Living Thoughtfully, Dying Well JHU Press

"A gorgeously written primer for anyone who has ever been (or ever will be) a patient . . . The book soars." —The San Diego Union-Tribune Jamie Weisman was a patient long before she was a doctor. She was born with a rare defect in her immune system that leaves her prey to a range of ailments and crises and that, because it is treatable but not curable, will keep her a patient for life. In this probing and inspiring book, she brings her sojourns on both sides of the doctor-patient divide to bear on the issues of the flesh that preoccupy us all. It is a worthy addition to the best that has been written about our physical selves, a meditation on our extraordinary powers of healing and the limitations that leave intact the miracle and tragedy of being.

A Better Death Bentang Pustaka

Chronicles the author's descent from a top cardiologist to a patient slowly succumbing to Parkinson's disease and dementia, including how he struggles with the feelings he experiences daily and the impact of the diseases in his life.

Previously published as part of THE ALZHEIMER'S ACTION PLAN. What would you do if your mother was having memory problems? Five million Americans have Alzheimer's disease, with a new diagnosis being made every seventy-two seconds, with millions more at risk. Although experts agree that early diagnosis and treatment are essential, families don't know where to turn for authoritative, state-of-the-art advice and answers to all of their questions. Now, combining the insights of a world-class physician and an award-winning social worker, *Living Well After an Alzheimer's Diagnosis* tells you the truth about Alzheimer's treatment, living well with early-stage Alzheimer's, finding peace of mind during the middle years, and answers the 40 most common questions. Clear, compassionate, and empowering, *Living Well After an Alzheimer's Diagnosis* is a must-read.

From Ira Byock, prominent palliative care physician and expert in end of life decisions, a lesson in Dying Well.

Nobody should have to die in pain.

Nobody should have to die alone. This is

Ira Byock's dream, and he is dedicating his life to making it come true. Dying

Well brings us to the homes and bedsides of families with whom Dr.

Byock has worked, telling stories of love and reconciliation in the face of tragedy, pain, medical drama, and conflict.

Through the true stories of patients, he shows us that a lot of important

emotional work can be accomplished in the final months, weeks, and even days of life. It is a companion for families,

showing them how to deal with doctors, how to talk to loved ones—and how to

make the end of life as meaningful and enriching as the beginning. Ira Byock is

also the author of *The Best Care Possible: A Physician's Quest to*

Transform Care Through the End of Life.

Mail Her name was Henrietta Lacks, but

scientists know her as HeLa. She was a

poor Southern tobacco farmer who

worked the same land as her slave

ancestors, yet her cells—taken without

her knowledge—became one of the most

important tools in medicine: The first

“immortal” human cells grown in culture,

which are still alive today, though she

has been dead for more than sixty years.

HeLa cells were vital for developing the

polio vaccine; uncovered secrets of

cancer, viruses, and the atom bomb’s

effects; helped lead to important

advances like in vitro fertilization,

cloning, and gene mapping; and have

been bought and sold by the billions. Yet

Henrietta Lacks remains virtually

unknown, buried in an unmarked grave.

Henrietta’s family did not learn of her

“immortality” until more than twenty

years after her death, when scientists

investigating HeLa began using her

husband and children in research

without informed consent. And though

the cells had launched a multimillion-

dollar industry that sells human

biological materials, her family never

saw any of the profits. As Rebecca Skloot

so brilliantly shows, the story of the

Lacks family—past and present—is

inextricably connected to the dark

history of experimentation on African

Americans, the birth of bioethics, and

the legal battles over whether we control

the stuff we are made of. Over the

decade it took to uncover this story,

Rebecca became enmeshed in the lives

of the Lacks family—especially

Henrietta’s daughter Deborah. Deborah

was consumed with questions: Had

scientists cloned her mother? Had they

killed her to harvest her cells? And if her mother was so important to medicine, why couldn't her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, *The Immortal Life of Henrietta Lacks* captures the beauty and drama of scientific discovery, as well as its human consequences.

A doctor on the front lines of hospital care illuminates one of the most

important and controversial social issues of our time. It is harder to die in this country than ever before. Though the vast majority of Americans would prefer to die at home—which hospice care provides—many of us spend our last days fearful and in pain in a healthcare system ruled by high-tech procedures and a philosophy to “fight disease and illness at all cost.” Dr. Ira Byock, one of the foremost palliative-care physicians in the country, argues that how we die represents a national crisis today. To ensure the best possible elder care, Dr. Byock explains we must not only remake our healthcare system but also move beyond our cultural aversion to thinking about death. *The Best Care Possible* is a compelling meditation on medicine and ethics told through page-turning life-or-death medical drama. It has the power to lead a new national conversation.

