Why do children do the things they do? What can teachers do to manage it all? While there is not a simple method for understanding and managing all behaviors or all children, teachers can give young children the social and emotional tools needed to grow and thrive on their own. Developed and tested in the classroom, *Beyond Behavior Management*, is a strength-based approach to guiding and managing young children's behavior by helping them build and use essential life skills—attachment, collaboration, self-regulation, adaptability, contribution, and belonging—into the daily life of the early childhood classroom. As a result, children will learn to exhibit more pro-

social behaviors, work better as a community, and become excited and active learners. This edition includes two new chapters and content reflecting early learning standards, new research, cultural diversity, and strategies to strengthen the home-school connection. Discussion and reflection questions, exercises, journal assignments, child profile templates, a planning worksheet, and sample scripts are also included. Jenna Bilmes is an early childhood consultant and an instructional designer for WestEd Child and Family Services. She is a frequent presenter to teachers, administrators, and counselors nationally and internationally.

In this volume, language learning and professionalization are explored by addressing the existing gap between pressing needs for enhanced soft skills in work environments wherein technology-mediated, multilingual communication is increasingly the norm, and current foreign language teaching and learning offerings in higher education. Considering theoretical, methodological, and pedagogical perspectives for preparing language learners and teachers in/for the 21st century, this volume's eight chapters underscore that research findings should inform the design of learning experiences so that people's communication needs in fast-changing work environments are met and the link between language education and professionalization, within a lifelong learning perspective, is sustained.

From the duo behind the massively successful and award-winning podcast Stuff You Should Know comes an unexpected look at things you thought you knew. Josh Clark and Chuck Bryant started the podcast Stuff You Should Know back in 2008 because they were curious—curious about the world around them, curious about what they might have missed in their formal educations, and curious to dig deeper on stuff they thought they understood. As it turns out, they aren't the only curious ones. They've since amassed a rabid fan base, making Stuff You Should Know one of the most popular podcasts in the world. Armed with their inquisitive natures and a passion for sharing, they uncover the weird, fascinating, delightful, or unexpected elements of a wide variety of topics. The pair have now taken their near-boundless "whys" and "hows" from your earbuds to the pages of a book for the first time—featuring a completely new array of subjects that they've long wondered about and wanted to explore. Each chapter is further embellished with snappy visual material to allow for rabbit-hole tangents and digressions—including charts, illustrations, sidebars, and footnotes. Follow along as the two dig into the underlying stories of everything from the origin of Murphy beds, to the history of facial hair, to the psychology of being lost. Have you ever wondered about the world around you, and wished to see the magic in everyday things? Come get curious with Stuff You Should Know. With Josh and Chuck as your guide, there's something interesting about everything (...except maybe jackhammers).

As parents and teachers know, yelling comes naturally to children. This friendly, encouraging book, geared to preschool and primary children, introduces and reinforces where and when to use an "indoor voice" or an "outdoor voice." In classic Best Behavior style the author tells young readers, "Your voice is a powerful tool. How you use it is up to you." Vivid illustrations show the times and places for an indoor voice, the ways people ask us to quiet our voices, and times when yelling might occur. "What happens if you're mad or frustrated or really, really excited? Your voice gets louder and LOUDER." But yelling hurts people's ears and feelings. Children learn that they can quiet their voice and use their words to talk about a problem. "Think before you yell, and use your words well!" Includes a special section for parents and caregivers with activities and discussion starters. The Best Behavior series uses simple words and delightful full-color illustrations to guide children to choose peaceful, positive behaviors. Select titles are available in two versions: a durable board book for ages baby-preschool, and a longer, more in-depth paperback for ages 4-7.
