SAVANAH CONNER

Higher Education in China OECD Publishing
 2015 was without any doubt the year of migrations. Over the subsequent two years, we have certainly seen the migration flows reduce, but it was never going to be possible to halt them altogether. From the outset of this phenomenon, numerous academics and researchers have dedicated themselves to the topic. They analyse the causes, the course of the migration flows, parallels and impacts, as well as possible scenarios of the migration movement. A wide-reaching debate has evolved on the topic of migration, to which the authors in this anthology were also keen to contribute conflict regulations attempts. In this publication, historians, political scientists, philosophers, sociologists, geographers, human geographers, economists, literary scientists, legal scholars, theologians and psychiatrists from a range of European and Non-European countries have each contributed from their individual standpoints.

Regionalization and Harmonization in TVET OECD Publishing
 The book focuses on Indonesia's most pressing labor market

challenges and associated policy options to achieve higher and more inclusive economic growth. The challenges consist of creating jobs for and the skills in a youthful and increasingly better educated workforce, and raising the productivity of less-educated workers to meet the demands of the digital age. The book deals with a range of interrelated topics---the changing supply and demand for labor in relation to the shift of workers out of agriculture; urbanization and the growth of megacities; raising the quality of schooling for new jobs in the digital economy; and labor market policies to improve both labor standards and productivity.

Education for Liberation Pearson South Africa
 Investment in higher education in OECD countries has increased substantially over the last 20 years, as a result of higher enrolment, increasing costs, government priorities related to skills, and research and innovation. Faced with economic and fiscal challenges, public authorities across the OECD need now more than ever to make thoughtful decisions about how to mobilise, allocate and manage financial and human resources in higher education.

How to Deal with Refugees? F.A. Davis
 The situation for career counselors today is particularly complex.

Transformational areas such as the Corona pandemic, the climate crisis, the economic situation, and an aging population are bringing rapid changes to the demands of the labor market. This book addresses the challenges in the European labor market from the multinational perspective of career counselors. It includes multiple contributions from different countries that address the country-specific challenges that generate support and development needs for counselors. Measures, solution strategies and future forecasts are included. The contributions are based on the Academia+ project, in which a total of three online training series for career counselors from across Europe on the topics of "Counseling Migrants and Refugees," "Future Jobs," and "Demographic Change" were conducted and evaluated. The book is intended to be a guide for professionals in the vocational training field and to facilitate and support a practice-oriented initial interview from the counselor's point of view.

Technical and Vocational Teacher Education and Training in International and Development Co-Operation Oxford Business Group

The 2017 edition of International Migration Outlook, the 41st edition, analyses recent developments in migration movements and policies in OECD countries and selected non-member countries.

OECD Territorial Reviews: Småland-Blekinge 2019 Monitoring Progress and Special Focus on Migrant Integration Fibre2Fashion

This book represents a unique compilation of essays written by scholars, national reformers on the right and the left, and adults who pursued an education while incarcerated, to guide local, state and national conversations about justice, rehabilitation and public safety.

Springer Nature

This report provides an assessment of Viet Nam's secondary education sector, including technical and vocational education training programs. The report reviews sector achievements and challenges as well as the Government of Viet Nam's strategy and policies. It also outlines how the Asian Development Bank (ADB) and other development partners have contributed to the sector. The report provides recommendations on measures to boost access to secondary education and to improve its overall quality and management.

New Models for Technical and Vocational Education and Training VTAC

Following on from the 2012 Territorial Review of Småland Blekinge, this Monitoring Review assesses the main regional policy changes since 2012 and the extent to which the recommendations have been implemented. It gives full consideration to the changing context in the region, with improved ...

ICTR 2021 4th International Conference on Tourism Research OECD Publishing

Technical and vocational education and training at technical schools are major contributing factors in combating poverty, unemployment, and inequality. The primary purpose of technical and vocational education and training is to prepare students and learners for the world of work and for a smooth transition from education institutions into the workplace. As the Fourth Industrial Revolution continues to create more radical changes in the labor market, experts are calling for a reform of education, including vocational education and training and adult and professional education. *New Models for Technical and Vocational Education and Training* is an essential scholarly research book that examines TVET and CET colleges and programs that provide intermediate skills to enhance students' chances of employability and entrepreneurship in Industry 4.0. The book explores

knowledge in respect to workforce preparation, digital skills development, teaching and learning of TVET, flexibility and articulation of TVET to respond to work-integrated learning, and reskilling and upskilling to avoid skill mismatches. It is ideal for TVET schools, academicians, curriculum designers, managers, training officers, administrators, vocational professionals, researchers, and students.

