Acceptance and commitment therapy

(ACT) is more than just a set of techniques for structuring psychotherapeutic treatment; it also offers a new, insightful, transdiagnostic approach to case conceptualization and to mental health in general. Learn to put this popular new psychotherapeutic model to work in your practice with this book, the first guide that explains how to

do case conceptualization within an ACT framework. ACT in Practice offers an introduction to ACT, an overview of its impact, and a brief introduction to the six core processes of ACT treatment--the six points of the hexaflex model and its pathological alter ego, the so-called inflexahex. It describes how to accomplish case conceptualizations in general and offers précis of the literature that establish the importance and value of case conceptualization. This guide also offers possible alternative case conceptualization for cases from different therapeutic traditions, a great help to therapists who come from a more traditional CBT background. Exercises throughout help you to evaluate the information you have just learned so that you may effectively

integrate ACT into your practice. Passivization and Typology OUP Oxford In 1638, a small book of no more than 92 pages in octavo was published “appresso Gioanne Calleoni” under the title “Discourse on the State of the Jews and in particular those dwelling in the illustrious city of Venice.” It was dedicated to the Doge of Venice and his counsellors, who are labelled “lovers of Truth.” The author of the book was a certain Simone (Simḥa) Luzzatto, a native of Venice, where he lived and died, serving as rabbi for over fifty years during the course of the seventeenth century. Luzzatto’s political thesis is simple and, at the same time, temerarious, if not revolutionary: Venice can put an end to its political decline, he argues, by offering the Jews a monopoly

on overseas commercial activity. This plan is highly recommendable because the Jews are “wellsuited for trade,” much more so than others (such as “foreigners,” for example). The rabbi opens his argument by recalling that trade and usury are the only occupations permitted to Jews. Within the confines of their historical situation, the Venetian Jews became particularly skilled at trade with partners from the Eastern Mediterranean countries. Luzzatto’s argument is that this talent could be put at the service of the Venetian government in order to maintain – or, more accurately, recover – its political importance as an intermediary between East and West. He was the first to define the role of the Jews on the basis of their economic and social functions,

disregarding the classic categorisation of Judaism’s alleged privileged religious status in world history. Nonetheless, going beyond the socio-economic arguments of the book, it is essential to point out Luzzatto’s resort to sceptical strategies in order to plead in defence of the Venetian Jews. It is precisely his philosophical and political scepticism that makes Luzzatto’s texts so unique. This edition aims to grant access to his works and thought to English-speaking readers and scholars. By approaching his texts from this point of view, the editors hope to open a new path in research into Jewish culture and philosophy that will enable other scholars to develop new directions and new perspectives, stressing the interpenetration between Jews and the surrounding Christian and

secular cultures.

This book examines new forms of communication that have emerged through the interactive capabilities of the Internet, in particular online advertising and web advertisements. It develops a new model of online communication, incorporating mass communication and interpersonal communication. Interactive mass communication redefines the roles of online communication partners who are confronted with a higher degree of complexity in terms of hypertextual information units. In web advertising, this new aspect of interactivity is linguistically reflected in different types of personal address forms, directives,

and "trigger words". This study also analyzes the different strategies of persuasion with which web ads try to initiate their activation. Web Advertising provides essential information on the language of web advertisements for academics, researchers and students in the fields of hypertext-linguistics, advertising, communication and media studies.

The research on children with autism spectrum disorders (ASD) is extensive and growing. Although these conditions are recognized as affecting the entire lifespan, the literature on ASD after childhood is limited and has not been brought together in a single volume in over a decade. Adolescents and Adults

with Autism Spectrum Disorders fills this knowledge gap by focusing on needs and difficulties unique to these stages of development. Expert contributors offer cogent reviews of complex issues, from education to employment, leisure activities to illegal behaviors, mental health issues to medical health concerns. The latest findings in key areas, such as psychosocial and residential treatments, social skills programs, epidemiology, the impact of ASD on families, are examined in detail. Throughout the volume, coverage focuses on areas requiring improved models of assessment, updated data, new interventions and increased support services. Featured topics include: Transition from high school to adulthood for adolescents and young adults with

ASD. Innovative programming to support college students with ASD. Romantic relationships, sexuality and ASD. Treatment of mental health comorbidities. Assessment and treatment planning in adults with ASD. The range of outcomes and challenges in middle and later life. Adolescents and Adults with Autism Spectrum Disorders is a must-have reference for a wide range of clinicians and practitioners – as well as researchers and graduate students – in clinical child, school and developmental psychology; child and adolescent psychiatry; social work; rehabilitation medicine/therapy; education and general practice/family medicine. It will also serve as an important resource for parents and caregivers with its focus on translating

the current state of knowledge relevant to understanding adolescents and adults with ASD into practical and relevant recommendations on how best to support them.

