This paper provides an overview of the 'state of the art' in the academic literature on EU labour migration policies. It forms part of the research agenda of Work Package 18 of the NEUJOBS project, which aims at reviewing legislation and practices regarding the labour market inclusion and protection of rights of different categories of foreign workers in European labour markets. Accordingly, particular attention is paid to the works of scholars who evaluate the status of rights of third-country national workers in relation to labour market access, employment

security, social integration, etc., in European legislation on labour immigration. More specifically, the review has selected those scholarly works that focus specifically on analyzing the manner in which policy-makers have addressed the granting of rights to non-EU migrant workers, and the manner in which policy agendas--through the relevant political and institutional dynamics--have found their translation in the legislation adopted. This paper consists of two core parts. In the first section, it reviews the works of scholars who have touched on these research questions with respect to the internal dimensions of EU labour migration policies. The second section does the same for the external dimensions of these policies. Both sections start off by

analysing the main trends in the literature that reviews these questions for the internal and external dimensions of European migration policies as a whole, and then move on to how these 'trends' can (or cannot) be found translated in scholarly writings on labour migration policies more specifically. In the final section, the paper concludes by summarising the main trends and gaps in the literature reviewed, and indicates avenues for further research.

Acting on Opportunities to Increase Financial Inclusion and Foster Development of a Transnational Economy National Academies Press
 This paper provides an overview of remittances and migration between Honduras and the United States and

analyzes the remittance regulatory and market environment, including financial inclusion strategies, transnational economic activities, and the impact of remittances on the Honduran economy. 'The U.S.-Honduras Remittance Corridor' makes policy recommendations to the authorities of Honduras and the United States, especially for regulatory reforms that promote the integrity and efficiency of money transfer businesses. We also recommend the development of financial infrastructures in rural areas for better distribution of remittances. Furthermore, we suggest that public policy should be more focused on building an environment for investment in the community and developing local businesses that export to Honduran communities abroad.

New Trends and New Methods of Analysis Springer

This report points to the growing number of labor migrants in Asia and examines the policy question of how to best safeguard their rights. Governments and stakeholders in both origin and destination countries have largely recognized their mutual interest in safeguarding labor migrants ...

[World Migration Report 2020](#) OECD Publishing

The current share of women in the world's international migrant population is close to one half. Despite the great number of female migrants and their importance for the development agenda in countries of origin, there has until recently been a striking lack of gender analysis in the economic literature on international migration and development. This volume makes a valuable contribution in this context by providing eight new studies focusing on the nexus between gender, international migration, and economic development.

Free Movement of Workers and Labour Market Adjustment Recent Experiences from OECD Countries and the European Union Lexington Books

In this open access book, experts on integration processes, integration policies, transnationalism, and the migration and development framework provide an academic assessment of the 2011 European Agenda for the Integration of Third-Country Nationals, which calls for integration policies in the EU to involve not only immigrants and their society of settlement, but also actors in their country of origin. Moreover, a heuristic model is developed for the non-normative, analytical study of integration processes and policies based on conceptual, demographic, and historical accounts. The volume addresses three interconnected

issues: What does research have to say on (the study of) integration processes in general and on the relevance of actors in origin countries in particular? What is the state of the art of the study of integration policies in Europe and the use of the concept of integration in policy formulation and practice? Does the proposal to include actors in origin countries as important players in integration policies find legitimation in empirical research? A few general conclusions are drawn. First, integration policies have developed at many levels of government: nationally, locally, regionally, and at the supra-national level of the EU. Second, a multitude of stakeholders has become involved in integration as policy designers and implementers. Finally, a logic of policymaking—and not an evidence-based scientific argument—can be said to underlie the European Commission's redefinition of integration as a three-way process. This book will appeal to academics and policymakers at international, European, national, regional, and local levels. It will also be of interest to graduate and master-level students of political science, sociology, social anthropology, international relations, criminology, geography, and history.