Viet Nam Secondary Education Sector Assessment, Strategy, and Road Map LIT Verlag Münster

This book is the first monograph to systematically introduce readers to technology and vocational education and training in ASEAN countries. It details the current state of development and key development trends regarding technology and vocational education and training in the ten ASEAN countries. For each ASEAN country, the book addresses the history, status quo, characteristics, reform and development trends in technology and vocational education and training. The content mainly focuses on technology and vocational education and training systems, vocational qualification frameworks, technology and vocational education and training related personnel, etc. All the latest data presented here is drawn from the newest official website and research reports, accurately reflecting the development status of ASEAN countries and helping us make better forecasts regarding its future. This book offers a valuable reference guide for academic research in technology and vocational education and training. It can also be used as a textbook for postgraduate courses in technology and vocational education and training, as well as training material for various vocational education teachers and managers.

Advanced Practice Nursing FCS Workshop practice L2

Meet all the challenges of professional practice—whatever your specialty or environment. Noted nursing professionals and educators explore all of the non-clinical roles and responsibilities of an APN and chart a course that will enable you to meet them successfully. You'll follow the evolution of the APN's role from a historical perspective to the present and examine the issues and challenges you'll encounter in the future.

Conference Papers: Overcoming Barriers to Educational Disadvantage (25 June 2008) Jones & Bartlett Learning

This book assesses the influence of the international organization UNESCO on the development of national Technical and Vocational Education and Training (TVET) systems in the Southern African Community Region (SADC), focusing particularly on Botswana and Namibia. Designed around UNESCO's Better Education for Africa's Rise (BEAR) project, the study is an excellent example of applied policy research. Analysis is from the perspective of key stakeholders including UNESCO headquarters and field offices, Ministries of Education and of Labor, employers and employees, education and training institutions, international partners and more. Both qualitative and quantitative evidence are used to provide a comparative overview, and the author also reveals the current state of data on skills. Readers will discover common goals and challenges across the nations but also a common lack of action to measure the impact and influence that UNESCO's programs have had at a national level, prior to this study. Were the newly implemented educational policies successful or not? If the public policies failed, why was that? These chapters shed light on such questions and how UNESCO's contribution influenced the national development processes, in the context of globalization processes and trends of global mass education. The book has much to offer for both scholars and those working in UN agencies or national governments who seek to develop education systems and better link them to the world of work.

Research Anthology on Vocational Education and Preparing Future Workers Springer Nature

Labour markets are becoming more dynamic in response to pressures from globalisation, new technologies and trade agreements, as well as cross-border migration, inter-generation differences, changing education imperatives and employer expectations. By focusing on several Asia Pacific countries, this book explores the differences in their workforces: ageing, or abundant in labour but lacking in skilled employees. One similarity these countries share is the difficulty in attracting and retaining employees with the required skillset and capabilities, and these constraints can stymie national economic growth and long term development. This book brings together national and international perspectives on employability challenges faced by selected countries in the Asia Pacific region. While the region is forecast to enjoy high growth in the coming decade, a recurring challenge is addressing skill shortages and ensuring effective transition from training colleges and universities into employment. Consequently, the book focuses on the roles of multiple stakeholders, primarily: governments, education providers and employers – in more effectively addressing these key socio-economic challenges.

Indonesia European Alliance for Innovation

In recent years trade and investment in Myanmar have soared, buoyed by ongoing efforts to liberalise the economy and a successful political transition in November 2015 that saw the National League for Democracy become the country's first civilian-led government elected to power in modern history. Political reforms have brought significant economic benefits, as the US government moved to lift burdensome sanctions that had weighed on investor sentiment and trade growth. With the administration now moving to implement a host of domestic reforms, loosen internal trade restrictions and draft a new investment law, growth is expected to resume apace following a slowdown during the election year.

