Publishers Empowering a community takes more than organizing and mobilizing its people; it takes a simple, yet radical, notion that consensus can be reached by creating mutual self interest between key individuals in the community and players of interest. In Consensus Organizing: Building Communities of Mutual Self Interest, author Mike Eichler shows how even poor

and disempowered communities can achieve lasting results by implementing some key consensus organizing strategies. Through personal, lively, and relevant examples, Eichler takes the reader on a road trip through various communities and shows how collectively they were able to reach lasting results by finding key areas where consensus could be

reached. Key features: The author shares his twenty-five years of experience as a community organizer, including the development of a national effort to train young people as consensus organizers in diverse locations such as Las Vegas, New Orleans, and New York City. Demonstrates how consensus organizing can be applied to a variety of settings, including public education, housing,

economic development, health and crime. Gives readers the opportunity to learn more about themselves: It helps students to see the other side of any situation and understand how common ground can be achieved. It is written in a student-friendly, conversational manner, which will make students feel as if they have taken a journey with the author, struggled with the various communities,

won the victories with the disempowered, and had a few laughs along the way. Intended audience: This book can be used as a core textbook for courses in community organizing and as a supplemental volume in various macro social work courses on community practice. It can also be used in departments of social work, urban planning, public administration, and public

health.

Through stories, analysis, impassioned argument-even song lyrics-Si Kahn and Elizabeth Minnich show that corporations are, by their very nature, unable to fulfill effectively what have traditionally been the responsibilities of government.

They make a powerful case that the market is not the measure of all things, and that a vital public sector is an indispensable component of a healthy democracy.

"The world is changing rapidly and the practice of community organizing needs to change with it. Representing both an homage to, and a departure from the "alinsky

traditions" of organizing, Consensus Organizing offers techniques that are specifically designed for urban and rural communities struggling to succeed in the global economy and the information age. Ohmer and DeMasi are experienced organizers who offer a relentlessly thorough examination of the process of bringing diverse communities together to

make change and to bridge the ethnic and economic divisions that keep many communities from succeeding."

Priya Parker argues that the gatherings in our lives are lackluster and unproductive--which they don't have to be. We rely too much on routine and the conventions of gatherings when we should focus on distinctiveness and the people involved. At a time when coming together is more important than ever, Parker sets forth a human-centered approach to

gathering that will help everyone create meaningful, memorable experiences, large and small, for work and for play. Drawing on her expertise as a facilitator of high-powered gatherings around the world, Parker takes us inside events of all kinds to show what works, what doesn't, and why. She investigates a wide array of gatherings--conferences, meetings, a courtroom, a flash-mob

party, an Arab-Israeli summer camp--and explains how simple, specific changes can invigorate any group experience. The result is a book that's both journey and guide, full of exciting ideas with real-world applications. *The Art of Gathering* will forever alter the way you look at your next meeting, industry conference, dinner party, and backyard barbecue--and how you host and attend

them.

The Art Therapist's Guide to Social Media offers the art therapy community a guide that addresses content related to social media use, its growing influence, and the impact social networking has on the profession and work of art therapists. This book presents a framework of relevant theories, best practices, and

examples to explore existing and emerging areas of social networking's power for art therapists as practitioners and artists. Divided into three sections that highlight the themes of connection, community, and creativity, chapters explore timely topics such as the professional use of social media, ethical considerations, potential benefits and challenges, and strategies to embrace the possibilities

that social media can create for the field worldwide. Art therapists in training, art therapy educators and supervisors, and practicing art therapists will find content in this text helpful for their learning and professional practice.

University of Chicago Press  
"This country's leading hell-raiser" (The Nation) shares his impassioned counsel to young radicals

on how to effect constructive social change and know “the difference between being a realistic radical and being a rhetorical one.” First published in 1971 and written in the midst of radical political developments whose direction Alinsky was one of the first to question, this volume exhibits his style at its best. Like Thomas Paine before him, Alinsky was able to

combine, both in his person and his writing, the intensity of political engagement with an absolute insistence on rational political discourse and adherence to the American democratic tradition.

### **Going Public**

Basic Books  
This book will have two purposes. First, the book will educate readers on how research can be used to help their organization more effectively reach its

goals. Second, it will educate the reader on how to conduct different methods of research and use the findings to improve their product, find customers and develop effective promotion. Creative Community Organizing

A New York city neighborhood once called “the beginning of the end of civilization” is where Michael Gecan starts. Hired by residents to

help them save their community, he and local leaders spend more than a decade wrestling New York politicians in an impassioned effort against all odds that brings in five thousand new homes. From bad behavior by Ed Koch to complicated negotiations with Rudy Giuliani, Gecan tells the inside story of how the city really works, and how any organized group of citizens can

wield power in seemingly unmovable bureaucracies. Gecan's unwavering vision of the value of public action has roots in a rough childhood in Chicago, where he witnessed extortion by the mob and a tragic fire in his Catholic grade school that left ninety-two children and three nuns dead. In his inspiring story of the will to claim the full benefits of citizenship, Gecan offers unforgettable

lessons that every American should know: What is the best way to talk to politicians? What resources do all communities need to create change? What kinds of public actions really work?