[Migration and Remittances Factbook 2016](#) OECD Publishing

This edited volume provides a comprehensive overview of rural-urban migration in Vietnam. It addresses a wide range of important topics, including Vietnam's household registration system (ho khau), migration trends, remittance behaviour and social networking. In addition, it examines migrants' earnings, their children's schooling, housing issues and their families' consumption behaviour in their destination cities. The book is mainly based on new data from the Australian National University's 'Study of Rural-Urban Migration in Vietnam with Insights from China and Indonesia' (VRUM) project, which identifies migrants from the large-scale, representative 'Vietnam Household Living Standards Survey' 2012 (VHLSS2012). In addition to the data from the VRUM project, the book draws on other widely used data sources to provide a comprehensive picture of rural-urban migrants in Vietnam. By highlighting the issues and challenges brought about by the large-scale rural-urban migration in Vietnam, the book helps researchers and policymakers more effectively formulate policies to respond to those challenges. Moreover, Vietnam's experience can serve as lessons learnt to other transitional/developing countries.

A Review of Theory, Evidence,

Methodology and Research Priorities World Migration Report 2020

Presents an overview of past external and internal migration trends, and explains how these are rooted in the geographic, cultural and economic context of the region, then looks at census figures for 1982 and 1991, and finally looks at circular migration from a gender perspective. Botswana had a 'culture of migration' long before labour migration started.

Recent Experiences from OECD Countries and the European Union Routledge

Even as the 2013-2017 "migration crisis" is increasingly in the past, EU countries still struggle to come up with alternative solutions to foster safe, orderly, and regular migration pathways, Europeans continue to look in the rear-view mirror. This Report is an attempt to reverse the perspective, by taking a glimpse into the future of migration to Europe. What are the structural trends underlying migration flows to Europe, and how are they going to change over the next two decades? How does migration interact with specific policy fields, such as development, border management, and integration? And what are the policies and best practices to manage migration in a more coherent and evidence-based way?

Safeguarding the Rights of Asian Migrant Workers from Home to the Workplace World Bank Publications

The media and prevailing policy discourses convey an increasingly apocalyptic image of the massive outflows of desperate Africans fleeing poverty and war at home. This study tries to achieve a more empirically and quantitatively founded understanding of the nature, scale and recent evolution of irregular West African migration to Maghreb and Europe. Furthermore, the publication evaluates how policies to manage trans-Saharan and trans-Mediterranean migration have affected current migration patterns.

Rural-Urban Migration in Vietnam Springer

World Migration Report 2020 United Nations

[Labor Migration in Asia: Increasing the Development Impact of Migration through Finance and Technology](#) United Nations

The market for high-skilled workers is becoming increasingly global, as are the markets for knowledge and ideas. While high-skilled immigrants in the United States represent a much smaller proportion of the workforce than they do in countries such as Australia, Canada, and the United Kingdom, these immigrants have an important role in spurring innovation and economic growth in all countries and filling shortages in the

domestic labor supply. This report summarizes the proceedings of a Fall 2014 workshop that focused on how immigration policy can be used to attract and retain foreign talent. Participants compared policies on encouraging migration and retention of skilled workers, attracting qualified foreign students and retaining them post-graduation, and input by states or provinces in immigration policies to add flexibility in countries with regional employment differences, among other topics. They also discussed how immigration policies have changed over time in response to undesired labor market outcomes and whether there was sufficient data to measure those outcomes.

[An Overview](#) Springer

The frequency with which people move home has important implications for national economic performance and the well-being of individuals and families. Much contemporary social and migration theory posits that the world is becoming more mobile, leading to the recent 'mobilities turn' within the social sciences. Yet, there is mounting evidence to suggest that this may not be true of all types of mobility, nor apply equally to all geographical contexts. For example, it is now clear that internal migration rates have been falling in the USA since at least the 1980s. To what extent might this trend be true of other developed countries? Drawing on detailed empirical literature, *Internal Migration in the Developed World* examines the long-term trends in internal migration in a variety of more advanced countries to explore the factors that underpin these changes. Using case studies of the USA, UK, Australia, Japan, Sweden, Germany and Italy, this pioneering book presents a critical assessment of the extent to which global structural forces, as opposed to national context, influence internal migration in the Global North. *Internal Migration in the Developed World* fills the void in this neglected aspect of migration studies and will appeal to a wide disciplinary audience of researchers and students working in Geography, Migration Studies, Population Studies and Development Studies.

Patterns, processes, and politics Springer

This report documents the increase in labor migration in Asia and looks at how finance and technology can aid its positive impact on home countries. As diasporas increase, governments have reached out to citizens abroad to provide them with financial instruments. Remittance channels have long ...

