 Marketing and supply chain management have a symbiotic relationship within any enterprise, and together they are vital for a company's

viability and success. This book offers a systemic approach to the integration of marketing and supply chain management. It examines the strategic connections and disconnections between supply chain and operations management and marketing by focusing on the factors that constitute the extended marketing mix, including product, price, promotion, people, and processes. Key aspects of supply chain management are discussed in detail, including material handling, unit load, handling systems, and equipment, as well as warehousing and transportation, design, and packaging. The book then goes on to explore the marketing functions of intangible products (services), followed by a focus on B2B markets. Throughout, there is a strong

emphasis on the optimization and maximization of the value chain through the development of a systems approach with a market-orientation. Pedagogy that translates theory to practice is embedded throughout, including theoretical mini-cases, chapter-by-chapter objectives, and summaries. *Marketing and the Customer Value Chain* will help advanced undergraduate and postgraduate students appreciate how front-end marketing can interface with the back-end operations of supply chain management.

Social Marketing John Wiley & Sons

A new marketing paradigm focuses on the concentrated economic power of 600 global cities. *City-Centered Marketing: Why Local is the Future of Global Business* is a compelling practical

analysis of a new direction of marketing within the context of intensifying urbanization and the shift of global economy from West to East. Philip Kotler, one of the world's foremost marketing experts, and his brother Milton, an international marketing strategist, explain why the future of marketing must focus on top global cities and their metro regions, and not squandered resources on small cities. Marketing is city-centered activity. 600 global cities will contribute 65 percent of the global GDP of \$67 trillion by 2025. The top 100 cities will contribute 25 percent of GDP, and 440 of these top 600 cities will be in the developing world. Top cities have to improve their marketing prowess in compete for the right companies and settling on the best

terms. By 2025, the vast majority of consuming and middle-income households will be in developing regions. While New York, Los Angeles, and Chicago will remain major players because of high per-capita GDP and capital and intellectual assets, companies will pay more attention to growing city regions in the developing world. Multinational businesses must change the culture of their headquarters, divisions and branches, as well as their value chain stakeholders to take advantage of these market changes. The book details the strategies for sustainable growth with topics like: Resource allocation in developed versus developing city markets Shifting the focus to city regions instead of central governments The rise of new

multinational corporations from developing economies Declining consumer and business growth in developed cities Cities in China, Brazil, India, and throughout the Middle East and Latin America are rising to become major players in the global marketplace. Philip and Milton Kotler argue that an inversion is taking place, and top cities are growing economically faster than their national rate of growth. These emerging city markets are critical to company growth , and City-Centered Marketing: Why Local is the Future of Global Business provides the vital information and guidelines that companies need to plan accordingly. 50+ Metrics Every Executive Should Master Prentice Hall

Turning Principle into Practice Social Marketing: Changing Behaviors for Good is the definitive textbook for the planning and implementation of programs designed to influence social change. No other text is as comprehensive and foundational when it comes to taking key marketing principles and applying them to campaigns and efforts to influence social action. Nancy

R. Lee (a preeminent lecturer, consultant, and author in social marketing) and Philip Kotler (an influential individual in the field who coined the term “social marketing” in 1971 with Gerald Zaltman) demonstrate how traditional marketing principles and techniques are successfully applied to campaigns and efforts to improve health, decrease injuries, protect the environment, build communities and enhance financial well-being. The Fifth Edition contains more than 26 new cases highlighting the 10 step planning model, and a new chapter describing major theories, models and frameworks that inform social marketing strategies and inspire social marketers.

The Marketing Plan Handbook presents a streamlined approach to writing succinct and meaningful marketing plans. By offering a comprehensive, step-by-step

method for crafting a strategically viable marketing plan, this book provides the relevant information in a concise and straight-to-the-point manner. It outlines the basic principles of writing a marketing plan and presents an overarching framework that encompasses the plan's essential components. A distinct characteristic of this book is its emphasis on marketing as a value-creation process. Because it incorporates the three aspects of value management—managing customer value, managing collaborator value, and managing company value—the marketing plan outlined in this book is relevant not only for business-to-consumer scenarios but for business-to-business scenarios as well. This integration of business-to-consumer and

business-to-business planning into a single framework is essential for ensuring success in today's networked marketplace. The marketing plan outlined in this book builds on the view of marketing as a central business discipline that defines the key aspects of a company's business model. This view of marketing is reflected in the book's cross-functional approach to strategic business planning. The Marketing Plan Handbook offers an integrative approach to writing a marketing plan that incorporates the relevant technological, financial, organizational, and operational aspects of the business. This approach leads to a marketing plan that is pertinent not only for marketers but for the entire organization. The Marketing Plan Handbook can benefit managers in

all types of organizations. For startups and companies considering bringing new products to the market, this book outlines a process for developing a marketing plan to launch a new offering. For established companies with existing portfolios of products, this book presents a structured approach to developing an action plan to manage their offerings and product lines. Whether it is applied to a small business seeking to formalize the planning process, a startup seeking venture-capital financing, a fast-growth company considering an initial public offering, or a large multinational corporation, the framework outlined in this book can help streamline the marketing planning process and translate it into an actionable strategic document that informs business

decisions and helps avoid costly missteps.

In *Upstream Marketing*, authors Tim Koelzer and Kristin Kurth share best practices, research, case studies, and analysis informed by their more than twenty years of experience helping transform client brands and businesses through their work at EquiBrand Consulting, a top management consultancy. The result is a groundbreaking deep-dive into the fundamentals of upstream marketing—the process of identifying and fulfilling customer needs, which relies on the strategic implementation of three core principles: insight, identity, and innovation. An invaluable tool for business leaders looking for mindset,

strategy, and processes that will help them improve their organization proactively, instead of reactively. Upstream Marketing includes meticulous analysis of seven profile companies, breaking down the values and principles that make them great—and offering some how-to tips you can apply yourself. The authors also draw on examples from their own work with clients to help illustrate how applying the principles of upstream marketing correctly and at the right time can impact the health, growth, and success of any business.

How to compete in the right space for greater profitability and growth The Internet, mobile technology, the ubiquity of information and the availability of big

data have dramatically increased the speed and impact of success and failure. Companies today know that they must be competitive, but precisely where, and more importantly how, to compete is not always easy to identify—until now. Compete Smarter, Not Harder explains how to prioritize market opportunities so that a company's strengths in one area can be leveraged across multiple markets. Using cutting-edge academic research and extensive industry practice, author William Putsis outlines the strategic decisions needed to determine which space provides the best margins, overall profitability, and growth potential. Details a step-by-step process for strategic prioritization, from strategic market selection to the tactics of execution, providing competitive

advantage across markets Written by Doctor William Putsis, a professor of marketing, economics, and business strategy at the University of North Carolina at Chapel Hill, who has consulted and led executive development efforts with leading companies throughout the world Prioritize with conviction. Make absolutely sure that all of your hard work goes toward the right space.