History of Architectural Conservation Sophia and Alex (Chinese)

A History of Architectural Conservation expands knowledge about the conservation of ancient monuments, works of art and historic buildings. It includes the origins of the interest in conservation within the European context, and the development of the concepts from Antiquity and the Renaissance to the present day. Jokilehto illustrates how this development has influenced international collaboration in the protection and conservation of cultural heritage, and how it has formed the principal concepts and approach to conservation and restoration in today's

multi-cultural society. This book is based on archival research of original documents and the study of key restoration examples in countries that have influenced the international conservation movement. Accessible and of great interest to students and the general public it includes conservation trends in Europe, the USA, India, Iran and Japan.

This book explores the cultural conditions that led to the emergence and proliferation of Saint Hermenegildo as a stage character in the sixteenth and seventeenth centuries. It considers how this saint became a theatrical trope enabling the Society of Jesus to address religious and secular concerns of the

post-Tridentine Church, and to discuss political issues such as the supremacy of the pope over the monarch and the legitimacy of regicide. The book goes on to explain how the Hermenegildo narrative developed outside of Jesuit colleges, through works by professional dramatist Lope de Vega and Mexican nun Juana Inés de la Cruz. Stefano Muneroni takes a global approach to the staging of Hermenegildo, tracing the character's journey from Europe to the Americas, from male to female authors, and from a sacrificial to a sacramental paradigm where the emphasis shifts from bloodletting to spiritual salvation. Given its interdisciplinary approach, this book is geared toward scholars and students of theatre history, religion and drama, early modern theology, cultural

studies, romance languages and literature, and the history of the Society of Jesus..

In this volume, psychologists and communication experts present theory on understanding and predicting how learning occurs through media consumption. As the impact of traditional advertising has declined over the last couple of decades, marketers have scrambled to find other ways to effectively communicate with

consumers. Among other approaches, marketers have utilized various forms of product integration. Product integration is mixing a commercial message in with the non-commercial message via TV, movie, video, and other entertainment venues. This book will be of interest to students and researchers in psychology, marketing, communication, advertising, and consumer behavior.

The small but influential community of

Italians that took shape in England in the fifteenth century initially consisted of ecclesiastics, humanists, merchants, bankers and artists. However, in the wake of the English Reformation, Italian Protestants joined other continental religious refugees in finding Tudor England to be a hospitable and productive haven, and they brought with them a cultural perspective informed by the ascendancy among European elites of their vernacular language. This study maintains that questions of language are at the centre of the circulation of ideas in the early modern period. Wyatt first examines the agency of this shifting community of immigrant Italians in the transmission of Italy's cultural patrimony and its impact on the nascent English nation; Part Two turns to the exemplary

career of John Florio, the Italo-Englishman who worked as a language teacher, lexicographer and translator in Elizabethan and Jacobean England. House of Cards Henry Holt and Company Imagine a world in which words have colors and sounds have tastes. In his autobiography, Vladimir Nabokov described this neurological phenomenon, which helped inspire David Hockney's sets for the Metropolitan Opera. Richard Feynman experienced it while formulating the quantum theory that won him a Nobel Prize. Sometimes described as a blending of perceptions, synesthesia occurs when only one of the five senses is aroused but two respond. Journalist Patricia Lynne Duffy draws from her own struggles and breakthroughs with synesthesia to help

us better understand the condition, while describing some of the major theories surrounding it. An illuminating examination of the world of synesthetes, Blue Cats and Chartreuse Kittens is a must-read for science and health buffs, as well as for artists, writers, and creative thinkers-or anyone generally intrigued by the brain, the senses, and perception.

