Understand the next level of marketing The new model for marketing-Marketing 3.0-treats

customers not as mere consumers but as the complex, multi-dimensional human beings that they

are. Customers, in turn, are choosing companies and products that satisfy deeper needs for

participation, creativity, community, and idealism. In Marketing 3.0, world-leading marketing guru

Philip Kotler explains why the future of marketing lies in creating products, services, and company

cultures that inspire, include, and reflect the values of target customers. Explains the future of

marketing, along with why most marketers are stuck in the past Examines companies that are

ahead of the curve, such as S. C. Johnson Kotler is one of the most highly recognized marketing

gurus, famous for his "4 P's of Marketing" In an age of highly aware customers, companies must

demonstrate their relevance to customers at the level of basic values. Marketing 3.0 is the

unmatched guide to getting out front of this new tide sweeping through the nature of marketing.

DIMENSI PENGELOLAAN BERKELANJUTAN DI KOTA AMBON National Academies Press

This groundbreaking text provides background theory on the concept of sustainable development

(environmental, social and economic aspects) and presents a series of practical case studies on such

topics as waste water management, air quality, solid waste management and renewable energy.

*Priority Areas for National Action* Analisis Mengenai Dampak Lingkungan dalam Pembangunan

Berbagai Sektor

The guidelines are intended to provide background information and guidance to international,

national and local authorities in making risk assessment and risk management decisions. In

establishing pollutant levels below which exposure does not constitute a significant public health

risk, the guidelines provide a basis for setting standards or limit values for air pollutants.

**The Oil Palm Sector at a Crossroads** Elsevier

Legal aspects of air pollution control through integrated environmental management in Indonesia.

PENGELOLAAN DAERAH ALIRAN SUNGAI (DAS) University of Florida Center for

This country profile reviews the drivers of deforestation and forest degradation in Indonesia, sets out

the institutional, political and economic environment within which REDD+ is being implemented in

Indonesia, and documents the process of national REDD+ policy development during the period

2007 □ early 2012. While Indonesia is committed at the national and international level to

addressing climate change through the forestry sector, there are clearly contextual challenges that

need to be addressed to create the enabling conditions for REDD+. Some of the major issues include

inconsistent legal frameworks, sectoral focus, unclear tenure, consequences of decentralisation, and weak local governance. Despite these challenges, however, REDD+ opens up an opportunity for improvements in forest governance and, more broadly, in land use governance. More democratic political-economic processes in general, greater freedom of civil society and the press, and heightened awareness of environmental issues can help build support and solidify policies in this direction.

*Basics, Concepts, Cases* Pergamon

This publication has been carried out on behalf of the Great Ape Survival Partnership (GRASP),

established by UNEP and UNESCO in collaboration with a wide range of non-governmental

organisations in response to growing concern over the plight of the orangutan, the chimpanzee, the

bonobo and the gorilla. The report used the latest satellite imagery and data from the Government

of Indonesia to assess changes in the forests of one part of south-east Asia. The results indicate that

illegal logging, fires and the plantation of crops such as palm oil are intruding extensively into

Indonesia's national parks, the last safehold of the orangutan. The orangutans share this habitat

with a wild range of other threatened and ecologically important species including the Sumatran

tiger, Sumatran rhinoceros and Asian elephant.

**Laporan kualitas kependudukan dan lingkungan hidup Repelita IV.** IICA

The second Sustainability Report of the Asian Development Bank (ADB) offers easily accessible

information on ADB's policies, programs, and practices as they relate to the social and

environmental sustainability of development in Asia and the Pacific, and on changes in this work

that have occurred since ADB published its first Sustainability Report, in 2007. The report also

documents ADB's continuing efforts to minimize its corporate environmental impact, especially at its

Manila headquarters. For comparability, ADB's current Sustainability Report is structured similarly to

its first. Both reports respond to the latest guidelines of the Global Reporting Initiative while

adapting to the particular characteristics of ADB's work and the many different audiences interested

in the information presented.

*Majalah bulanan Pemerintah Propinsi Daerah Tingkat I Jawa Timur* John Wiley & Sons

In the study of civil society and social movements, most cases are based in Western Europe and

North America. These two areas of the world have similar histories and political ideals and structures

in common which in turn, affect the structure of its civil society. In studying civil society in Asia, a

different understanding of history, politics, and society is needed. The region's long traditions of

centralized, authoritarian states buttressed by Confucian and in some cases Communist ideologies

may render this concept irrelevant. The chapters in this international volume cover most of the

areas and countries traditionally defined as belonging to East Asia: Japan, Taiwan, South Korea,

Hong Kong, Singapore and China. The case studies included in this volume confront the utility of

using the Western concept of civil society, represented in its most active form - social movements -

to think about East Asia popular politics. Along with providing an array of important case studies of

social movements in East Asia, the introduction, chapters and conclusion in the book take up three

major theoretical questions: the effect of the East Asian cultural, social and institutional context

upon the mobilization, activities and outcomes of social movements in that region, the role of social

movements in larger transformative processes, utility of Western social movement concepts in

explaining social movements in East Asia. This book will be of interest to two major groups of

readers, those who study East Asia and those who pursue social movements and civil society, as

well as politics more generally.

