gender, Sex, and Politics* is the first collection of critical essays in English on Li Ang and some of her most celebrated works. Contributing historians examine her vital roles in the Taiwanese women's movement and political arenas, as well as the social influence of her publications on extramarital affairs. Contributing literary scholars investigate the feminist controversy over her 1983 award-winning novel, *Shafu* (*Killing the Husband*; translated as *The Butcher's Wife*); offer alternative interpretative strategies such as looking into figurations of "biopower" and relationship dynamics; dissect the subtle political significance in her magnificent novel *Miyuan* (*The labyrinthine garden*; 1991) and explosive political fiction, *Beigang xianglu renren cha* (*Everyone sticks incense into the Beigang censor*; 1997) from the perspective of gender and national identity; scrutinize the multiple discursive levels in her superb novel *Qishi yinyuan zhi Taiwan/Zhongguo qingren* (*Seven prelives of affective affinity: Taiwan/China lovers*; 2009); and analyze the "(dis)embodied subversion" accomplished by her fantastic *Kandejian de gui* (*Visible ghosts*; 2004). As the first volume in

English to examine Li Ang's trail-blazing discourse on gender, sex, and politics, this work will inspire more studies of her oeuvre and contribute usefully to the fields of modern Taiwanese and Chinese literature, feminist studies, and comparative literature.

The history of Taiwan is astonishing. Politically, Taiwan- was a warlord culture. The Portuguese, when passing by the island in the mid-1540s, called the island "Ilha Formosa," which means

"Beautiful Island." Then the Dutch came in the 1620s, searching for a base of operations for the Dutch East India Company.