interact in non-trivial ways. It has been under debate what the actual range of interaction is and how we can most appropriately represent this in grammatical theory. Discourse on the State of the Jews Verbal behavior analysis. Indurre e ampliare nuove capacità verbali in bambini con ritardo del linguaggio Verbal Behavior Analysis Inducing and Expanding New Verbal Capabilities in Children with Language Delays The US Dept. of Education, in

conjunction with the US Dept. of Health and Human Services, recently unveiled a \$50 million effort to expand research on early childhood cognitive development. A key issue identified requiring more information and research was the education and professional development of educators. Along these lines, Doug Greer has prepared a book discussing how best to teach, how to design functional curricula, and how to support teachers in using state-of-the-art science instruction materials. The book provides important information both to trainers of future teachers, current teachers, and to supervisors and policy makers in education. To trainers there is information on how to motivate, mentor, and instruct in-service teachers to use the best scientifically based teaching

strategies and tactics. To in-service teachers, there is information on how to provide individualized instruction in classrooms with multiple learning and behavior problems, school interventions to help prevent vandalism and truancy, and how curricula and instruction can be designed to teach functional repertoires rather than inert ideas. To policy makers and supervisors, the book discusses how to determine the effectiveness of curricular initiatives toward meeting mandated standards in national assessments. Doug Greer was recently awarded the Fred S. Keller Award for Distinguished Contributions to Education by APA for the research and application of the material covered in this book. School programs incorporating the material used in this book have

produced 4-7 times more learning outcomes for students than control and baseline educational programs (see www.cabas.com) The book provides research-based and field-tested procedures for: * Teaching students of all ability levels ranging from preschool to secondary school * How to teach special education students in the context of a regular classroom * Best practices for all teachers to teach more effectively * Means of monitoring and motivating teachers' practices * A comprehensive and system-wide science of teaching—post modern-postmodern! * Tested procedures that result in four to seven times more learning for all students * Tested procedures for supervisors to use with teachers that result in significant student learning *

Tested procedures for providing the highest accountability * A systems approach for schooling problems that provide solutions rather than blame * Parent approved and parent requested educational practices * Means for psychologists to work with teachers and students to solve behavior and learning problems * A comprehensive systems science of schooling * An advanced and sophisticated science of pedagogy and curriculum design * Students who are not being served with traditional education can meet or exceed the performance of their more fortunate peers, * Supervisors can mentor teachers and therapists to provide state of the science instruction * Parent education can create a professional setting for parents, educators, and

therapists to work together in the best interests of the student, * Teachers and supervisors who measure as they teach produce significantly better outcomes for students, * Systemic solutions to instructional and behavioral problems involving teachers, parents, supervisors provide means to pursue problems to their solution, * A science of teaching, as opposed to an art of teaching, can provide an educational system that treats the students and the parents as the clients.

Der Politiker Aldo Moro wurde 1978 von der terroristischen Organisation "Rote Brigaden" entführt und getötet. Im Verlauf der Ereignisse stilisierten die

Medien Moro zum "Staatsmartyrer". Der Band geht der hochaktuellen Frage nach, welche Rolle das ursprünglich christliche Konzept des Martyrers in der Spannung zwischen demokratischem Staat und Terrorismus spielt. Was leistet dieser Begriff aus der christlichen Antike im modernen gesellschaftspolitischen Diskurs? Welche Veränderungen hat der Terminus "Martyrer" in der Europäischen Religions- und Kulturgeschichte durchgemacht? Anhand von medialen Quellen zum Fall Moro wird eine wesentliche Phase der nachkriegszeitlichen Politik in Italien rekonstruiert. Die Studie eröffnet einen interdisziplinär angelegten theoretischen Horizont, um die Rolle religiöser Motive im gesellschaftspolitischen Kontext zu verstehen. Sie bringt eine zentrale neue

Dimension in die Sakularisierungsdebatte ein, bei der Sakularisierung als neue Konfiguration von Politik und Religion verstanden wird. Beyond Common Sense Walter de Gruyter GmbH & Co KG

In *The Trauma Model*, Dr. Ross provides a detailed, scientifically testable method of mental illness. He defines the problem of comorbidity as the central conceptual problem in psychiatry at the beginning of the twenty-first century, then solves it using the logic and predictions of the trauma model. A person with extensive comorbidity suffers from many different psychiatric disorders at the same time including depression, substance abuse, anxiety and eating disorders, psychotic symptoms and personality disorders. Most individuals requiring inpatient psychiatric treatment fit the clinical profile of the trauma model. Dr. Ross also provides a detailed description of

trauma therapy, which is suitable for a wide range of addictions, self-destructive behaviors and symptoms. General

principles and specific techniques are described and illustrated with dialogue from composite case examples.