Analisis Mengenai Dampak Lingkungan adalah proses yang menghasilkan dokumen yang

dibutuhkan dalam kegiatan pembangunan. Dokumen ini berisi kajian dampak lingkungan yang

memenuhi dua aspek, yaitu aspek regulatif dan aspek ilmiah. Sebagai suatu dokumen yang

berlandaskan regulasi dapat dipergunakan untuk mempertimbangkan kebijakan pembangunan. Sementara sebagai suatu dokumen ilmiah, substansinya bersifat objektif, logis, dan universal serta memenuhi kaidah epistemologi, ontologi dan aksiologi. Dalam buku ini, diberikan landasan kebijakan berupa berbagai regulasi yang terkait dengan pembangunan sektoral. Pembangunan sektoral mempunyai macam kegiatan yang sangat banyak. Di samping itu, ada yang paling sederhana tetapi ada juga yang paling kompleks. AMDAL yang paling sederhana hingga yang paling kompleks, yaitu AMDAL tipe Tunggal, Kawasan, dan AMDAL Terpadu yang paling rumit. Ketiganya diuraikan landasannya dan berbagai contoh aplikasinya. Proyek pembangunan di Indonesia sangat beraneka ragam macam dan lokasinya. Oleh karenanya contoh yang diberikan hanya bersifat umum sehingga untuk rencana pembangunan dengan ekosistem, biosistem dan sosiosistem yang berbeda harus dilakukan penyesuaian. Menyadari akan banyaknya metodologi ANDAL maka dalam buku ini diberikan contoh metode yang paling sederhana dan mudah diikuti. Metode yang paling sederhana dan mudah yaitu metode Matriks Interaksi. Semoga bermanfaat. [UGM Press, UGM, Gadjah Mada University Press]

[Mimbar Jati](#) Pascasarjana Manajemen Hutan Unpatti Ambon

In this path breaking study, Jasser Auda presents a systems approach to the philosophy and juridical theory of Islamic law based on its purposes, intents, and higher objectives (maqasid). For Islamic rulings to fulfill their original purposes of justice, freedom, rights, common good, and tolerance in today's context, Auda presents maqasid as the heart and the very philosophy of Islamic law. He also introduces a novel method for analysis and critique, one that utilizes relevant features from systems theory, such as, wholeness, multidimensionality, openness, and especially, purposefulness of systems. This book will benefit all those interested in the relationship between Islam and a wide variety of subjects, such as philosophy of law, morality, human rights, interfaith commonality, civil society, integration, development, feminism, modernism, postmodernism, systems theory, and culture.

[Aceh Menuju Ekonomi Islam](#) International Institute of Islamic Thought (IIIT)

Di Indonesia, fenomena Daerah Aliran Sungai (DAS) kritis merupakan masalah lingkungan yang cukup serius. Ini dapat dilihat dari data di mana DAS kritis di Indonesia mengalami peningkatan jumlah dari tahun ke tahun. Pada 1984 tercatat ada 22 DAS berstatus kritis. Pada 1992, DAS kritis meningkat menjadi 39 dan pada 1998 menjadi 42. Sementara itu, pada 2000 meningkat menjadi 59

dan pada 2002 naik menjadi 60. Pada 2005 jumlah DAS kritis di Indonesia mencapai 62 DAS dan pada 2008 meningkat menjadi 291. Terjadinya peningkatan DAS kritis ini disebabkan oleh pelbagai faktor, di antaranya penggunaan lahan yang masif untuk berbagai kepentingan, seperti lahan pertanian, perkebunan, pertambangan, dan permukiman. Kondisi DAS yang semakin kritis dan luas membutuhkan perhatian yang serius dari berbagai pihak. Buku ini hadir meletakkan pengelolaan DAS dalam paradigma pembangunan yang berkelanjutan. Dalam paradigma ini, pengelolaan DAS tidak dilihat semata dari segi kepentingan ekonomi, akan tetapi juga dilihat dari kepentingan ekologi dan sosial. Di samping itu, dalam paradigma ini, pengelolaan DAS bukan hanya diarahkan pada pemenuhan kebutuhan generasi sekarang atas sumber daya air, melainkan juga diorientasikan untuk ketersediaan sumber daya air bagi generasi mendatang. Buku ini sangat cocok bagi mahasiswa, dosen, pegiat lingkungan, dan perwakilan pemerintah yang memiliki keterkaitan dengan pengelolaan DAS maupun sumberdaya alam lainnya.

A new release in the Quality Chasm Series, Priority Areas for National Action recommends a set of 20 priority areas that the U.S. Department of Health and Human Services and other groups in the public and private sectors should focus on to improve the quality of health care delivered to all Americans. The priority areas selected represent the entire spectrum of health care from preventive care to end of life care. They also touch on all age groups, health care settings and health care providers. Collective action in these areas could help transform the entire health care system. In addition, the report identifies criteria and delineates a process that DHHS may adopt to determine future priority areas.

[A Systems Approach](#) W. W. Norton & Company

Water Quality Management covers the fundamentals of water quality; water quality modeling and systems analysis of streams, reservoirs, and estuaries; and practical water quality topics and problems. The book presents topics on the legal aspects; the physical, chemical, and biological dimensions of water quality; and water quality requirements. The text also describes the pollution inputs from both point and nonpoint sources; eutrophication; thermal pollution; and groundwater quality. Detailed discussions on water quality parameters and characteristics; hydrologic and hydraulic aspects of water quality; mixing; and simple and complex water quality models are also included. The book further tackles topics on waste assimilative capacity determination, as well as effluent outfall design. Practicing environmental engineers and professionals involved in pollution abatement programs, environmental students undertaking studies in water quality management, and professionals involved in water quality management or water resources problems will find the text quite.
