In a world quickly becoming more virtual, human relations skills are being lost -- along with the skill of leadership. There is a vacuum of leadership in many of our major institutions: government, education, business, religion, the arts. This crisis has arisen in part because many of those institutions have been reinvented with the technological revolution we are experiencing. Scientific progress in general, and technological progress in particular, has been seen as a solution to many of our problems, and technology can distribute the answers to those problems far more quickly and efficiently across the globe. But in the midst of this technological boom, people are becoming isolated from each other. What's needed is a new type of leader -- one who can inspire and motivate others in the new virtual world while never losing sight of the timeless leadership principles. In this book, readers can learn all the secrets of leadership mastery: * Gain the respect and admiration of others using little-known secrets of the most successful leaders. * Get family, friends, and co-workers to do what you ask because they want to do it, not because they have to. * Respond effectively when under crisis using proven techniques for thinking clearly and reducing anxiety under pressure. A valuable tool that stands next to the classic *How to Win Friends and Influence People*, *Leadership Mastery* offers a proven formula for success.

Leading with Mastery and Heart Berrett-Koehler Publishers Intended for courses on leadership, practicing managers, consultants, and practitioners, this approachable guide teaches readers about how to become a leader. By blending the real-world insights of business executive Al Bolea with tested research findings provided by leadership scholar Leanne Atwater, it effectively bridges theory and practice to outline powerful leadership behaviors. Based on Bolea's original "J-Curve" model of leadership, the authors identify and describe nine essential elements for leadership mastery, including skills such as setting direction, creating key processes, and nurturing behaviors. Each chapter pairs concrete narratives with succinct research synopses to show how to expand the potential of people and organizations. A unique, experiential text, *Applied Leadership Development* engages students with self-reflection and self-assessment exercises, and encourages them in their own development as future leaders.

David Hurst has a unique knowledge of organizations' function and their failure—both in theory and in practice. He has spent twenty-five years as an operating manager, often in crises and turnaround conditions, and is also a widely experienced consultant, teacher, and writer on business. This book is his innovative integration of management practice and theory, using a systems perspective and analogies drawn from nature to illustrate groundbreaking ideas and their practical application. It is designed for readers unfamiliar with sophisticated management concepts and for active practitioners seeking to advance their management and leadership skills. Hurst's objective is to help readers make meaning from their own management experience and education, and to encourage improvement in their practical judgment and wisdom. His approach takes an expansive view of organizations, connecting their development to humankind's evolutionary heritage and cultural history. It locates the origins of organizations in communities of trust and follows their development and maturation. He also crucially tracks the decline of organizations as they age and shows how their strengths become weaknesses in changing circumstances. Hurst's core argument is that the human mind is rational in an ecological, rather than a logical, sense. In other words, it has evolved to extract cues to action from the specific situations in which it finds itself. Therefore contexts matter, and Hurst shows how passion, reason, and power can be used to change and sustain organizations for good and ill. The result is an inspirational synthesis of management theory and practice that will resonate with every reader's experience.

Finally in paperback: the New York Times bestseller by the acclaimed, bestselling author of *Start With Why* and *Together is Better*. Now with an expanded chapter and appendix on leading millennials, based on Simon Sinek's viral video "Millennials in the workplace" (150+ million views). Imagine a world where almost everyone wakes up inspired to go to work, feels trusted and valued during the day, then returns home feeling fulfilled. This is not a crazy, idealized notion. Today, in many successful organizations, great leaders create environments in which people naturally work together to do remarkable things. In his work with organizations around the world, Simon Sinek noticed that some teams trust each other so deeply that they would literally put their lives on the line for each other. Other teams, no matter what incentives are offered, are doomed to infighting, fragmentation and failure. Why? The answer became clear during a conversation with a Marine Corps general. "Officers eat last," he said. Sinek watched as the most junior Marines ate first while the most senior Marines took their place at the back of the line. What's symbolic in the chow hall is deadly serious on the battlefield: Great leaders sacrifice their own comfort--even their own survival--for the good of those in their care. Too many workplaces are driven by cynicism, paranoia, and self-interest. But the best ones foster trust and cooperation because their leaders build what Sinek calls a "Circle of Safety" that separates the security inside the team from the challenges outside. Sinek illustrates his ideas with fascinating true stories that range from the military to big business, from government to investment banking.

Wall Street Journal Bestseller From the acclaimed author of *Turn the Ship Around!*, former US Navy Captain David Marquet, comes a radical new playbook for empowering your team to make better decisions and take greater ownership. You might imagine that an effective leader is someone who makes quick, intelligent decisions, gives inspiring speeches, and issues clear orders to their team so they can execute a plan to achieve your organization's goals. Unfortunately, David Marquet argues, that's an outdated model of leadership that just doesn't work anymore. As a leader in today's networked, information-dense business climate, you don't have full visibility into your organization or the ground reality of your operating environment. In order to harness the eyes, ears, and minds of your people, you need to foster a climate of collaborative experimentation that encourages people to speak up when they notice problems and work together to identify and test solutions. Too many leaders fall in love with the sound of their own voice, and wind up dictating plans and digging in their heels when problems begin to emerge. Even when you want to be a more collaborative leader, you can undermine your own efforts by defaulting to command-and-control language we've inherited from the industrial era. It's time to ditch the

industrial age playbook of leadership. In *Leadership is Language*, you'll learn how choosing your words can dramatically improve decision-making and execution on your team. Marquet outlines six plays for all leaders, anchored in how you use language:

- Control the clock, don't obey the clock: Pre-plan decision points and give your people the tools they need to hit pause on a plan of action if they notice something wrong.
- Collaborate, don't coerce: As the leader, you should be the last one to offer your opinion. Rather than locking your team into binary responses ("Is this a good plan?"), allow them to answer on a scale ("How confident are you about this plan?")
- Commit, don't comply: Rather than expect your team to comply with specific directions, explain your overall goals, and get their commitment to achieving it one piece at a time.
- Complete, not continue: If every day feels like a repetition of the last, you're doing something wrong. Articulate concrete plans with a start and end date to align your team.
- Improve, don't prove: Ask your people to improve on plans and processes, rather than prove that they can meet fixed goals or deadlines. You'll face fewer cut corners and better long-term results.
- Connect, don't conform: Flatten hierarchies in your organization and connect with your people to encourage them to contribute to decision-making. In his last book, *Turn the Ship Around!*, Marquet told the incredible story of abandoning command-and-control leadership on his submarine and empowering his crew to turn the worst performing submarine to the best performer in the fleet. Now, with *Leadership is Language* he gives businesspeople the tools they need to achieve such

transformational leadership in their organizations. *Leaders Eat Last* John Wiley & Sons

All Leaders Face Adversity. Exceptional Leaders Thrive in It. To make the best decisions possible, middle leaders need to have a nuanced understanding of the consequences of their actions. In this pragmatic book, Adam Robbins aims to boost their role-specific expertise to help them achieve that goal - and offers them a preferable alternative to learning from their mistakes. Instead of relying on generic leadership theories, *Middle Leadership Mastery* collates perspectives from psychology and cognitive science to share evidence-informed guidance on a wide range of topics - from supporting staff and students in crisis and managing wellbeing, to quality-assuring teaching and curriculum design. Adam Robbins draws on his sixteen years' experience of teaching in a deprived area to illustrate his points with stories and anecdotes from the front line, demonstrating how middle leaders can better understand their context and deliver the best outcomes from a variety of starting points.
