Violence and Serious Theft Gecko Press (Tm)

The first adventure of the funniest mummy ever! Just imagine. You're called Angus Gust, you couldn't be more ordinary and you live in the most boring town in the world. One day, you walk into your bedroom, smell something nasty, look around and suddenly notice a mummy lying in your bed. What would you do? Yes, you would be scared to death, of course. And you would close your eyes, count to ten and be sure it would be gone. But just imagine that after ten seconds, it would still be there... And after twenty seconds too...! What would you do then? Angus quickly got the tweezers out of the first aid kit and his father used them to grasp the final strip. "Alright, here we go," he said. "Maybe it won't be as bad as all that." Then he lifted up the last flap. It was as bad as all that. They scared themselves to death. "Whumpy dumpman, he'll never get a girlfriend," Nick whispered. "Disgusting," Angus shuddered.

Early Learning of Modern Foreign Languages Brookes Publishing Company

The ultimate aim of reading is not the process but to understand what we read and comprehension can take place at many different levels. There has been an increasing emphasis on the importance of reading comprehension in recent years but despite this there is very little written on this vital topic accessible to trainee and practicing teachers. The Handbook of Reading Comprehension presents an overview of recent findings on reading comprehension and comprehension problems in children. It provides a detailed examination of the characteristics of children who have reading comprehension difficulties, and examines ways in which comprehension can be supported and improved. It is accessibly written for students and professionals with no previous background in the psychology of reading or reading problems. This indispensable handbook asks the question 'what is comprehension?' The authors consider comprehension of different units of language: understanding single words, sentences, and connected prose and outline what readers (and listeners) have to do to successfully understand an extended text. This book also considers comprehension for different purposes, in particular reading for pleasure and reading to learn and explores how reader characteristics such as interest and motivation can influence the comprehension process. Different skills contribute to successful reading comprehension. These include word reading ability, vocabulary knowledge, syntactic skills, memory, and discourse level skills such as the ability to make inferences, knowledge about text structure, and metacognitive skills. The authors discuss how each one contributes to the development of reading comprehension skill and how the development of these skills (or their precursors) in pre-readers, provides the foundation for reading comprehension development. Areas covered include:- Word reading and comprehension Development of comprehension skills Comprehension difficulties Assessment Teaching for improvement Throughout the text successful experimental and classroom based interventions will be highlighted, practical tips for teachers and summary boxes detailing key points and explaining technical terms will be included in each chapter

The Gruffalo's Child Magnet Book Singular

Developmental Education is an approach to education in school that aims at promoting children's cultural development and their abilities to participate autonomously and well-informed in the cultural practices of their community. From the point of view of Cultural-historical Activity theory (CHAT), a play-based curriculum has been developed over the past decades for primary school, which presents activity contexts for pupils in the classroom that create learning and teaching opportunities for helping pupils with appropriating cultural knowledge, skills, and moral understandings in meaningful ways. The approach is implemented in numerous Dutch primary schools classrooms with the explicit intention to support the learning of both pupils and teachers. The book focuses especially on education of young children (4 - 8 years old) in primary school and presents the underpinning concepts of this approach, and chapters on examples of good practices in a variety of subject matter areas, such as literacy (vocabulary acquisition, reading, writing), mathematics, and arts. Successful implementation of Developmental Education in the classroom strongly depends on dynamic assessment and continuous observations of young pupils' development. Strategies for implementation of both the teaching practices and assessment strategies are discussed in detail in the book.

What about teaching to the test--or to the vast array of standards being mandated? How do we effectively use cooperative learning--and direct instruction--and alternative assessment? In this volume, top experts in the field of delinquency discuss the implications of the findings of the Pittsburgh Youth Study for current conceptualizations of antisocial behavior. Violence and Serious Theft is unique in that it combines the strengths of three disciplines to explain delinquency in young people: developmental psychopathology, criminology, and public health. The book addresses questions in two main areas: serious offending as an outcome over time and developmental aspects of serious offending; and factors which explain why some young males become violent and/or commit serious crime while others do not. Violence and Serious Theft is a resource for researchers, practitioners and students in developmental, school and counseling psychology; psychopathology, psychiatry, public health and criminology.

Educators are at the epicenter of language policy in education. This book explores how they interpret, negotiate, resist, and (re)create language policies in classrooms. Bridging the divide between policy and practice by analyzing their interconnectedness, it examines the negotiation of language education policies in schools around the world, focusing on educators' central role in this complex and dynamic process. Each chapter shares findings from research conducted in specific school districts, schools, or classrooms around the world and then details how educators negotiate

policy in these local contexts. Discussion questions are included in each chapter. A highlighted section provides practical suggestions and guiding principles for teachers who are negotiating language policies in their own schools.