[International Migration Outlook 2014](#)

World Bank Publications

Migration and Remittances from Mexico: Trends, Impacts, and New Challenges, edited by Alfredo Cuecuecha and Carla Pederzini, is an indispensable resource for Mexico-U.S. migration studies. It includes a review of the most important available databases for the study of migration from Mexico and Latin America to the United States.

Innovative Approaches for the Management of Labor Migration in Asia OECD Publishing

This report presents available evidence on public perceptions and attitudes regarding migration globally. It analyzes how they can influence and be influenced by policy and the media. It suggests several ways to improve communication about migration to promote better understanding and recognition of the benefits of migration.

The publication comprises two parts: part A analyses major migration trends in 2010/2011, offering an overview of developments in policy, legislation, international cooperation and dialogue on migration, and part B reviews the evolution of the agency's approach to migration management since the end of the Cold War. It also presents a statistical overview of the organization's programmes over the last decade.

Third Edition World Bank Publications

This report points to the growing number of labor migrants in Asia and examines the policy question of how to best safeguard their rights. Governments and stakeholders in both origin and destination countries have largely recognized their mutual interest in safeguarding labor migrants. Multilateral frameworks have also put this in focus, with safe and orderly migration seen as important. This report examines some of the key policy questions in protecting migrant workers, including how to promote fair recruitment of less skilled workers, and how to address vulnerable groups such as irregular migrants and domestic workers. The four chapters in this report draw on issues raised and discussed during the Sixth Roundtable on Labor Migration in Asia: Safeguarding Labor Migrants from Home to Workplace that was held in Tokyo from 3 to 5 February 2016. The event brought together regional experts and policy makers and was co-organized by the Asian Development Bank Institute, the Organisation for Economic Co-operation and Development, and the International Labour Organization. The report's introductory chapter reviews recent regional migration trends. Two statistical annexes provide an overview of migration flows within Asia and between Asia and other regions.

[The Future of Migration to Europe](#) OECD Publishing

The Economic and Fiscal Consequences of Immigration finds that the long-term impact of immigration on the wages and employment of native-born workers overall is very small, and that any negative impacts are most likely to be found for prior immigrants or native-born high school dropouts. First-generation immigrants are more costly to governments than are the native-born, but the second generation are among the strongest fiscal and economic contributors in the U.S. This report concludes that immigration has an overall positive impact on long-run economic growth in the U.S. More than 40 million people living in the United States were born in other countries, and almost an equal number have at least one foreign-born parent. Together, the first generation (foreign-born) and second generation (children of the foreign-born) comprise almost one in four Americans. It comes as little surprise, then, that many U.S. residents view immigration as a major policy issue facing the nation. Not only does immigration affect the environment in which everyone lives, learns, and works, but it also interacts with nearly every policy area of concern, from jobs and the economy, education, and health care, to federal, state, and local government budgets. The changing patterns of immigration and the evolving consequences for American society, institutions, and the economy continue to fuel public policy debate that plays out at the national, state, and local levels. The Economic and Fiscal Consequences of Immigration assesses the impact of dynamic immigration processes on economic and fiscal outcomes for the United States, a major destination of world population movements. This report will be a fundamental resource for policy makers and law makers at the federal, state, and local levels but extends to the general public, nongovernmental organizations, the business community, educational institutions, and the research community.

An Anthology of Migration and Social Transformation OECD Publishing

The 2020 edition of *International Migration Outlook* analyses recent developments in migration movements and policies in OECD countries and some non-member countries, and looks at the evolution of the labour market outcomes of immigrants in OECD countries.

Overview of Migration Trends for the Period 2005-2015 : Analytical Report Ledizioni

Since 2000, IOM has been producing world migration reports. The World Migration

Report 2020, the tenth in the world migration report series, has been produced to contribute to increased understanding of migration throughout the world. This new edition presents key data and information on migration as well as thematic chapters on highly topical migration issues, and is structured to

focus on two key contributions for readers: Part I: key information on migration and migrants (including migration-related statistics); and Part II: balanced, evidence-based analysis of complex and emerging migration issues.

Communicating Effectively about Migration Routledge

This report analyzes labor migration trends in Asia and puts them in the context of demographic and policy trends. It provides an overview of the population trends in different Asian countries and looks at policy settings in several sending and destination countries of labor migrants.