State, Foreign Operations, and Related Programs Appropriations for 2016 Government Printing Office

This book offers international readers a comprehensive introduction to higher education in China, and will help readers around the globe make sense of the huge and complex machinery that makes up the university and college sector in China today. It accompanies readers step by step, allowing them to understand the most important aspects of this sector in China – its history and development, its scope and structure, its operational system and management, and its enrollment and employment processes. It also provides an overview of the various levels of higher education in China, namely: specialized higher education, undergraduate education, postgraduate education, research and faculty. In short, the book will tell you what higher education in China is and how it works. While economic globalization and internationalization of higher education have greatly reduced the differences among educational systems in various countries, it cannot be denied that any given country's higher education system needs to be deeply rooted in its culture and traditions. In this book, we highlight several distinctive characteristics of higher education in China, including: the ancient roots and modern history, massive scale, diversity, and centralized management and pragmatic trends.

Disability and Vocational Rehabilitation in Rural Settings OECD Publishing

This first-of-its-kind textbook surveys rehabilitation and vocational programs aiding persons with disabilities in remote and developing areas in the U.S. and abroad. Contributors discuss longstanding challenges to these communities, most notably economic and environmental obstacles and ongoing barriers to service delivery, as well as their resilience and strengths. Intersections of health, social, structural, and access disparities

are shown affecting rural disabled populations such as women, racial and sexual minorities, youth, and elders. In terms of responses, a comprehensive array of healthcare and health policy solutions and recommendations is critiqued with regard to health, employment, and service effectiveness outcomes. Included among the topics: Healthcare initiatives, strategies, and challenges for people with disabilities in rural, frontier, and territory settings. Challenges faced by veterans residing in rural communities. The Asia and Pacific region: rural-urban impact on disability. Challenges after natural disaster for rural residents with disabilities. Meeting the needs of rural adults with mental illness and dual diagnoses. Capacity building in rural communities through community-based collaborative partnerships. Disability and Vocational Rehabilitation in Rural Settings makes a worthy textbook for graduate students and upper-level undergraduates in the fields of social work, community and environmental psychology, public health, sociology, education, and geography. Its professional audience also includes vocational rehabilitation counselors serving these dynamic populations.

Globalization, Mass Education and Technical and Vocational Education and Training OECD Publishing

While many African countries lag behind the rest of the industrialised world in scientific and medical research and development, the situation is progressively improving. This is why the Society for the Advancement of Science in Africa was established, to contribute to economic advancement and sustainability through science research, education and innovation. This book provides a selection of papers from the Advancement of Science in Africa's fourth annual conference. The conference was held under the overarching theme of 'science, technology and innovation in Africa', with several important sub-themes, including, but not limited to, improving health research and disease surveillance education; collaborating in research responding to epidemic diseases with high mortality in Africa; and promoting women's interest in science careers. The collection illustrates how, although the chapter contributors come from various countries and universities, representing their own academic research, they all share a common interest in advancing science, technology and innovation in Africa.

Education Policy Outlook 2018 Putting Student Learning at the Centre Crimson Publishing

Vocational education and training (VET) programmes are facing rapid change and intensifying challenges. How can employers and unions be engaged? How can workbased learning be used? How can teachers and trainers be effectively prepared? How should postsecondary programmes be structured?...

Vocational Guidance in Europe Springer

Many students across the globe seek further education for future employment opportunities. Vocational schools offer direct training to develop the skills needed for employment. New emphasis has been placed on reskilling the workforce as technology has infiltrated all aspects of business. Teachers must be prepared to teach these new skill requirements to allow students to directly enter the workforce with the necessary competences intact. As the labor market and industry are changing, it is essential to stay current with the best teaching practices within vocational education courses to provide the future workforce with the proper tools and knowledge. The Research Anthology on Vocational Education and Preparing Future Workers discusses the development, opportunities, and challenges of vocational education courses and how to best prepare students for future employment. It presents the best practices in curriculum development for vocational education courses and analyzes student outcomes. Covering topics such as industry-academia collaboration, student satisfaction, and

competency-based education, this major reference work is an essential resource for academic administration, pre-service teachers, educators of vocational education, libraries, employers, government officials, researchers, and academicians.

International Migration Outlook 2017 Asian Development Bank

This report on Responsive School Systems is the second in a series of thematic comparative reports bringing together findings from the OECD's School Resources Review. Evolving educational objectives, changing student needs and demographic developments require school systems.
