No one knows what the next disaster will be: earthquake, Coronavirus, flu epidemic, flood, terrorist attack. But everyone should know how to survive a medical emergency if a medical professional isn't available. From Dr. Joe Alton and Amy Alton ARNP comes an updated edition of their bestseller *The Survival Medicine Handbook*. This unique medical book is meant to enable the average person to handle injuries and illness in situations in which modern medical facilities and professionals aren't available due to a disaster. This book is written by America's top medical preparedness experts: Joe Alton, MD, and Amy Alton, ARNP. Their mission: to put a medically prepared person in every family for when medical help is not on the way. Using decades of medical experience, they address, in plain language, dozens of medical issues associated with surviving disasters and

epidemics. The Altons also discuss the medical supplies needed to become a medical asset to your family and community as well as alternative and natural strategies for when pharmaceuticals aren't available. Topics include: Appendicitis and Conditions that Mimic It Urinary Tract Infections Mosquito-Borne Illnesses Allergic Reactions and Anaphylaxis Head Injuries Animal Bites Snake Bites Head injuries Kidney Stones Dislocations and Fractures Nosebleeds Pain Medications Natural Pain Relief And much much more! Most medical books will send you to the doctor or hospital when an emergency happens. The Altons assume that the worst might actually happen—that the average person could be left without medical help in a disaster. With their book, you can keep your family healthy in times of trouble.

Build the Perfect Bug Out Bag Harper Collins

It begins with looking within. It is all about who you are being. Consider the psychology of survival You may need to survive on your own after a disaster. This means having your own food, water, and other emergency survival supplies in an emergency kit in sufficient quantity to last for an unknown length of time. This could be only for a few hours, days, or it could be weeks, a month or longer...only the disaster emergency situation and your preparation in advance will dictate how long you will survive before outside help arrives if ever. Local officials, emergency responders or relief workers may be on the scene after a disaster, but they cannot reach everyone immediately and YOU will be on your own until they arrive. Remember these words..."on your own". You can not depend on being rescued or helped when others are "first". The emergency responders may be totally swamped or they may not know where you are or that you need help! Your wait may be a very long time! Are you prepared to save your life and those you love? What are the most important things you will need to survive

in an extreme emergency when you are without outside help? *Emergencies versus Major Disasters*The Mindset of a Survivor*Emergency Preparedness Basics*Collecting and Storing Water*Building Shelter and Adjusting to Temperature*Surviving Natural Disasters*Surviving Man-Made DisastersDownload your copy today!
