Children in today's world
are inundated with
information about who to
be, what to do and how to
live. But what if there was
a way to teach children
how to manage priorities,
focus on goals and be a
positive influence on the

world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By

the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen

the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well. *The Natural World* National Academies Press Presents a multifaceted model of understanding, which is based on the premise that people can demonstrate understanding in a variety of ways.

The Academic Encounters

Second edition series uses a sustained content approach to teach skills necessary for taking academic courses in English. There are two books for each content area. Academic Encounters Level 1 Student's Book Listening and Speaking: The Natural World engages students through interviews and academic lectures on stimulating topics from the fields of earth science and biology. Topics include the atmosphere, Earth's water supply, and life processes common to

all living things. Students develop crucial listening and note-taking skills, discuss content, conduct interviews, and make presentations. A Student DVD includes all of the academic lectures. The topics correspond with those in Academic Encounters Level 1 Reading and Writing: The Natural World. The books may be used independently or together.

area. Academic Encounters Level 3 Student's Book Listening and Speaking with DVD Life in Society engages students through interviews and academic lectures on stimulating topics from the field of sociology. Topics include culture shock, gender roles, and ways of solving crime. Students develop crucial listening and note-taking skills, discuss content, conduct interviews, and make presentations. A Student DVD includes all of the academic lectures. Topics

correspond with those in Academic Encounters Level 3 Student's Book Reading and Writing Life in Society. The books may be used independently or together. Grammar and Beyond Level 2 Student's Cambridge University Press The Academic Encounters Second edition series uses a sustained content approach to teach skills necessary for taking academic courses in English. There are two books for each content area. Academic

Encounters Level 4 Reading and Writing Human Behavior engages students with authentic academic readings from college textbooks, photos, and charts on stimulating topics from the fields of psychology and communications. Topics include health, intelligence, and interpersonal relationships. Students develop important skills such as skimming, reading for the main idea, reading for speed, understanding vocabulary in context, summarizing,

and note-taking. By completing writing assignments, students build academic writing skills and incorporate what they have learned. The topics correspond with those in Academic Encounters Level 4 Listening and Speaking Human Behavior. The books may be used independently or together.

Cambridge University Press

Based on extensive research, Grammar and Beyond ensures that students study accurate

information about grammar and apply it in their own speech and writing. This is the first half of Student's Book, Level 2. The Student's Book is the main component of Grammar and Beyond. In each unit, students study the grammar in a realistic text and through charts and notes informed by a billion-word corpus of authentic language. The exercises provide practice in reading, writing, listening, and speaking, making this a complete course. Students learn to

avoid common mistakes, based on an extensive corpus of learner language. Each unit concludes with a Grammar for Writing section, in which students apply the grammar in an extended writing task.

American Studies

Cambridge University Press

This collection is the first of its kind, bringing together Holocaust educational researchers as well as school and museum educators from across the globe, to discuss the potentials of

Holocaust education in relation to primary school children. Its contributors are from countries that have a unique relationship with the Holocaust, such as Germany, Israel, neutral Switzerland, and Allied countries outside the UK. Their research provides new insight into the diverse ways in which primary aged students engage with Holocaust education. Chapters explore the impact of teaching the Holocaust to this age group, school and museum teaching pedagogies, and primary

students' perspectives of the Holocaust. This book will appeal to school and museum educators of primary aged students whose work requires them to teach the Holocaust, Citizenship (or Civics) or Human Rights Education. Since the turn of the twenty-first century there has been a transformation in school and museum-based Holocaust education. This book clearly demonstrates that primary education has been included in this transformation. Life in Society Cambridge

Reading, Study Skills, and Writing John Wiley & Sons The Academic Encounters Second edition series uses a sustained content approach to teach skills necessary for taking academic courses in English. There are two books for each content area. Academic Encounters Level 2

Student's Book Reading and Writing: American Studies engages students through academic readings, photos, and charts on stimulating topics from U.S. History and Culture. Topics include the foundations of government, equal rights, and the American Dream. Students develop important skills such as skimming, reading for the main idea, reading for speed, understanding vocabulary in context, summarizing, and note-taking. By completing writing assignments,

students build academic writing skills and incorporate what they have learned. The topics correspond with those in Academic Encounters Level 2 Listening and Speaking: American Studies. The books may be used independently or together.

An Examination of Factors That Influence Academic Entrepreneurialism
Among Community College Faculty Free Press Academic Listening Encounters: Life in Society develops students listening and note taking

skills using authentic interviews and classroom lectures. The Student's Book develops students' listening and note-taking skills using a variety of recorded materials. It introduces them to stimulating topics within the field of sociology, including high-interest topics such as peer pressure, gender roles, and the influence of the media. Listening materials include a variety of warm-up activities, informal interviews, and a formal academic lecture for every chapter. Students

practice crucial listening skills, such as listening for main ideas, listening for examples, and listening for organizational phrases. The materials also serve as stimuli for discussion and note-taking activities. Pre-listening tasks expose students to vocabulary they will encounter in the interviews and lectures, and help them build background knowledge of the topic. Topics correspond with those in *Academic Encounters: Life in Society*, and these books can be used

together as a four skills course; however, they function equally well as stand-alone texts. An audio CD of the academic lectures, an important part of the audio program, is included with the Student's Book to provide students with additional listening practice. A *Life in Society 2-Book Set* is available (ISBN 0-521-546702). It includes one copy of the Student's Reading Book and one copy of the Student's Listening Book at a discounted price. *Academic Listening*

Listening, Note Taking, and Discussion Cambridge University Press

Humans, especially children, are naturally curious. Yet, people often balk at the thought of learning science--the "eyes glazed over" syndrome. Teachers may find teaching science a major challenge in an era when science ranges from the hardly imaginable quark to the distant, blazing quasar. Inquiry

and the National Science Education Standards is the book that educators have been waiting for--a practical guide to teaching inquiry and teaching through inquiry, as recommended by the National Science Education Standards. This will be an important resource for educators who must help school boards, parents, and teachers understand "why we can't teach the way we used to." "Inquiry" refers to the diverse ways in which scientists study the natural world and in

which students grasp science knowledge and the methods by which that knowledge is produced. This book explains and illustrates how inquiry helps students learn science content, master how to do science, and understand the nature of science. This book explores the dimensions of teaching and learning science as inquiry for K-12 students across a range of science topics. Detailed examples help clarify when teachers should use the inquiry-based approach and how

much structure, guidance, and coaching they should provide. The book dispels myths that may have discouraged educators from the inquiry-based approach and illuminates the subtle interplay between concepts, processes, and science as it is experienced in the classroom. Inquiry and the National Science Education Standards shows how to bring the standards to life, with features such as classroom vignettes exploring different kinds of inquiries for

elementary, middle, and high school and Frequently Asked Questions for teachers, responding to common concerns such as obtaining teaching supplies. Turning to assessment, the committee discusses why assessment is important, looks at existing schemes and formats, and addresses how to involve students in assessing their own learning achievements. In addition, this book discusses administrative assistance, communication with

parents, appropriate
teacher evaluation, and

other avenues to
promoting and supporting

this new teaching
paradigm.
