South Asia's diaspora is among the world's largest and most widespread, and it is growing exponentially. It is estimated that over 25 million persons of Indian descent live abroad; and many more millions have roots in other countries of the subcontinent, in Pakistan, Bangladesh and Sri Lanka. There are 3 million South Asians in the UK and approximately the same number resides in North America. South Asians are an extremely significant presence in Southeast Asia and Africa, and increasingly visible in the Middle East. This inter-disciplinary handbook on the South Asian diaspora brings together contributions by leading scholars and rising stars on different aspects of its history, anthropology and geography, as well as its contemporary political and socio-cultural implications. The Handbook is split into five main sections, with chapters looking at mobile South Asians in the early modern world before moving on to discuss diaspora in relation to empire, nation, nation state and the neighbourhood, and globalisation and culture. Contributors highlight how South Asian diaspora has influenced politics, business, labour, marriage, family and culture. This much needed and pioneering venture provides an invaluable reference work for students, scholars and policy makers interested in South Asian Studies.

The Routledge Handbook of South Asian Religions presents critical research, overviews, and case studies on religion in historical South Asia, in the seven nation states of contemporary South Asia: India, Pakistan, Bangladesh, Nepal, Bhutan, Sri Lanka, and the Maldives, and in the South Asian diaspora. Chapters by an international set of experts analyse formative developments, roots, changes and transformations, religious practices and ideas, identities, relations, territorialisation, and globalisation in historical and contemporary South Asia. The Handbook is divided into two parts which first analyse historical South Asian religions and their developments and second contemporary South Asia religions that are influenced by both religious pluralism and their close connection to

nation states and their ideological power. Contributors argue that religion has been used as a tool for creating nations as well as majorities within those nations in South Asia, despite their enormous diversity, in particular religious diversity. The Handbook explores these diversities and tensions, historical developments, and the present situation across religious traditions by utilising an array of approaches and from the point of view of various academic disciplines. Drawing together a remarkable collection of leading and emerging scholars, this handbook is an invaluable research tool and will be of interest to researchers and students in the fields of Asian religion, religion in context, and South Asian religions.

Colonialism as Civilizing Mission CRC Press

This book challenges the view, common among Western scholars, that precolonial India lacked a tradition of military philosophy. It traces the evolution of theories of warfare in India from the dawn of civilization, focusing on the debate between Dharmayuddha (Just War) and Kutayuddha (Unjust War) within Hindu philosophy. This debate centers around four questions: What is war? What justifies it? How should it be waged? And what are its potential repercussions? This body of literature provides evidence of the historical evolution of strategic thought in the Indian subcontinent that has heretofore been neglected by modern historians. Further, it provides a counterpoint to scholarship in political science that engages solely with Western theories in its analysis of independent India's philosophy of warfare. Ultimately, a better understanding of the legacy of ancient India's strategic theorizing will enable more accurate analysis of modern India's military and nuclear policies.

Imperial Sovereignty and Local Politics takes at its focus the historically significant interconnections between local polities and imperial formations in South Asia. Using the relationship between the

Bhadoria Rajputs and the Mughal, Maratha and British Empires as a prism to evaluate the constitution of sovereignty and the process of state formation, it demonstrates the enduring relevance of symbolism and ritual, the persistence of pre-colonial political forms and ideologies and the continuing importance of local power networks in moulding imperial projects. Employing theories of state formation borrowed from anthropology, Singh emphasizes the need to conceptually separate political authority from symbolic sovereignty and examine the local context of imperial politics. This work provides a compelling re-orientation of the way we understand the nature of imperial states, the experience of sovereignty and the processes of political change in the eighteenth and nineteenth centuries.