**Collective Action for Social Change** SAGE  
In the summer of 2008, nearly fifty thousand people traveled to Nevada's Black Rock Desert to participate in the

countercultural arts event Burning Man. Founded on a commitment to expression and community, the annual weeklong festival presents unique challenges to its organizers. Over four years Katherine K. Chen regularly participated in organizing efforts to safely and successfully create a temporary community in the middle of the desert under the hot August sun. Enabling

Creative Chaos tracks how a small, underfunded group of organizers transformed into an unconventional corporation with a ten-million-dollar budget and two thousand volunteers. Over the years, Burning Man's organizers have experimented with different management models; learned how to recruit, motivate, and retain volunteers; and developed strategies to handle

regulatory agencies and respond to media coverage. This remarkable evolution, Chen reveals, offers important lessons for managers in any organization, particularly in uncertain times.

### **The Art of Gathering**

Ballantine Books  
In the US, there is a wide-ranging network of at least 370 food banks, and more than 60,000 hunger-relief organizations such as food

pantries and meal programs. These groups provide billions of meals a year to people in need. And yet hunger still affects one in nine Americans. What are we doing wrong? In *Reinventing Food Banks and Pantries*, Katie Martin argues that if handing out more and more food was the answer, we would have solved the problem of hunger decades ago. Martin instead presents a new model for

charitable food, one where success is measured not by pounds of food distributed but by lives changed. The key is to focus on the root causes of hunger. When we shift our attention to strategies that build empathy, equity, and political will, we can implement real solutions. Martin shares those solutions in a warm, engaging style, with simple steps that anyone working or

volunteering at a food bank or pantry can take today. Some are short-term strategies to create a more dignified experience for food pantry clients: providing client choice, where individuals select their own food, or redesigning a waiting room with better seating and a designated greeter. Some are longer-term: increasing the supply of healthy food, offering job training programs, or

connecting clients to other social services. And some are big picture: joining the fight for living wages and a stronger social safety net. These strategies are illustrated through inspiring success stories and backed up by scientific research. Throughout, readers will find a wealth of proven ideas to make their charitable food organizations more empathetic

and more effective. As Martin writes, it takes more than food to end hunger. Picking up this insightful, lively book is a great first step. [Organizing for Social Change](#) SAGE Publications Over the past fifteen years, associations throughout the U.S. have organized citizens around issues of equality and social justice, often through local churches. But in contrast to President Bush's vision of faith-based

activism, in which groups deliver social services to the needy, these associations do something greater. Drawing on institutions of faith, they reshape public policies that neglect the disadvantaged. To find out how this faith-based form of community organizing succeeds, Richard L. Wood spent several years working with two local groups in Oakland, California—the faith-based Pacific Institute for

Community Organization and the race-based Center for Third World Organizing. Comparing their activist techniques and achievements, Wood argues that the alternative cultures and strategies of these two groups give them radically different access to community ties and social capital. Creative and insightful, Faith in Action shows how community activism and religious

organizations can help build a more just and democratic future for all Americans. **The Art of Community** John Wiley & Sons WINNER OF THE PORCHLIGHT BUSINESS BOOK AWARD • “A delightful, compelling book that offers a dazzling array of practical, thoughtful exercises designed to spark creativity, help solve problems, foster connection,

and make our lives better.”—Gretchen Rubin, New York Times bestselling author and host of the Happier podcast In an era of ambiguous, messy problems—as well as extraordinary opportunities for positive change—it’s vital to have both an inquisitive mind and the ability to act with intention. Creative Acts for Curious People is filled with ways to build those skills with

resilience, care, and confidence. At Stanford University's world-renowned Hasso Plattner Institute of Design, aka "the d.school," students and faculty, experts and seekers bring together diverse perspectives to tackle ambitious projects; this book contains the experiences designed to help them do it. A provocative and highly visual companion,

it's a definitive resource for people who aim to draw on their curiosity and creativity in the face of uncertainty. Teeming with ideas about discovery, learning, and leading the way through unknown creative territory, Creative Acts for Curious People includes memorable stories and more than eighty innovative exercises. Curated by executive director Sarah Stein

Greenberg, after being honed in the classrooms of the d.school, these exercises originated in some of the world's most inventive and unconventional minds, including those of d.school and IDEO founder David M. Kelley, ReadyMade magazine founder Grace Hawthorne, innovative choreographer Aleta Hayes, Google chief innovation evangelist Frederik G. Pferdt, and many more.

To bring fresh approaches to any challenge—world changing or close to home—you can draw on exercises such as Expert Eyes to hone observation skills, How to Talk to Strangers to foster understanding, and Designing Teams to build creative leadership. The activities are at once lighthearted, surprising, tough, and impactful—and reveal how the hidden dynamics of

design can drive more vibrant ways of making, feeling, exploring, experimenting, and collaborating at work and in life. This book will help you develop the behaviors and deepen the mindsets that can turn your curiosity into ideas, and your ideas into action. **The Creative Community Builder's Handbook** OR Books This latest work by legendary social activist, musician, and author Kahn