Seven years ago, John McManamy was diagnosed with bipolar disorder. Through his successful Web site and newsletter, he has turned his struggles into a lifelong dedication to helping others battling depression and bipolar disorder reclaim their lives. In *Living Well with Depression and Bipolar Disorder*, he brilliantly blends the knowledge of leading expert authorities with the experiences of his fellow patients, as well as his own, and offers extensive information on: Diagnosing the problem Associated illnesses and symptoms Treatments, lifestyle, and coping The effects of depression and bipolar disorder on relationships and sex With a compassionate and eloquent voice, McManamy describes his belief that depression is a wide spectrum that reaches from occasional bouts of

depression to full-fledged bipolar disorder. The first book to help patients recognize this diversity of the disorder, *Living Well with Depression and Bipolar Disorder* will help sufferers begin to reclaim their lives.

Living Well with Back Pain Simon and Schuster

Sounds impossible, right? And yet, it's truly so simple and logical that, in our so-called "enlightened" society, it seems ridiculous to us. The solution? Return to God's diet plan as described on Day 3 of creation in Genesis 1:29. That's it! Departing from God's divine diet has brought us to the brink of physical disaster! Heart disease. Cancer. Type 2 diabetes. High blood pressure. Obesity. And premature death. Modern foods leave our cells starving for nutrients and the body bulging from excess empty calories. We are overfed and undernourished by processed foods that create unrelenting hunger and perpetuate unhealthy food addictions. We are digging our graves with a fork and spoon one bite at a time! In *Alive!* Dr. Stoll provides these informative and helpful features: Biblically documented nutrition guide Quick-Reference Food Guide Research from 10,000+ science and medical articles and reports Facts verified in 200+ books and with the world's nutritional authorities A fully cross-referenced index Using the Bible, case studies, medical research, and scientific facts, Dr. Stoll teaches us how to retreat from our suicidal sugar-and-fat based diet to God's divine plant-based food plan. If we return to God's original provision of food, we can achieve renewed health, disease reversal, and energized life into our eighties, nineties, and beyond! This is not just another fad diet-it's God's perfect food plan. Try it You'll live longer and truly enjoy being

'Being Alive Well': Health and the Politics of Cree Well-Being is a critical medical anthropological analysis of health theory in the social sciences with specific reference to the James Bay Cree of northern Quebec. In it the author argues that definitions of health are not simply reflections of physiological soundness but convey broader cultural and political realities. The book begins with a treatise on the study of health in the social sciences and a call for a broader understanding of the cultural parameters of any definition of health. Following a chapter that outlines the history of the Whapmagoostui (Great Whale River) region and the people, Adelson presents the underlying symbolic foundations of a Cree concept of health, or miyupimaatisiun. The core of this book is an ethnographic study of the Whapmagoostui Cree and their particular concept of "health" (miyupimaatisiun or "being alive well"). That concept is mediated by history, cultural practices, and the contemporary world of the Cree, including their fundamental concerns about their land and culture. In the contemporary context, health – or more specifically, "being alive well" – for the Cree of Great Whale is an intimate fusion of social, political, and personal well-being, thus linking individual bodies to a larger socio-political reality.

Although fibromyalgia is a real neurological condition, it is not

uncommon for FM sufferers to be treated as if "it's all in your head." Support, understanding, and even basic information can be hard to come by for coping with the intense pain and fatigue of this debilitating chronic illness, as well as the grief, anger, and isolation that often accompany its onset. *Women Living with Fibromyalgia* offers insight and practical advice to help sufferers alleviate the symptoms of FM and manage its impact on their lives, relationships, and careers. Women from all walks of life share their experiences and the lessons they've learned about fibromyalgia, from a single student pondering the impact of FM on her future to the mother trying to find the energy to care for her children. Topics include: Strategies for dealing with pain, fatigue, and "brain fog;" advances in pharmaceutical treatment; results from latest scientific research; exciting new "alternative" treatments; financial issues such as insurance and Social Security benefits; and how an awareness of their rights can help women with FM in dealing with healthcare providers. This book helps its sufferers create new, rewarding lives even as they grieve the loss of the old one.
